Public Lecture.-The lecture vered on last Tuesday evening in the Presbyterian Church, by Rev. Alexan-der Clarke, on the subject of "Imita-tion," was a very fine effort, and should have been heard by troble the number of those present. The andience was a fair one, but not near so large as Beaver ought to give a lecturer of Mr. Clarke's ability. His theme on this occasion was ability. His theme on this occasion was well digested, adapted to practical life, and his ideas clothed in Beautiful lan-guage. The proceeds of the lecture were for the benefit of the Sabbath School nected with the Presbyterian Church We have not learned, however, ho much was realized on the occasion.

As the first of April approaches many of our people may be seen heaping their household goods and household, gods as well, upon wagons and migrating to ome point where it is presumed that fortune's favors will be more lavishly setowed. If three flittings are as ba as a fire, and we have no doubt there is re fact than fiction in the assertion, it is not a matter of surprise that so many cople are always poor, for some are s given to change that the annual flittings has become a sort of necessity to them without which they never could be content. This annual moving is a very serious tax upon the time, means and health people consider their ways? When shall we have a reform in our tenant system? Why not lease properties for a term of ten, twenty, forty years, or for life? Under such a market of the series of meetings and that the first be held on Sabbath, the life? Under such a market or for life? Under such a market or for life? life? Under such a system many who at 2 P. M. are now poor might save a competency from the now necessary annual moving

A meeting was held in this place or
Saturday last, to take into consideration the utility of adopting measures to sup press "Sabbath breaking," Rov. Mr

Klinger offered the following resolution

and that the first be held on Sabbath, the 28th, in the German Reformed Church, at 2 F. M.

This is an organization much needed in this place.

In no place that we have ever been is there such a descration of the Sabbath as here. Many of the "saloous" are kept open on that day from early dawn till late at night, while to and from them may be seen persons passing, of all ages, Some with bugges of poistoes, or rolls of butter, while in those saloous may at all hours be found crowds of persons may at all hours be found crowds of persons from whose lips bitter eaths fall harshly on the ear of the passer-by, while ever and anon may be seen recling from the door, or led by some friend, some poor, intexicated one. Were it not for those haunts, many of our citizens might be better employed at home with their families, or at church. Should some of our citizens follow their boys to church on Sabbath evenings, they would find that instead of entering the church door, they would pass beyond and enter some low grogery and soon be engaged in playing billards or cards.
