Athenians Cid-Time Yambers.

BY R. W. BALL.

From the Aussite Nombly for March.]

Athens was in some marked respects a community of New England Yankees, premsturely appearing in the Peccas of the Eistern Mediterranean; and the history of Athens will never be properly written, except by an American scholar.

An enemy of Athenians, in summing up their character, said that "they were made neither to be quiet themselves, nor to let the rest of the world be so." thus assimilating them exactly to our modern Yankees in their fondness for innovation, social and political. In fact, the devising of ideal commonwealths, and the discussion of public and private ethics with a view to legislation, were as they were in the Modern Transatiantic counternart and literally names sake, the Hub. Furthermore a fish might have been suspended with as much propriety over the deliberature of the political counternart and ediliberature of Hon. Henry D. Furthermore a fish might have been suspended with as much propriety over the deliberations of the ancient Athenian Eccesia as over those of the Great and General Court in the State House of this Commonwealth. For the Athenians were as great fisherman as our Cape Ann folks, and were immoderately fond of a fish diet, which accounts perhaps for their startling intellectual brilliancy and apprehensiveness, on the theory of Professor Agassis.

OUR NEW TERRITORY.

The passage of an act by Congress, making a Territory out of the District of Columbia, has created considerable commotion among the political aspirants of the District. The appointment of Hon, Henry D. Cook, to the Governorship was much unexpected by the political ctique, and no little fears are entertained by them that they. Cook may turn a cold

that Gov. Cooke may turn a cold shoulder to jobs and jobbers. this Commonwealth. For the Athenian were as great fisherman as our Cape Ann folks, and were immoderately fond of a fish diet, which accounts perhaps for their startling intellectual brilliancy and apprehensiveness, on the theory of Professor Agassix.

Food and fish, says Mitchell, were synonymous perhaps to the theory of Professor Agassix.

Food and fish, says Mitchell, were synonymous perhaps among the Athenians. Salt fish conditioned the principal food of the Athe soldiers and saltons. Prodigious quantities were imported from the Euxine. When the bell of the fish-market mag, everybody rushed thither, leaving the sophists and orators in the mikdle of their harangues without an audience; and the Athenian billingsgate, like that of modern London, was noted for the scurrious tongues of its dealers. A story is told of an Attic orator who was unfortunately in the middle of his "few feele remarks" when the fish-martar that hall mark they had nothing to have the countered that they had nothing to have the fish-martar that hall mark they had nothing to have the counter that they had nothing to have the fish-martar that hall mark they had nothing to have the counter to possent and stated that they had nothing to have the fish-market hall mark they had nothing to have the fish-market hall mark they had nothing to have the fish-market hall mark they had nothing to have the fish-market hall mark they had nothing to have the fish-market hall mark they had nothing to have the fish-market hall mark they had nothing to have the fish-market hall mark they had nothing to have the fish-market hall mark they had nothing to have the fish-market hall market hall mark SIGNS IN THE POLITICAL SKIES.
