In that case every grave Senator and honorable member would know who to dicker with at sight. We call for the adoption of the resolution at once.

The President in an interview with Senator Boreman, West Virginia, on Thursday has, stated that he had aiready prepared a special message to Congress in which he recommended the passage and granting of universal amnesty to all lately in the rebellion, and that, he was in favor of a law granting amnesty to all and every one who desired; that all that he would have them do would be to make in favor of general amnesty with but few exceptions, and to these he would hever consent as far as be was concerned. The President replied that he did not desire to make any exceptions and would so recommend, that nothing less than universal amnesty.

The Pittsburgh to Beaver, has introduced a precious little "surpent" in the House, in the shape of an Innocont, mild mannered little "surpents of thus the oppose to true a precious little "surpents to leave by way of the left bank of the Ohio. Mr. Adaire, of Philadelphia, couldn't "see anything" in ft, and so objected to its consideration. Adairo likely wants a friend among the corporators. Considering that bitter animosity that was responsive that he preciously that was reported as oxisting between Don Cameron and Ton Scott, and that Quay in his pare had sworn eternal war against the Pennsylvania Railroad, this combination of immes on the project for question is most remarkable. Resistance was made and several hand to know the most took place, but the workman were soon overpowered by the assailants and all quit work. The rioters then moved on the stone quarries adjacent, where a bloody fight ensued in which several men were seriously injured. STANDARD PRINCIPLES.

There should be standard principles without a well as philosophy.
Without a "zero" to start from, or a "standard" from which to calculate a "standard" from which to calculate the deviations, the principle and practice of medicine, in fact the principles of any art or science, cannot be satisfactorily elucidated or properly understood.

The art and science of medicine is divided into several special departments, each having their standard principles which form the basis for their scientific elucidations.

Every particular part of the human

Every particular part of the human body has had its average natural pro-perties, constituents, quantities, &c., reduced upon scientific principles to a standard of nearly definite propor-tions in least

samant or nearly defined proposettions in health.

This serves, for the more correct elucidation of, disease by comparison and measurement of the deviations from the healthy standard. Thus the average proportionate constituents of the blood in health being reduced to standard, any considerable deviation from this standard quality of the blood is diseases.
