—Attention having been called to the fact in official documents sent to Congress some months ago by the Secretary of the Treasury, the amount due from Collectors of the Internal Revenue was represented to exceed \$20,000,000, while the statement of the Commissioner of Internal Revenue, published a few days since representations. nue, published a few days since, represented the deficiency at less than \$3,000,000. The following explanation is given: The Secretary, when a Collector goes out of office, reports all unsettled taxes on his lists charg-ed to him on the looks of his succesed to him on the looks of his successor. As these taxes are collected they are credited to him, but if any taxes have been wrongfully assessed, or assessed against insolvent firms, they still remain charged to the collector until finally settled and the accounts of the ex-Collector with the bureau entirely closed. Until the advent of the present administration the number of unsettled accounts of ex-Collectors has been constantly increasing, so that some accounts which, should have been closed early during the war, were in 1869 still found open. These accounts have during the past two years been gladually settled, so that comparitively few of them now of them remain unclosed. The Secretary's statement showed the total amount charged to ex-Collectors on the books of the Bureau, as explained above; but the

structure and almost the set of the Bursau, as explained above; but the statement just published shows the actual amount of cash due. A great portion of this will yet be obtained. By the first of July Commissioner Pleasantone expects to have the force of Assistant Assessors reduced to the maximum number. This will make the total number about fifteen hundred. He has now under consideration the adoption of a new kind of paper for beer, distilled spirits, tobacco and cigar stamps, samples of which were furnished by the Hudson paper mills of New York.
