"THE Cheapest  
COMMODITY I BUY—  
AT \$4.72  
A MONTH"

When I stop to think of all the different ways electricity is useful around the house, it seems to me that it's the cheapest commodity I buy.

It begins the week by saving me all the wearing drudgery of rubbing out the clothes by hand. Then, when the electric washer is through, the electric iron takes up the task of saving me work. Later in the week, the vacuum cleaner makes it easy to give all our rugs a good cleaning. The electric refrigerator safeguards our food. And we frequently enjoy a cozy meal prepared entirely by our electric appliances.

But that's only a part of the story! Every night at dusk, we start turning on the lights. Plenty of soft glowing light is a priceless

blessing . . . invaluable to the cheer and comfort of our home. Yet much as electricity means to us, our current bill is only \$4.72 an average month for 79 kilowatt hours. Do you wonder I think it a bargain? Mrs. M. P. W. (a West Penn customer).

### And Electric Cooking!

In addition, Mrs. M. P. W. could enjoy the economy of electric cooking by using approximately 130 more kilowatt hours.

Since she is already using 79 kilowatt hours, the additional 130 would cost her only \$3.16. This total of 209 kilowatt hours at \$7.88 would in 1923 have cost \$16.54 or more.

It is our policy not only to decrease the cost of current, step by step, with increased consumption; but also to reduce rates whenever possible.
