The Letters of Resignation and Acceptance.

The Secretary's Orrespondence with the Republican Congressional Com-mittee—His Complete Vindication. WASHINGTON, D. C., Oct. 30th, 1870. Below will be found the correspondence which passed between Sec-retary Cox and the President, in reretary Cox and the President, in re-lation to the resignation of the for-mer. Various statements of the part of the Secretary, and also of the reasons which led to the step on the part of the Secretary, and also of the part of the Secretary, and also of the secretary in the statement of the White House. The letters them-solved in Noi secar test all controversy in regard to their real contents and character. The following may be relied upon as a correct statement of some of the causes which forced the presentation of the issues set before the President by the Secretary : Throughout the summer, Gen. Cox had been aware of vigorous efforts

Previous line president to accommany line president to remove him. Previous line p In his department, to induce the president to remove him. Previous to having in September for a short vacation, there were unmistakable signs that the President was yleiding to the concerted attack upon Gen. Cox. Shortly after the latter left the city?an order to which he had called the attention of the clerks in his de-partment, regulating the absences for voling, was peremptorily revoked by the President, at the instance of Chandler and Cameron, without any consultation whatever with the Sec-retary, or any subsequent communica-

consultation whatever with the Sec-retary, or any subsequent communica-tion with him on the subject, further than the bare order of revocation. The order thus set aside was not a new one, and has been already refer-ed to in these dispatches; but its history should be briefly given here. A year ago the berefary, in his ef-forts to render his department effi-that was greatly embarmased by cient, was greatly embarrased by the long absence of the clerks. Meantime, the boasts and threats of leading party maningers, openly made in the decident of a complete victory upon the questions at issue between them selves and the Secretary, and their definet of a complete victory upon the questions at issue between them selves and the Secretary, and their definet toring any self-respect could longer delay placing the issue of full support against them, or the acceptance of his resignation squarely before the President.
There had, also been an attempt, from the sume source, to change the insue of allowing the selections to be indee by benevolent and rediging the selection to a complete victory to real service to the Republican imparty societies, asking them to recomment of more real service of the Resent.

This leads me to the general sub-site of the absolute necessity for a for it service reform, in which the life set of the absolute necessity for a for it publican party out to take an early and positive lead. The weight and extent of this can only be appreciated by experience. Again, a time of rapid and fre-quent changes is a time when all the proper business of the department drags and becomes entangled, costing the country untold sums of money paid for teaching new men the busi-ness which they hardly learn till they are displaced again. The business of the Government is much greater, and necessarily much
