Bellefonte, Pa., February 19, 1932.

#### FARM WILL BECOME WASHINGTON SHRINE.

"Ferry Farm," the boyhood home of George Washington, on the banks of the Rappahannock river, nearly opposite Fredericksburg, Va., is to be restored and preserved especially for young people between the ages of 7 and 15, which was the period of his life spent there by the first

It was at Ferry Farm that the incident of the cherry tree took place, if at all; and there also was, and still is, the pasture wherein young George "broke," and killed in the breaking, the colt he had been forbidden by his mother to ride, stories which have been used ever since to teach American children to tell the truth, and never to disobey.

Also, it was across the Rappahannock from Ferry Farm, and not February. across the Potomac from Mount Vernon, that Washington is reported to have thrown a silver dollar.

In addition, Ferry Farm was the only remaining tract of land once owned by the Washingtons, preservation of which had not already been These things led the organization very beginning it was a short month. per bird. planned.

ity with the early records descriptive of the place.

for Ferry Farm what has been so perfectly done at Mount Vernon, and of its foundations and purposes.

patriotic, and into which commercial considerations enter not at all, and

"But from the beginning it will be, to the boys and girls of the country, their farm, to visit and see what farm life was for the boys and girls of Washington's day; their farm, where they can have Summer camps, where Boy Scouts and Girl Scouts and other organizations of young people, can hold reunions, on the ground made historic by Washington, and amid surroundings which will make his life and times more than ever vivid in their young

The Ferry Farm property, covering about 460 acres, includes the original purchase by Augustine Washington in 1739 from the executors of William Strother of the land described in an advertisement in The Virginia Gazette of Williamsburg, Va., in the issue dated Friday. April 14, to Friday, April 21, 1738," as follows:

"One tract containing 100 acres, lying about two miles below the falls of the Rappahannock close on the river side with a handsome dwelling house, three storehouses, several other convenient outhouses and a ferry belonging to it, being the place where Mr. Strother lived. It is a very beautiful situation and very commodious for trade."

It was here that Augustine Washington lived with his family until his death in 1743, and it is this property which in his will he left to his son George Washington, whose successive purchase of lands thereafter enlarged the estate to something like 2,500 acres.

George Washington lived at Ferry Farm with his widowed mother during the major portion of his youth, and it was this homestead to which he referred when at Fredericksburg on his first appearance as a private citizen following the resignation of his commission as Commander-in-Chief of the Continental Armies at Annapolis two months before, he spoke of "The place of my growing infancy and in the honorable mention which is made of my revered mother by whose maternal hand, early deprived of a father, I was led

There, as attested by the Conservation and Development Commission of the State of Virginia, he spent the greater part of his time from 1739 to 1747, the boyhood period, when he was between 7 and 15 years old, returning thereafter for frequent visits to his mother, who lived there until 1771. There is still standing on the property the surveyor's office where, tradition says, he worked on surveying plans for Lord Fairfax.

A marker placed by the Commission of the State of Virginia at the entrance to the property reads as follows: "Washington's Boyhood Home." "At this place George Washington lived most of the time from 1739 to 1747. Here, according to tradition, he cut down the cherry Washington's father died here in 1743; the farm was his share of the paternal estate. His mother lived here until 1771."

"Modern historians of certain aconoclastic schools," comments a

#### THE MONTH OF FEBRUARY IN AMERICAN HISTORY.

In American history April is known as the month of war and February as the month which saw the birth of our greatest Presidents, George Washington and Abraham Lincoln. things in America, too, some of them has long, round pods of high quality. having to do with war. And while April has brought the outbreak of armed conflict in all of our wars but one, February has been not at all tions were attended by 3616 persons, peaceful. For in four of our great including farmers, homemakers, wars some important overt act, lead- school children, and meat dealers. ing up to the conflict, has taken place in February. Before the Civil War it was the birth of the Repubferson Davis as its President; before the Mexican war, it was the marchmatic waterer in which the water ing of troops into the disputed ter- can be warmed. Heat from a light war it was the Cuban insurrection water warm enough for the hens. and the blowing up of the battleship Maine in Havana Harbor, and before the World War it was the breaking over. Warm water will induce the off of diplomatic relations with Gerhens to eat more feed and produce many. All of these things came in more eggs.

As a month, February has a long nine days, except in leap years when it was to have thirty. So from the

folder issued by the Foundation, "have attacked the veracity of Parson Weem's history of Washington and the story of the cherry tree.

"Whether tradition is wrong (and the burden of proof rests upon those who would attack it and not on its defenders) or whether the story is true there is no gainsaying the fact that generations of children, past and present, have thoroughly be-lieved the story, and that it has had a great influence in strengthening their belief as to the desirability of

absolute honesty in their lives.
"Not only is Ferry Farm the place where occurred the incident of the cherry tree, but also the many other boyish episodes which trying as they may have been to the patience of his parents, show that while he had a strong respect for honesty, George Washington was in no sense a prig, but a real live, wide awake

boy.
"The George Washington Foundation which has been organized to save this historic site, to restore it to the condition in which it was during Washington's boyhood and to dedicate it, on the occasion of the bicentenary of Washington's birth to the youth of America, has a it. Some farmers sell no timber it. Some farmers sell no timber the boys and girls of our country a tangible proof that we, as a people, honor that honesty of word, thought and deed which characterized Washington as boy and man, and which is a fundamental factor of all true suc-

cess in life." Each contributor to the project is promised a certificate of member-ship in the foundation, dated as of the bicentenary year which, the foundation feels, "will be in years to come not only a source of gratifica-tion to all those who aided in the work, but a valued heritage to the descendants of the original holders." Distinguished men and women in every part of the country, it is stated, are included in the list of contributors to the foundation.

### FARM NOTES
