**RECORD FOR LOW ALIEN INFLUX SET IN FEBRUARY**

Tighter restrictions and the economic depressions were cited by Commissioner General Hull as having reduced immigration to the lowest point in the history of the Labor Department.

The February total of 4147 immigrants admitted was below the lowest month of the world period. The number admitted in the eight months from July 1, 1930, to February 28, was 50 per cent under the corresponding period in 1929-30.

The drive on alien criminals and aliens here illegally continued to show results.

The Department sent back to the countries from which they came 1517 aliens in February, and at the same time turned back 693 who were without proper credentials.

**HIGHWAY DEPARTMENT TO BE RE-DISTRICTED.**

In order to simplify the work of taking over 20,000 miles of rural roads, as contemplated in a bill now before the Legislature, Governor Pinchot, last Thursday, announced that the State will be divided into six divisions with two districts to each division. Centre county will be in the 2nd district of the first division which will include the following counties:

District 1—Crawford, Erie, Forest, Mercer, Venango and Warren counties. District 2—Cameron, Clinton, Centre, Elk, Clearfield, Potter and McKean counties. T. C. Frame, of Meadville, will be the engineer in charge of the entire division.

S. W. Jackson, who for some years past has been engineer in charge of this district, with headquarters at Clearfield, will become engineer in charge of the sixth division, which includes the counties in the western part of the State.

D. C. Stackpole, who at one time was located in Bellefonte but of late stationed at Harrisburg, is to be the engineer in charge of the third division in the eastern part of the State.

Wayne D. Meyer, who was the first division engineer in charge of this district and who of late has been located in Philadelphia, will become chief engineer in charge of maintenance, at Harrisburg.

A rumor has been current here the past few days that there is possibility that the district offices might be moved to Bellefonte from Clearfield, but this is hardly likely, as Centre is practically on the southern boundary line of the district. But there is some assurance that the present office here will be enlarged and the office force considerably increased, providing the twenty thousand mile rural road bill is passed by the Legislature.

Dairy students of the Pennsylvania State College will stage their ninth annual dairy exposition tomorrow, May 9. Five major dairy breeds have been fitted for the show by the students and will be exhibited and judged. There will be a milking contest for the girl students in the department. \$1,000 in prizes will be awarded the winners of the various contests.

**"HOW \$4.33 A MONTH**

**Saves FOR US"**

**THERE'S** not a day in the week that electricity doesn't save time and work at our house. It hurries up the ironing . . . lightens the heaviest part of the cleaning . . . keeps food properly chilled . . . and gives us luxurious warmth from our portable heater. It even saves lots of steps back and forth to the kitchen by making toast and coffee right at the table.

Then every evening, it provides plenty of good light to save eyestrain and those nervous headaches which so frequently follow.

But the greatest saving is in our current bill; only \$4.33 a typical month for 66 kilowatt hours. We always feel that we are economizing by using all the

electricity we need. Mr. J. V. K. (a West Penn customer).

**ECONOMY IN ELECTRIC COOKING**  
Mrs. J. V. K. could also find electric cooking economical by using approximately 130 more kilowatt hours.

Since she is already using 66 kilowatt hours, the additional 130 would cost her only \$3.23. This total of 196 kilowatt hours at \$7.66 would in 1923 have cost \$15.76 or more.

It is our policy not only to decrease the cost of current, step by step, with increased consumption; but also to reduce rates whenever possible.
