The Government computes the interest on both bonds in currency from the date of the maturity of the last coupon, allowing seven and three-cenths on the 7.8-10s, and charging A. Fortune's sent to Washington \$1,000 7 8-10 Bond which reaches there on

(This is counted at \$65 days ......1,014 80

est is given as currency, which is of itself a profit to the party converting the 7.8-10s of nearly eight dollars for \$1,000, aside from the fact that at the present rate of Gold, the 5-20s pay over 8 per cent. per annum. We are converting the 7 8-10s on much better terms than the Government, as the present buying and selling rates enables us to allow the holder of the 7.8-10s a better figure than has yet been offered by any one as

a commission: We also exchange the new 5-20 bond for the other Series of 7 3-10s on the most favorable Parties exchanging through us, in addition they to getting much better terms than they can from the Government, will have their 5-20s delivered to them immediately, thus saving delay.
