

[Continued from First Page]
tion of the General commanding the military division of the Pacific for the sale of the Seal Islands, of St. Paul and St. George, Alaska Territory and suggest that it either be complied with or that legislation be had for the protection of the seal fisheries, from which a revenue should be derived.

The report of the Secretary of the Navy, accompanying this, shows the condition of the Navy when this administration came into office and the changes made since. Strenuous efforts have been made to place in commission vessels in commission, or render them fit for service if required, as soon as possible, and to substitute the sail for steam while cruising, thus materially reducing the expenses of the Navy, and adding greatly to its efficiency.

The report of the Postmaster General furnishes a clear and comprehensive exhibit of the operations of the postal service, and the financial condition of the Postoffice Department. The ordinary postal revenues for the year ending the 30th of June, 1869, amount to \$18,344,610, and the expenditures to \$23,688,131, showing an excess of expenditures over receipts of \$5,343,521.

The report of the Secretary of the Interior shows that the quantity of public lands disposed of during the year ending 30th of June, 1869, was 7,026,132 acres, and the proceeds therefrom \$1,010,400. Of this amount, 2,899,544 acres were sold for cash, and 2,737,365 acres were entered under the homestead laws.

There was a strange and startling scene in a Good Templers' Lodge in Lexington, Ky., the other night. John W. Alexander, a young man, was about to be initiated, and as part of the ceremony, was offered a glass of water. He drew back with a shudder and the recollection of the fact that in August last he was severely bitten by a dog flashed with terrible intensity across his mind.

During the year ending 30th of September, 1869, the patent office issued 13,762 patents, and its receipts were \$655,389, being \$21,920 more than its expenditures. I would respectfully call your attention to the recommendation of the Secretary of Interior for uniting the duties of supervising the education of freedmen with the other duties devolving upon the Commissioner of Education.

When you buy anything, don't set up a stone over its grave.

to report a plan, I desist from saying more.
I recommend to your favorable consideration the claims of the Agricultural Bureau for a liberal appropriation. In consequence of the rapid increase of population, and the increase of the heads of families, the benefits that can be conferred by properly fostering this Bureau are incalculable.

INADEQUATE SALARIES.
I desire respectfully to call the attention of Congress to the inadequate salaries of a number of the most important officers of the Government in this message. I will not enumerate them, but will specify only the Justices of the Supreme Court. The salaries have been made in their salaries for fifteen years. Within that time the labor of the court have largely increased, and the expense of living have at least doubled.

A Singular Case.
DEATH OF A LADY—REMARKABLE APPEARANCE OF THE CORPSE—FEARS THAT SHE WAS SURRENDERED ALIVE. (From the Portland (Maine) Advertiser.)
About three weeks ago, the wife of Dr. E. P. Fuller, living about 2 miles west of the village was suddenly taken ill by violent purging and vomiting while taking in an armful of wood from near the door. The illness was followed by what the doctor called and treated as "spinal meningitis," or inflammation of the spine. She recovered so far that her husband left home on Friday, the 14th, for the north part of Montcalm county, to be absent several days.

DR. FULLER'S PATENT HAND SAW MILLS.
The above represented machine HAS NO EQUAL. It is simple in its construction, easily operated, and not liable to get out of order. One man can with perfect ease rip a two inch hard wood or a three inch plank in one third the time that it takes with the ordinary hand-saw, and besides, the most experienced apprentice can, with this machine, do the work of two men.
