## FOR HOT SUMMER MONTHS

The present sanitary survey, section of the Commonwealth, will stress "Common Sense Sanitation," according to information given out by Howard F. Bronson, housing engineer of the state department of health, who is directing the survey.

In connection with water supplies uncontrolled by the state depart-ment of health, the following important advice is offered: "Don't use water from any source for drinking, cooking, cleaning the teeth, or other household or personal purposes, unless such water is of known purity. If any doubt exists as to its purity,

"Surface supplies from streams and lakes are usually impure; springs and dug wells are often unsafe; deep wells, cased to rock, are usually satisfactory. Don't dip utensils into the spring or well; instead, install an overflow pipe or a pump

with waste water trough. "Common drinking cups or glasses should not be allowed at any well, spring or spigot to which the public has access. The state department of health, at Harrisburg, will be glad to send you a copy of an illustrated bulletin on the protection of springs and wells.

"Waste water may easily become a health menace. Don't throw kitchen, laundry or bath water into any or lake. To dispose of these waters, construct a separate leaching cess-

## FOR AND ABOUT WOMEN DAILY THOUGHT

If men were always faithful, If men were always true, If we all knew beforehand Just what each man would do.

And if they were forever Kind and sweet and good. Would we be then more happy -You bet your life we would!

-Simplicity is the keynote of the smartest wedding breakfasts and suppers this year-simplicity and perfect preparation.

The big luncheon or dinner is seldom served. So many weddings are taking place in the morning that blond craze, for she was practically the "noon breakfast" is more and platinum by nature, but to transfer more in vogue. Depending on the size of the bride's home, the meal dangerous process, apt to leave you may be served either at tables or with no hair to dye in six months' from a buffet, whichever makes time, according to the hairdressers. serving easier.

Even at buffet service there is the one table, somewhat away from the other guests, where the bride and half cupfuls of honey, stir and bring bridegroom dine together for the first time in wedlock. With them are seated members of the immediate bridal party.

table is usually at one end of the paraffin. Cover with a thicker layer room. It is decorated with the same floral scheme as that used in the house. The linens, candles (if used) and favors are all in white and silver. Favors may be given all guests, if they are seated at tables. Otherwise these are reserved for those at the bride's table, and may just be fancy little bags of paper confetti, or some other trifle.

The chief decoration of the bridal table is the bride's cake, which she cuts and passes to the guests. Her actual cutting may be just the first few pieces, but everyone present recipe for spiced raisins may be

must have a piece.

The other ceremonial cake, a rich and spiced fruit cake, known as the "bridegroom's cake," is unfrosted and may be already cut and set in change the spicing, the amount of tiny boxes—white and oblong, by choice—ready to give each guest to take home.

The bride's cake this season frequently a one-layer cake, but three layers may be used if desired. In either case, the cake has a thick white frosting, which may be or-namented with the bride's and bridegrooms' frosted initials on the top. If not certain of being able to do good frosting, many housewives make the cake and then have some local baker frost it. A coating of almond paste under the white frosting is sometimes used.

-In conversation with a man who refers to his wife as "Mary" should you also speak of her by her first name, even if you know her only slightly?

You must refer to her as "Mrs. Doe" throughout the conversation. The rule which states that you must never refer to a person unknown to public life by his first name unless you call him by it to his face brooks no exception.

-Back to Continental days, when young women powdered their hair to make it appear gray, the hair-dressers have gone for 1932 spring nity. She was a member of the mode which permits women to editorial staffs on the Collegian and change the color of their crowning Old Main Bell and was class secre- glory almost as often as they change gowns. When they raised their once blond heads, there was a shining copper lustre. Similar powders may be had to color hair Nile green, electric blue or russet brown-meeting artistic requirements for a shade to match or contrast any gown. A brisk shampoo is all that's needed to restore the natural color.

The platinum blond is passing. The "honey" blond and the "copper gold" will take her place in the beautiful and the spectacular, say the lily gilders assembled at the convention. It was all right for Jean Harlow, who started the platinum dangerous process, apt to leave you

Honey Jelly.—Take three-fourths of a cupful of water, two and oneto a boil. At once add one-half cupful of pectin, stirring constantly; bring to a rolling boil and remove from the fire. Skin and pour quick-If all guests are seated, the bridal ly into glasses, cover while hot with when the jelly in cold. Roll the glasses to spread the paraffin on the sides. This amount will fill five ordinary jelly glasses.

One may prepare jelly at any season. With fruit juice and pectin any kind of jelly may be prepared in a few moments, using canned fruit.

Spiced Fruits.-These are having such a vogue with meats. I know several fashionable restaurants in New York that are building big business with them. The following used for canned crushed pineapple, canned sour red cherries-or any otner fruits that appeal to your fancy. And you can, of course, sugar and vinegar to suit your own taste. These spiced fruits are served with all kinds of meat.

Wife: "I took the recipe for this cake out of a cookbook, Hub (trampling the soggy thing): "You did perfectly right. It never should have been put in."

Saute Fruits.-Nothing smarter than this. And nothing easier! Drain canned sliced pineapple. Pan-fry godlen-brown in butter or other fat, and serve on same platter with lamb or pork chops, or with broiled fish. Treat canned apricots the same way. These are also delicious with

Rambling through the park one afternoon, a gentleman took a seat on one of the numerous benches, and while in this restful position he noticed a boy lying close by. "What's the matter, young man?" he kindly asked, addressing the

youngster. "Why don't you play around with "I don't want to play," answered

the boy.

"But why don't you want to play?" insisted the gentleman.

"I'm just waiting," was the startling response. "A fellow painted the bench about 15 minutes ago, and I want to see you when you get up."
