OFFICE, No. 43 Seventh Street, Pittsburg, Pa. Ir is believed that the time has come in the progress of American architecture, when the question will no longer be asked, "What shall we use for roofing?" but, "Where can we obtain the nest Slate."-Older countries have long kince established the that that no material is so well adapted, and so durable, as slate for covering buildings. Two obstacles to its general use in this country have existed heretofore first, the transition character of society, which is necessarily opposed to permanence in architecture and second, the great abundance and low price of lum ber. The first impediment is rapidly yielding to time and riper ideas on the subject of building, and the oth

er must soon give away to the scarcity and advancing price of lumber suitable for roofing purposes. We submit a few leading advantages of a Slate roof It is superior to every other in appearance It is easily put on. It saves insurance.

It is fire prof. It is imperishable. The Twin City Slate Company's Mines are in North ampton County, Penn'a. The Slate is a beautifu dark blue, unchangeable in color, splits in perfectly smooth plates of any size required, and hardens stead ily by exposure to the atmosphere. No Slate in the United States is superior to it, in all the qualities esset tial to a good roof, and we think but little equal to it It is furnished at the yard in Pittsburgh, at the rate of \$12.00 a square (one hundred square feet), which with expense of laying, will add about 25 per cent. to the cost of a shingle roof at present prices. Samples of Slate may be seen, and orders left at the office of A. T Shallenberger & Co., Rochester, Pa.
