

HODGE-PODGE OF NEWSY INCIDENTS.

She was just a little "picky" or six years old. Her eyes almost popped out of her little head and the shine on her ebony face resembled a newly polished shoe as she danced along the street early Saturday morning. The cause of her appiness was explained when she set a man on his way to work and exclaimed: "Mister, I found some money," and opening the grimy, little hand she revealed a dime.

Two Bellefonte boys are working in Philadelphia. One is through college and has a job with a large corporation. The other has been earning yet at college and has been working his vacation time to get money to complete his college year. The elder brother adding his savings to the fund of the younger. Recently the older boy took an examination for a more lucrative position with the company by which he is employed and passed with flying colors. But instead of receiving notice of a promotion he was a victim of the company's recent re-employment policy and set back a notch or two. And about two weeks ago the brothers woke up one morning, to find that the bank in which they had their combined funds had closed its doors and the younger brother's college money had one aglimmerin'.

The way of the transgressor of the Volstead law is hard, but for some it is a stony path wet down with the copious tears shed by the wife and children.

Capt. E. H. Lederer, legal burgess of State College or not, has a most remarkable record. So far during his term he has had an average of about 45 cases a month brought before him and to date only one case has been returned to court. And from all the cases heard the burgess has not received one cent in fees. He has been able to effect a settlement in practically all his cases and the sentence generally imposed is a regular attendance at their church or Sunday school.

Ten days ago local police officers discovered what they thought was a cache of liquor in a privately owned garage building in a residential section of the town. One of the garages built by the land owner and car room rented to whoever might apply. One of the rooms contained no car but was piled full of sealed cartons, and the doors were double-locked. It later developed that the cartons contained women's coats, silk dresses and silk lingerie which is believed to have been carted away from stores here and at State College which recently went into bankruptcy. At any rate several court officers have literally raked the cache by placing new locks on the door.

The grounds surrounding the Pennsylvania railroad passenger station, in Bellefonte, shows very plainly the retrenchment policy of that public utility system. With a greatly reduced force of trackmen the laborers have not time to cut weeds and the big crop of wild grass near the station has all the appearance of a flag station out in "the Sticks."

The borough of State College wants to purchase and own in fee simple the water company which is now supplying its residents with water, and initial steps have been taken to get title to the company through the right of eminent domain. While it is undoubtedly a commendable desire on the part of the residents and taxpayers to own and control the water company it looks like a stupendous financial undertaking at this distance from the college. Five separate interests are combined in the ownership of the present water company and their situation of the plant is considerably over a quarter of a million dollars. It is also understood that in the event the borough is successful in securing ownership of the company tentative plans have already been made for improvements that will cost almost half a million dollars, and that's a whale of a lot of money these times.

Now that the primaries are over we want to remark that the borough fathers let slip a chance to turn some real money into the borough treasury, something it is badly in need of. There is a borough ordinance prohibiting the posting of bills, posters or placards of any kind on trees and poles within the borough limits, and a fine is attached for any violation. Many of the large cards of candidates were tacked up around the town and everyone got away with it, Scott free.

MARRIAGE LICENSES.

Theodore W. Rydeburg, of Grassat, and Helen G. Hummel, of Anse.

Kermit F. Riedy, of Allentown, and Mildred C. Dreibeibis, of State College.

Raymond I. Tompkins, of Washington, D. C., and Martha H. Pillsbury, of Jacksonville, Fla.

Thomas Olin Glenn Jr., of Bradford and Eleanor Louise Sheffer, of Bellefonte.

Joseph A. Frabutt and Virginia Lois Kern, both of Bellefonte.

Robert T. Broom, of Bellefonte, and A. Beulah Casher, of Port Matilda.

Randall R. Steiger and Mary Viola Obble, both of Spring Mills.

PROF. GREEN TALKS TO GARDEN CLUB.

The August meeting of the Bellefonte Garden Club was held at the home of Mrs. Robert Morris, on east Linn street, Wednesday of last week, with 27 members and two guests present. Mrs. Gregg Curtin presided.

The committee on awards, Mrs. George M. Gamble and Mrs. Harry Yeager, reported the following: Blue ribbon, bowl of roses, Mrs. J. J. Kilpatrick; red ribbon, bouquet of marigolds, Miss Blanche Underwood; yellow ribbon, Mrs. D. A. Grove. Bouquet of red salvia.

Professor George R. Green, head of the nature study department at Pennsylvania State College, the speaker of the afternoon, gave a very delightful address on the subject of "Rock Gardens." Because of his large collection of iris, which contain over three hundred varieties and is one of the finest private collections in the State, he devoted part of his address to the culture of that flower, explaining the different types and the long period of bloom which may be obtained by careful study. From his own garden Professor Green brought generous quantities of marked specimens of the most satisfactory plants for rock gardens, which he presented to the hostesses and the president, Mrs. Gregg Curtin, for distribution. His address was filled with helpful suggestions for the amateur gardener and encouragement toward a beginning of this comparatively new type of garden in America, although hundreds of years old in England. Professor Green concluded his address by inviting the Garden Club to visit his garden at State College, and the invitation was gladly accepted because of its great beauty in rock terraces and artistic gardening.

MANY VALUABLE STAMPS BURNED EVERY YEAR.

George T. Bush, Bellefonte's most active and enthusiastic philatelist, (stamp collector), was agreeably surprised, Tuesday morning, when he received notification that he had been elected treasurer of the Society of Philatelic Americans, which has a membership of almost two thousand stamp collectors. He regarded the election as a decided honor, as the office has invariably gone to a man in one of the larger cities.

Mr. Bush is of the opinion that collecting stamps is increasing in interest in this country as well as abroad, and that more than a million men and women, boys and girls are now engaged in making a collection. It is no longer a fad but a purely business proposition. Mr. Bush further asserts that within the past forty years old stamps and envelopes were destroyed within a thirty-five mile radius of Bellefonte which today would have a market value of well onto half a million dollars.

He cites one instance of a once prominent family in town whose homestead sold at public sale for \$8000, while several boxes of old letters and correspondence which had been stored in the attic for many years, and which were burned as refuse, would today have yielded the heirs about \$35,000.

"RIGHT" RELIGION WOULD END SLUMP.

The right religious spirit would lift the depression, Chaplain Raymond C. Knox, of Columbia University, declared in telling of the growth in summer-session religious activities.

"None of the larger national problems are insoluble," Chaplain Knox said. "The co-operative spirit of approach, coupled with a clear-cut ideal and a definite motive power, can effect a solution. Religion is the motive power. With a genuine ideal of service and a new spirit of forgiveness, all peoples could work harmoniously together for a common good. Of course, this would mean a willingness to forego some personal advantage or gain. While this may sound like idealism, there is nothing more practical than an ideal."

All the courses, services and conferences on religious topics at Columbia are designed to bring religion into relationship with the life and needs of men, women and the world today, Chaplain Knox declared. He asserted that there was a steady increase in the number of those interested in religion.

SLUMP, AUTOS BLAMED FOR MISSING PERSONS.

The automobile and the depression both have been held responsible for an increase in a division of police work, this time for the increased number of missing persons in Pennsylvania.

Reports to the state police for the first six months of 1931 showed that 893 persons were missing from home. The 1930 total for the same period was 468.

Child (to young man who called)—Sister told me to entertain you 'till she comes down.

Young Man—Oh, she did, did she?

Child—Yes—and I'm not to answer too many questions.

—Subscribe for the Watchman.

HOWARD.

Frank Butler spent Sunday with relatives in Williamsport.

W. C. Thompson transacted business in Bellefonte last Saturday.
