Their stock of boots and shoes for men, women and children is certainly the best and cheapest that has ever been brought to Belford, for three reasons: FIRST. On account of the pressure of the times, they have been laid in at 30 cents on the dollar less than what was paid last year for the same kind of mode

test than what was pain first year for the same kind of goods.
SECOND, They were bought for cash, and the usual discounts mole.
THIRD, They were bought in much larger quantities than dry goods merchants buy them, and consequently were bought much lower.
If this is doubted, the evidence is on the stand at the connect.

Notice of Inquisition.

Sworn statement of David McCreary, of Napier Township, Bedford confuty: In April, 1856, as near as I can remember, a small pimple made its appearance on my upper lip, which soon became cularged and sore. I used politices of sorel, and a wash of blue, vitriol, with-out effect. Finding the sore extending, I called on Dr. Ely, of Schelisburg, who pronunneed it GAN-CER, and proscribed a wash of sugar of lead and bread poultices. Finding these remedies of no avail, I called upon Dr. Shaffer, of Davidsrille, Somerset county, who also pronounced the lisease Cancer, and gave me internal and external remedies —the latter consisting principally of caustic; but all to no purpose, as the disease continued spread ing towarl the noso. I next use la preparation of arsenic, in the form of salve. This for a time checked the disease, but the influmation soon is-creased. I next called upon Dr. Statlsr of St. Chairsville, Bedford county, who also pronounced the disease Cancer, and applied a salve said to be a never failing remedy, but it had no effect whatever in checking the spread of the sore. In December, of the same year, the disease had earten away a greater part of my upper lip, and haf attacked the prof. R. S. Newton, of the Electic Medical College, He pronounced the disease on cutaneous Cancer, superinduced by an inordinate use of mercury.— Notice of Inquisition. Dr. Hardmon flewats Consumption, Bronchilis Asthina, L. 117 ngittis, and alt diseases of the throat and lungs, by medical Inhalation, lately used in the Bromton Hospital, London. The great point in the treatment of all human maladies is to get at the disease in the direct manuer. All medicine are estimated by their action u, on the organ fc: quiring rehef. This is the important fact upon which Inhalation is based. If the stomach is di-seased we take medicine directly into the stomach. If the lungs are diseased, breath or inhule medi-cated vapors directly into the langs. Metcines are the antidotes to disease and should be applied to the very seat of disease. Inhilation is the ap-plication of this principle to the treatment of the lungs, for it gives us direct access to those intri-exte air cells and tubes which lie out of reach of every other means of administering medicines.— Dr. Hardman tlewats Consumption, Bronchilis
