

preternatural absence of natural feeling so imperiously demanded.

Animal affection and gratitude.—A party of the crew being sent ashore on a part of the coast of India, for the purpose of cutting wood for the ship, one of the men, having strayed from the rest, was greatly frightened by the appearance of a large lioness, who made towards him, and looked very earnestly, first at him, and then at a tree a little distance off. After repeating her looks several times she arose, and proceeded on towards the tree, looked back several times, seemingly wishing the man to follow her, which he did; and upon coming to the tree he looked up, and perceived a huge baboon with two young cubs in his arms, which he supposed were the lioness's, as she crouched down like a cat, and seemed to eye them very stedfastly; upon which the man, being afraid to ascend the tree he thought himself to cut it down; and having his axe with him, he set to work, when the lioness seemed more attentive to what he was doing; and upon the tree falling, she sprung forward on the baboon, and after tearing him in pieces, she turned round and licked the cubs over and over again; after which she turned to the man, who was greatly frightened at seeing her in such a rage with the baboon; but she came and lapped round him in great fondness, and which seemed to shew her gratitude. She then went to the cubs, and taking them up in her mouth went away with them; when the man made the best of his way off to the shore, where he was taken aboard, and did not get rid of his fright for some time after.

The Ontario.—We have succeeded in ascertaining the following particulars, respecting the late very interesting cruise of this national ship. The commissioner of the Vice King of Peru, who went in the Ontario to Valparaiso, having ascertained that the State of Chili would not treat with him, returned in the Ontario to Lima. From Lima the Ontario sailed for the N. W. coast of America, and in 49 days she anchored in 14 fathom water off the river Columbia; of which each shore was taken possession in the name of the U. S. of America.

After watering at a Spanish settlement in California, the Ontario returned to Lima where the officers and crew were treated in the most hospitable manner. From Lima the Ontario sailed for Valparaiso. On her arrival, Lord Cochran manifested a disposition to insist upon the Ontario paying his ship the compliment of a salute. To reject this, Lord Cochran took measures to get his fleet (the Chilean fleet) consisting of 3 frigates and a sloop of war, to prevent the sailing of the Ontario. He stationed the San Martin of 64 guns off the harbor, and a smaller vessel of twenty guns along side the Ontario. Notwithstanding all these preparations, the Ontario took in her wood, water and provisions, and when ready, sailed, passing the San Martin at a distance of three-fourths of a mile. She & the smaller vessel got under weigh, immediately on perceiving the Ontario make sail. After about two hours the Ontario had left the Chilean ships about 4 miles astern when they gave up the pursuit.

Portland, (Maine) April 20,

Arrived in this town last week, Admiral GEORGE TATE, of the Russian navy on a visit to his relatives and friends who reside in this place and vicinity. Admiral Tate came with his parents to this country from England when between one and two years of age and resided in that part of Falmouth called Stroudwater. At the age of twenty he left this for the West Indies, and thence to England—and soon after entered the Russian service—in which he has continued ever since, a period of forty eight years, and by his merit and good conduct, as an officer and gentleman, has risen to the first rank and command in his profession. Admiral Tate is also a member of the Russian Senate, the highest court of the empire.

A French paper, speaking of Agriculture, as the source of a nation's wealth and happiness, adds "Without leaving our country, we can make immense conquests and these will be surer and more profitable than external conquests; they will not cost a single drop of blood, and they will dry many tears. The true *Champs d'Asile* are in France. Let us be humane and magnanimous, always sympathizing with the unfortunate, but by no means favour or promote emigration. Let us show ourselves a the most prudent nation, and we shall have conquered the nation a second time."

Royal Munificence.—A Gentleman in Massachusetts, lately sent King HENRY of St. Domingo, one of Collin's elegant super royal quarto Bibles. The present was gratefully received, and a few days after the Gentleman received a letter of thanks, enclosing a draft for six thousand dollars.

SEPARATION OF MAINE.

The Portland Argus of Tuesday last, informs that the committee appointed at Boston, at the last session of the legislature, to take into consideration the subject of the separation of Maine from Massachusetts had a meeting in Portland on Thursday, 11th inst. at which measures were taken so bring the subject before the legislature at that June session.

The manufacture of China Ware or Porcelain, equal in firmness to the French, has been commenced in this city. At the monthly meeting of the Historical Society a few days ago, samples of the article prepared by Mr. Mead, from domestic materials, were presented for inspection. Their forms, their composition, their glazing, their enamelling and every thing, gave universal satisfaction.

Agreeably to the provisions of the act lately passed "to improve the agriculture of this state," the sum of 650 dollars is appropriated for two years to the agricultural society of New York county, to be paid to such society from the state treasury, whenever the members certify that they have raised an equal sum to be added to it. This fund of \$1300 is to be bestowed in premiums for promoting agriculture and manufacture.

VALUABLE INVENTION.

Mr. Adam Stuart of this city has invented a machine for bricks, which renders unnecessary the tedious process of preparing the clay by wetting and making it into the consistency of mortar, moulding and drying. This machine may be so constructed as to make about 2000 bricks per hour ready to be put immediately into the kiln, much neater and more compactly formed than is practicable in the common mode; and it is believed that not more than a single horse power will be requisite to produce this effect.
