ROOFING SLATE

s. NEWWYER, S. H. ANDERSON, S. H. SHALLENBERGER, President. Secretary. Superintendent. OF FICE,

No. 48 Seventh Street, Pittsburg, Pa.

It is believed that the time has come in the progres of American architecture, when the question will no longer be asked, "What shall we use for roofing?" but, "Where can we obtain the near State."—Older countries have long since established the fact

Blate for covering buildings. Two obstacles to its

necessarily opposed to permanence in architecture; and second, the great abundance and low price of lum

ber. The dist impediment is rapidly yielding to time

and riper ideas on the subject of building, and the oth

er must soon give away to the scarcity and advancing

price of lumber suitable for roofing purposes.
We submit a few leading advantages of a Slate roof

It is superior to every other in appearance.

The Twin City Blate Company's Mines are in North

ampton County, Penn'a. The Slate is a beautifu

dark blue, unchangeable in color, splits in perfectl

smooth plates of any size required, and hardens stead

ily by exposure to the atmosphere. No Slate in the

United States is superior to it, in all the qualities essen tial to a good roof, and we think but little equal to it

t is furnished at the yard in Pittsburgh, at the rate of \$12.00 a square (one hundred square feet), which with expense of laying, will add about 25 per cent. to the

cost of a shingle roof at present prices.

Samples of Blate may be seen, and orders left at the

office of A. T Shallenberger & Co., Rochester, Pa.
Parties at a distance, can address J. S. Newmyer
