mense pines.

not last, and the passengers cannot, keep their seats half the fine any-how. It's a capital thing for a tor-pld liver. In this we make the re-maining fourteen miles of up-hill to the forove. Despite the jolting I pre-for the change. We leave the dust behind; there is not soll enough on the ronte or create it. We run be-side cfar, cold streams. We are in a region of cold streams. We are into the work is the overpowering sense of immensi-ty is loci. It is not until one has vounded the tree many times and in a region of cold streams. We are into the work is stoled and having exhibited the gorrills in a region of cold streams. We are into the work is stoled and having exhibited the gorrills in a region of cold streams. We are into the work is stoled at the eye comprehendical litegrander. The bark was from ten to twenty-four innexs thill; hereastin in the strucks, bilging outwardly in a succession of ellipsoids around the true. The feet from the baset is the true is calculated to the runck. The feet from the baset is the true is the charks the scholar are in the read, we saw, ing beauty of gorge or wooded fits. The bark was from ten to twenty-four innexs and giving time seems to usher us in their fitting por-

of measuration show it beyond a doubt. Next in order, as in interest, is (or are) the "Husband and Wife." a noble pair of saplings, each sixty feet around the base and two hundred and fifty in hight, growing near and bending lovingly toward each other till their upper branches are com-"The Grove" par excellence, while there is still light enough to appre-ciate its glories. There they stand, the versible wonders of the stand, porting a heavy progency of branch and leaf sufficient to shade an assem-

immediately called upon the keepers Lordy ! what shall I do?" came first sight nearly so large as they are; bly scaled, while near by the "Three there is harmony with adjacent trees, Sisters" stand side by side in graceful for help, and meanwhile to fire. He then drew the short Roman blade which formed a part of his costume, now grabbing a cart pole, then catchand between different parts of the same tree, that the sense of size is lessened by that of elegant uniformi-by proportion and equi-distant from base and commenced fighting desperately ing at a bag of corn as it went over with the lion Tyrant, thrusting the the side. ty. But many of the trees of two or to crown. The trees are mammoth redwoods, sword into his face, mouth and eyes.

decidedly stump appearance, looking assigned by botanists to a class like gigantic stubs rather than trees. known as Sequoia gigantea. In an At first view it seemed to me the tops must have been broken off. The branches add much to this illu-scientist christened them the *Wet-*

moths and common underbrush. Strangest of all, other things appear much dwarfed. As the coach drives between the 7Two Guardsmen," at the entrance of the grow, the horses appear like mere ponies, shrunk to half their natural size. My compan-ion, as he leans against the mon-strous trunk, and extends his arms for me to judgeits width by them, ap-pears a mere mannikin; the smallest tree, one I had guessed at four feet, yond the natural reach of his fin-gress, and dwarfs him amazingly by the strouge trunks with man's brief period work N.C.
work and dwarfs him amazingly by comparison. Here is the place for man to realize his littleness. In the evening shades of these green arches, a ohio.
Mich.
<l

Is nushed; solemn awe misme soul, and in low-foned exchamations alone we briefly converse. But forty miles of staging over boulders and rocky up-grade, with dust enough in us to start a second dust enough in us to start a second dust enough in us to start a second data, incline our party to think thousand years older. When our dust enough in us to start a second data, incline our party to think thousand years older. When our dust enough in us to start a second data, incline our party to think thousand years older. When our dust enough in us to start a second data, incline our party to think thousand years older. When our dust enough in us to start a second data, incline our party to think thousand years older. When our dust enough in us to start a second data.

make me forget fatigue. It is even-ing too; all the way up hill, necessi-tating slow driving, and giving time the trunk. Ten feet from the base this in the claims to look about. The vegetation begins to change rapidly. The shrubby, manguilte drawafah oaks and wrowood disappear, and we are in a magnificent forest of tall trees without underbrush. Every in lie the trees increase in size; the smallest we see for hours are three or four feet in thickness, and nature a cage noticed that a black-maned Af-rican lion, which had only so recent-ly as Monday last bitten his hand, appeared very restive. He conse-quently fixed his eyes on It; and this, in some degree, diverted his atten-tion from an Asiatic lion known by the name of Tyrant, against whom he had been cautioned only that morning to keep carefully to his in-

he had been cautioned only that morning to keep carefully to his in-structions. It is necessary here to note that when performing lious are tamed there is a line drawn, or what is known as "the office," in technical head, and going down on "all fours," he sampered toward the dog with he campeter toward the dog with in the gathering twilight, some in clusters, joining their branches like the columns of great gothe archar, or now and then one isolated and stretching gaunt arms and opening bughsas if it would drink the clouds. The majority appear atumpy and truncated, too thick for their length; but others stretch away in long, reacching hubble of the site is the "Burnt Tree", pro-majority appear atumpy and truncated, too thick for their length; is also hollow its entire length; is also hollow its entire length; is last. Indeed, they do not look at first sight nearly so large as they are; is lost. Indeed, they do not look at first sight nearly so large as they are;

A Sensation in Dayton, Ohio. A Dayton special telegram of the 18th inst. says: The all-absorbing topie for the past few days is the susthe side. This kind of performance couldn't Moher, a German lady, who resided i ne crowd, PANIC-STRICKEN, crowded around and effectually pre-vented the approach of the men who The branches add much to this illu-scientist christened them the *Wel-*scientist christened them the *Wel-*adownward, starting even from the body of the tree at an angle of twen-ty degrees below the horizontal. This, T am told, is caused by the weight of winter snows, continued r Scrofula, Rheama-ise of the reason shown the thousands is scientist christened them the *Wel-*ingtonia gigantea. This roused the body of the tree at an angle of twen-ty degrees below the horizontal.
