### Your Health

INFANTILE PARALYSIS IS DANGER-

Infantile paralysis is one of the nost contagious diseases known. Keep your children clean. Bathe hem frequently. See that they seep their hands particularly clean.

Be sure that each child has its own clean handerchief. Keep your children away from places where the disease exists. Keep your house unusually clean.

Don't allow a fly in it. Keep your garbage bucket clean and tightly

Chrow away all useless knick-knacks and rubbish. Use soap and water generously, and let nature kill the car as well as operating it:

"I built the car for my own amuse-Don't let your children play with groups of children. Don't let them attend parties and festivals. Don't let them it ment, as I always wanted to do something mechanical, in 1868, and in my capacity as stationary engineers. ake them to movies.

ive in a house where there are no ases of the disease.

Give your child cold boiled water

asily digested food. Let your child have plenty of rest.

cal cases of the disease. Here is common picture: A child, previusly perfectly well, complains of a ittle stomach trouble or diarrhoea. ines are any good. Camphor will ot do any good. See a doctor! It is important for parents to now that the dreaded poliomyelitis, r infantile paralysis, attacks chilren mainly through the nose. The erm infects water, and can be aken through the nose passages by hildren swimming in unclean wa-er. So says Dr. Weyer of the Wil-

ard Parker Laboratories. The germ is probably introduced ato the nose most often by the fingrs. Children should be taught rom infancy to keep their hands ways from mouths and noses. In-uenza, "colds," a dozen infections tart after being planted on the muous membrane.

A chinese proverb forbids you to ouch your nose or mouth, "except, ith your elbow."

Children and adults should rememer that.

SERUM

Search for a method of marking umans resistant to the infection of ifantile paralysis has led to the disovery of a means to make monkeys nmune to this disease. This paralysserum, has been introduced by Dr. Villiam B. Brebner, of the Washingon University Medical school at St.

STATE ISSSUES TITLE FOR AUTO BUILT IN 1868

The State bureau of motor vehicles has issued a certificate of title covering what appears to be the oldest gasoline motor vehicle in the United States and perhaps in the world. James F. Hill, of Fleetwood, Berks county, claims to have built the car in 1868. Certificate of title No. 2,916,413 has been issued for it to Daniel S. Shade of Fleetwood.

In an affidavit made before Charles V. Glynn, notary public, of Fleetwood, Hill declares he built the car in 1868 and operated it along the roads in Fleetwood and vicintiy. He also asserts that about 1905 he received State Permit No. 56 allowing him to drive the car and for which he paid \$2. Shade says he bought the car from Hill about 1922.

The car has iron tires, is of the roadster type and has a two-cylinder engine capable of 7.2 horse-power. Head lamps and tail lamps are fitted with candles. Because its equip
that will not draw or hold gas and its connections prevent any leakage. ment fails to meet the present standard of safety as required by the vehicle code the bureau has declined to A large issue license tags. If it is to move

He asks that unemployed workers be notified not to go to Las Vegas expecting to find employment unless they have a definite surface of the voters of the party as expressed at the Boulder Dam site, and the surface of the s from the streets of Fleetwood.

"Horseless vehicles with explosive of personal effort produced their first gas. motor vehicle in 1891." Hill's car then was tweny-three years old.

#### MOTORISTS AND RABBITS

With the advent of warm weath- er Dam. er and cleared roads is noticed an unusual number of dead rabbits on the highways. Officers of the game commission throughout the entire State are furnishing reports of this sort almost daily. What makes the fact more distressing at this time of the year is the knowledge that many young rabbits are being orphaned and unable to care for

While it is true that many of these creatures are killed accidentally, nevertheless the fact remains that a goodly portion are killed by "smart alec" drivers, those kind of people who look upon hunting as ty to see "how close" they can come to Br'er Rabbit. They are in the spleen is often infected by the disease, though the infection that the spleen is often infected by the disease, though the infection the same category as those narrow-minded persons who condemn transitions.

In some sections of the State there are far more rabbits killed each year by the motorist than by the hunter. Therefore, the game commission asks the auto- driving public to enter into the spirit of conservation a little more forcibly this year, and suggests that motorermatitis. And fungus dermatitis ists be a little more careful and give the wild creatures on the highways a "brake," both mechanically and conscientiously.

#### REBUILDING OF ALL HOUSES IN WORLD URGED BY AUTHOR

H. G. Wells, the author, believes the world needs a new house. He told the Royal Institute of British Architects:

"We must accept the possibilities of rehousing all mankind, rebuilding every city in the world and reclaiming roads and country side. I think we can well look forward to the time when towns will rebuild themselves as we now go to the tailor

for a new suit of clothes. "We can look forward to the time people will no longer think of living "Since the discovery of insulin it is been a matter of comparative ise to prepare patients for

NEW GAS GUN MAY BE TERROR TO CRIMINALS.

A youthful inventor has announced the perfection of a "gas gun." The weapon, he believes, will prove invaluable in subduing criminals and month; quelling riots, because, while it renders its victim insensible for two

hours, it leaves no after-effects. He is J. W. Van Karner and "shot" himself with the gun as experiment.
"I was completely out for two

hours," he declared. "I fired a heavy charge from a gas cartridge into my Annual co head. I actually felt better when I came too, for the gas had cleared up a nasty cold."

The gas gun is a compact, light

weapon weighing only 21 ounces. It resembles a "triple-decker" revolver in that its detachable cartridge clip fits into the end of the gun, giving It is a neat and well-balanced pock-

A large model, designed as a distress signal, contains a double cartover the highways, it will have to be ridge clip and may be fixed on a towed by one of its modern descendants. Hill says the car was built as an experiment.

In a letter to Benjamin G. Eynon single trigger and may be fixed on a swivel convenient to the pilot of an airplane or motorboat. This gun has a full hand grip instead of a single trigger and may be fired by a

Van Karner experimented 13 years on the gas gun in Europe and Amerment, as I always wanted to do something mechanical, in 1868, and in my capacity as stationary gases, certain parts of which are asphyxiating and irritant," Van

Karner said "The gas leaves the muzzle of the gun with a report as loud as that of The range of the gun has

been effective up to 100 feet.

"The majority of shooting with a regular revolver is done at a distance of 30 feet. The gas gun will be most effective at from 20 to 25 feet, but may be used for close-range shooting from three feet to 40 feet."

We are authorized to announce that D. A. McDowell, of Spring township, is a candidate for nomination for Recorder ticket, subject to the decision of the voters of the party, as expressed at the primaries to be held on Tuesday. September 15, 1931.
