I will treat of the resources of California Yours, Ono. NO HOCUS-POCUS. It seems to be a matter of wonder to many persons, and even to some medical men, how any thing like a correct diagnosis of diseases can be made from examination of the urine. This wonder ceases with the latter, however, as soon as they learn the fundamental principles upon which these examinations are based, and be-come practically acquainted with the

chemical constituents and characteristic appearances of that flu-id as voided in the different classes of discuse.

When any organ or part of the body becomes diseased it gives out more than its accustomed share of particles from that part. These Sepparticles from that part. These sep-anted particles are curried out of the body through the medium of the kidneys, and may by chemical anal-ysis and microscopic examination be definitely ascribed to the precise locality whence they are derived. These are practical facts; not mere-ty of value in ordinary case alone

These are practical facts; not merely of value in ordinary cases alone,
but scientific men, Tood, Bennet,
Queckot, and others, have placed on
record numerous instances wherein
the correct diagnosis in obscure
cases depend solely upon these kind
of investigations.

We ourselves, during an experience of over twenty years' practice, have had many individual cases wherein the examination of the urinary se-cretion alone revealed the true nature

of the disease, after all the other well known methods of the very best physicians of the country had signally failed. When we propose to detect diseases by an examination of the urine alone, being prepared, as we are at our office, No. 132 Grant street, Pitts-

ble laws of science.

Indeed, it is these facts alone that give to our peculiar system its true value that stamps it as a science. For that only is scientific which is based

SENATE, April 15.—After the introducnected with the various objects of interexhaustive and complete. The reader is examination. This can be made the one made acquainted with all the proud tri-

paucity of scholars in the district. The Roards of Education in this twp have a reputation for building good sch houses, and persovering in the work unil each sub-district be furnished with a first class house. A few more years and the goal of their ambition will be attain ed.: I am unable to speak from personal bservation of the schools taught in Nos. 2, 9 and 5, owing to a mist as to the time, in which these Scho

closed. It gives me pleasure, however, highly spoken of by a number of the ons. A majority of the eight schools visited were accomplishing an appropriate educational work. Indeed so hem, as I remarked of schools in an adjoining district, were model rural schools; others, again, were deficient in discipline, tact and ability to impart knowledge, which are to be attributed more to the inexperience of the teachers than from any want of interest in the progress of the schools. There are very few scholars in the Anderson district. If ome provision could be made for their education in an adjoining district it would redound to the financial interests of the

ownship. I wish to remark in a general way that very school in the county should close with an examination. It should be made obligatory upon the part of teachers in, their agreement with Boards of Directors improve the present opportunity of publicly announcing that all certificates granted to teachers, hereafter, will be issued with the full understanding that they comply with this regulation. In order to exhibit the importance of this til adjournment without any definite measure I quote the suggestions of the State Superintendent, emanating from the School Department. "It may not be
