THE peculiar taint or infection which we call SCROFULA lurks in the constitutions of multifudes of men. It either produces or i ebled, vitinted state e of the blood, wherein hat Ruid becomes ir competent to sustain the vital forces in their gorous action, and leaves the system to fall into disorder and

riously caused by mercurial disease, low living, disordered digestion from unhealthy food, impure air, fitth and fitthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is berediary in the constitution descending from parents to children. descending "from parents to children unto seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children. The diseases it originates take various names, according to the organs it attacks. In the lungs, Scroula produces tulercles, and finally Consumption; in the come ulcerous sores; in the stomach and bowels, derangements which produce indigestion, dyspensia, and liver complaints; on the skin, eruptive and cutaneous affections. These, all having the same origin, require the same remedy, viz., purification and invigora-tion of the blood. Purify the blood, and theso dangerous distempers leave you. With feeble, foul, or corrupted blood, you cannot have health; with that "life of the flesh" healthy, you cannot have scrofulous disease.

Ayer's Sarsaparilla is compounded from the most effectual anti-dotes that medical science has discovered for this afflicting distemper, and for the cure of the disorders it entails. That it is far superior to any other remedy yet devised, is known by all who have given it a trial. That it does combine virtues truly extraordinary in their effect upon this class of complaints is indisputably proven by the great multitude of publicly known and remarkable cures it has made of the following diseases: King's Evil, or Glandular Swellings, Tumors, Eruptions, Pimples, Blotches and Sores, Erysipelas, Rose or St. Anthony's Fire, Salt Rheum, Scald Head, Coughs from tuberculous deposits in the lungs, White Swellings, Debility, Dropsy, Neuralgia, Dyspepsia or Indigestion, Syphilis and Syphilitic Infections, Mercurial Diseases, Female Weaknesses, and, indeed, the whole series of complaints that arise from impurity of the blood. Minute reports of individual

cases may be found in Aver's AMERICAN ALMANAC, which is furnished to the druggists learned the directions for its use, and some of the remarkable cures which it has made when all other remedies had failed to afford relief. Those cases are purposely taken from all sections of the country, in order that every reader may have access to some one who can speak to him of its benefits from personal experience. Scrofula depresses the vital energies, and thus leaves its vietims far more subject to disease and its fatal results than are healthy constitutions. Hence it tends to shorten, and does greatly shorten, the average duration of human life. The vast importance of these considerations has led us to spend years in perfecting a remedy which is adequate to its cure. This we now offer to the public under the name of AYER's SARSAPARILLA, although it is composed of ingredients, some of which exceed the best of Sarsaparilla in alterntive power. By its aid you may protect yourself from the suffering and danger of these disorders. Purge out the foul corruptions that rot, and fester out the foul corrugators that for, and tester in the blood, purge out the causes of disease, and vigorous health will follow. By its peculiar virtues this remedy stimulates the vital functions and thus expels the distempers which larks within the system or burst out on any pure for its

ly many compounds of Sarsaparilla, that promised much and did nothing; but they will neither be deceived nor disappointed in this. Its virtues have been proven by abunits surpassing excellence for the cure of the childing diseases it is intended to reach. Although under the same name, it is a very different medicine from any other which has leen before the people, and is far more effectual than any other which has ever been available to them.
