CASSIUS M. CLAY, our Minister to Russia hus, at the request of the State Department, tendered his resignation. Several charges, it is announced, have been proferred against him by the Russian authorities, among these that of unfair dealing in the sale of certain telegraph company stocks to Russian capitalists. As there are always two sides to a question we judge the public may safely suspend judg. ment on this one until Mr. Clay himself is

IT is believed that the time has come in the progres of American architecture, when the question will no longer be asked. What shall we use for roofing but, "Where can wrodtain the Best Slate." Older countries have long since criablished the fact. that no material is so well adapted, sud so durable, as late for covering buildings. Two ebstecks to its general use in this country have existed liefeld first, the transition character of society, which is securarily opposed to permanence in architecture md second, the great abundance and low price of him ber. The first impediment is rapidly yielding to time and riper ideas on the subject of livilding, and the oth er must soon give away to the scarcity and advancing price of lumber suitable for roofing purposes.

We submit a few leading advantages of a biste roo It is superior to every other in appearance. It is easily put on. It saves insurance. It is fire proof.

It is imperishable. The Twin City Slate Company's Mines are in Northampion County, Peon's. The Slate is a beautiful dark blue, unchangeable in color, splits in perfectly affinith plates of any size required, and hardens stead-ily by exposure to the atmosphere. No Slate in the United States is superior to it, in all the qualities cases tial to a good soof, and we think but little equal to it It is furnished at the yard in Pittsburgh, at the rate of \$12.00 a square (one hundred square feet), which with expense of laying, will said about 25 per cent. to the cost of a shingle roof at present prices
