Eager to be off, I selzed my bastily-prepared lunchcon, and backet in hand, was noon at the other side of the village, where I found Mr. M. waiting for me, with his little one-horse wagon and two females who proposied to accompany us in our questior the luscious fruit. One of these proved to be a genuine specimen from Faderland, and the other had but recently lifted her foot from Erin's green sod, and was now seeking her fortune in Amerika.

We were soon on our way to the blackberry fields, distant from the village shout fide miles. After we had ascended the hill that overlooks the village, and had fairly gained the open country, the prospect was fields of blooming corn, and dotted with num shocks of outstanding grain, while here and there could be seen groups of merry harvesters, some of whom were singing snatches of familiar songs, at. of the street, on which he had placed a tin forded a variety that was in the highest degree inspir box containing his valuable medicine, and of the field where we hoped to fill our vessels with the coveted fruit. EDITOR ARGES: I understand that the Commis sioners have some hesitation in commencing a suit against Odell, for the \$45,50 which he cheated the county out of, on the ground, that having no property of his own, they could not shiftee him to refund it. If this is so, let me make a suggestion to them which is this: If they publish the receipts and ex penditures in his paper next year they should oblige him to agree to do it for the same amount paid to the Argus, and when the work is done, they should retain from his bill the \$45.50 which he now illegally holds for work never performed. If there was any way of recovering the amount by law-if he had goods out of which the money could be made-is would advise a suit for its recovery at once. As this is out of the question, I am in favor of the flank movement above pointed out, and will insist upo the Commisioners executing it.

Official-Paris Exposition, 1867. OFFICE OF THE HOWE MACHINE CO., 429 BROADWAY, N. Y., July 17, 1867, Advices just received by mail enable us to amorines positively that the only gold needs for American sewing machines was awarded the Elias Howe, Jr., as the manufacturer of the best sewing machines in competition for the prize, and Nr. Howe received the additional award of the Cross of the Legion of Honor, as manufacturer and inventor. The exact wording of the award is as follows:

Howe Machine.

Wheeler & Wilson Jr., promoteur de la machine a coudre, Medicille are. Meduille d'or.

The official list of those who were made Kuights of the Legion of Honor, as published in the Paris paper, roads thus: "Mous Elias Howe, Jr., fabricate de nutrines a contire exposant," which translated into English, roads: "Mr. Elias Howe, Jr., maker of sows in mountainess are thirties." ing machines, exhibiting.

From this it will be seen that the medal awarded by
Wheeler & Wilson was for a Buttonhole Machine,
and not for the Seeing Machine.

MERCHANT TAILOR, JOSEPH BRAUN

Bridgewater, Pa.

HAS BEEN CONSTITUTED AGENT OF THE HOWE SEWING MACHINE for Beaver, Butler, and Lawrence countles. He promises to give full satisfaction to all wishing to purchase a Sewing Machine, as he thoroughly understands the Machine, having used it binaself for a number of years. The Machine has been greatly improved lately, and he has taken a new interest in finem. interest in them.
This Machine does the finest, as well as the coarses

work.

Persons ordering one of these machines, will be instructed how to set it up and also instructed by mystelf or other competent person, how to use it. The Howe Machine is now taking a place in Beaver and vicinity, from which the best of other machines have been excluded.

Persons desiring to see these machines operate, can do so by calling at Mrs. Moore's, at the house of Mrs. Somers, in Beaver Pa., or at the shop of the undersigned in Bethewater.

GOING SOUTH. " Wath IREE's | Matt. TAccom This Machine is constructed on a new principle of mechanism, possersing many rare and valuable improvements, having been examined by the most profound experts, and pronounced to be simplicity and screetion combined. 830AM 215PM Enclid Street.... GOING NORTH.

perfection combined.
In a mechanical point of view, the advantages we claim, or the "Explus Machine," are—
1st.—The method of driving the Needle Bar by a compound clauk, which produces the same action as herotofore obtained by means of a Cam; but in a more durable and abseles. manner.
2d.—We use a rolating shaft above the table, and thus are enabled to give at the room required under the arm; without detriment in the durability of Machines; having a bearing directly over the Needle Bar. MAIL EXPY. 850AM 412PM 1029 526 chines; having a bearing direct. Vover the Receme Bar.

3d.—Our Feed Wheel is a friction feed, and so constructed there is but one joint in transmitting the motion from the rock shaft to the wheel, and walke all others, cannot be effected by oil or dust.

4th.—The Rock Shaft that works the Feed motion also drives the Shuttle. The bearings of this Shaft and Centres are hardened, steel and adjustable, so that we can take up the lost motion at will.

The following are the principal objections urged against Sewing Machines:

1. Excessive fatigue to the operator.

2. Liability to get out of order.

3d. Expense, trouble, and loss of time in repairing.

4. Incapacity to sew every description of material.

5. Disagreeable noise while in operation. 1029 526 1115 605 12019m 643 1236 716 137 891 150 815 GOING PAST. MAIL. EXP'S. EXP'S.
