Koeping Pointoes.—It is perhaps needless for ns to caution our readers agains leaving their potatoes oxposed to the light ether out doors only the cellar. They will, it so exposed, soon turn green, become soggy, and almost unit for use. They should, if possible be kept in a dark, cool place, array from all danger of frost in winter. We think potatoes used to keep bet-ter in times gone by in the old dark cesiers, than now, In the modern cellars with their numerous windows, Some are in the habit of keeping their pointoes in plts in the ground, dug deep enough to be safe from very much fear the Vigilance Committee and the frosts. This may keep them well, but it is a troublesome plan. We have known them to be kept in the very best condition in barrels, and covered with sand.

A Good Iden .- Not long ago a petition was carried around by Mr. William Barclay, of this place, asking the town council to pass an ordinance to determine the quantity of coal hauled by haulers, in either of the following ways: 1st to measure and brand the wagons ries, and is not of a very good quality, but of seal dealers with the number of bushels they con- whom the people get their farms fenced with tain, or 2d, have a public scale and weigh each load of coal hauled. We should think the first proposal would the most convenient; at any rate either idea is a and one, and worthy of consideration.

The Town Council met, we understand, but pos poned the consideration of the measure, probably owing to the fact of the absence of members.

Hove the very name of Pennsylvania, We hear it estimated that from last to next January and feel proud of the old Keystone State no less than 200 new buildings will have been erected which rolled an analysis in handsome majority which rolled up, such a handsome unjority for Grant and Colfax, for pence and human advancement and prosperity! There is a great deal of talk in your section about the Vigilance Committed hanging men every week. Well, sir, we have lived two years in this State, and in that time there have been seven men hung by the Vigilance Committee in this county. Their crimes were horse stealing, marder and threats. I do not admire that way of doing business, but the civil law can't get a fair chance at them. Arrest them and give them a trial at court, and by their own gang they will prove an aidi ninety times out of a hundred. But they

make thomselves protty scarce about here.

This State has gone largely Republican Well I will now say something about this county. The soil is of two kinds, black and mulatto. The latter is said to be the best The timber lies along the creeks and tributaburdock they will want but little timber. Coal is pleaty, but very little used. The Missourlans don't admire stone coal. They say if they would cook-their food with coal, would taste of it. Corn used to be the great crop in this country, but now they are turning their attention more to raising wheat. Wheat has done very well since we have been in this State, and there has been a very large amount sown this fall. The farmers have sown generally from 15 to 200 acres, and grain looks very well. Wheat this year aver ages about 22 bushels per acro. There is a very large emigration to this State this fall, and I am glad to see them come; and I say come on for there is room for many more but the Rebel part of this county don't want pany.
