Beaver, Pa., November 20, 1867.

THE Democrats and Conservatives Washington D. C., screnaded the President a few evenings ago. In his speech he congratulated them, on the result of the election, and insimuated that the verdict was an endorsement of his policy by the people.

Quite a number of the Republican papers of the country have for some time past been from a fisherman named Trax, about the first indulging in the unprofitable business of of April, 1866. THE armed rebels of the Southern State and their northern allies tried hard to heat Gen. Grant when at the head of the Union army in the field. To use a common expression of the day, "they slipped up" on their expectations at that time. Just now they have buckled on the armor anew, and are trying to neventhim from getting the nomination of the Republican party for President in 1868. Their plan is to make him unacceptable to the leading Republicans of the country, by representing him-as not being in accord with their views, and insisting that he is a "conservative" of the strictest sort. In fortherance of this programme they employed an editor from Atlanta, Georgia, to call upon the General, have a conversation with him. andaster doing so, he hurried to his home, and hoisted Grant's name for President, and avowed that the General was not a Radical, but a Conscreative, and that he had told him so himself. Gen. Grant authorized the Renublican papers of Washington city, to say that he had said no such thing, which caused the Atlanta editor to "subside." Next the New York Herald hoisted his name for President, and declared him to be a conservative. That paper was given to understand at once Congressional policy of reconstruction.

The remaining charges in the Local against Capt. Barnes, were frivulous, and intended more to wound his feelings than affect his integrity. The man Trax, before referred to (now residing at New, Castle) was put upon the stand. He testified about the first of April 1866; that Capt.
