

WHEAT AND WHAT IT COSTS.

We find the following statistics of the cost of a crop of wheat, on a small scale, in the N. E. Farmer. It seems to be a fair statement, and we submit it to farmers farther west, for their consideration, and will be glad to receive any statement from them as to "wheat and what it costs," in their country.

I send you the product and cost of a crop of spring wheat raised by me this year on about 64 acres of land. In this account the labor is charged at its costs: labor of a pair of oxen is charged at 95 cents per d.y; herse the same; board of men at 334 cents per day: no manure charged, none having been applied. One piece of the land, about 11 acres, was never before plowed. I assume the value of the land to be \$100 per acre, and the price of the grain to be what I think it is worth to me for consump-

76 bushels of wheat at \$2, \$152.00 61 tons of straw, (estimateu) \$6, COST.

Plowing, barrowing, sowing and labor, \$5.90 Plowing, harrowing, and team, Board of men, at 334, 8.90 5.05 \$19.80 One-half chargeable to succeeding crop

of clover and grass, 9.90 9.90 Cradling, threshing, winnowing and la-Cradling, threshing, carting and team, Board of men, at 33; per day, 12 tushels seed,

\$59.69 6 per cent on \$650, assumed value of

24.08

Taking my estimate of the value of the grain and land and the quality of the straw to be correct, it will be seen that the crop has paid a profit of 93 per cent.; the product per acre being about an average crop. The like results may, I think, he reached 9 years in 10, and often exceeded, with suitable-soil and cultivation. -Samuel Raymond, Andover, Massachusetts.

TRANSPLANTING TREES .- There are many opinions as to the best time to transplant trees. We have done it successfully at different seasons; and from experience and observation have come to the conclusion that it makes but little difference if it is done after the sap ceases to flow in the autumn, and before it starts in spring. It is considered that hard and somewhat rocky land is the best for apple trees .-This is doubtless correct, but apple trees may be advantageously grown on light and even sandy land. In soil retentive of water, per-haps, it would be better to transplant in the spring. Trees, however, set in such soil at any should be set very near the surface. One reason why trees do not come forward more rapidly is, they are set too deep when they are transplanted; and this, too, we believe is one great cause of disease in many kinds of trees. The influence of the atmosphere and the warmth of the sun is as necessary to health and vigorous.

They are also, now making a fine assortment of STOVES of various kinds of the latest patterns and most approved styles, including several sizes of COOK STOVES of the best make, health and vigorous. growth of trees as they are to the germination

heating stoves for churches, offices, bar-rooms, &c.

A full assortment of Stoves will be kept of seeds. Heavy, flat stones placed around the roots of trees will serve a double purpose, by protecting them from the scorehing rays of the summer sun and drouth and preventing their being blown over by strong winds. A good croae mound thrown around the trees will be a safe-guard against frosting, and serve to the autumnal accumulation of water. It will also the a protection against mice girldling them or time in October; one has the feft ear off, and white gnawing at the bark.

the north side of a hedge or wall than they do forward, prove property, pay charges and take them away. JAMES BAREFOOT. on the south side; the snow melts off earlier in the spring, and the sap begins to circulate besequently the sap gets chilled and the growth of the tree is retarded if its life is not destroyed. On the north side the snow remains and all the functions of the tree lie dorment, until they are warmed into life by the atmosphere, fore the severe frosty nights are all gone; conthen they 'go ahead' rapidly.

All manures for truit trees should be those

Kicking Cows.—The cows sometimes move their feet from impatience or restlessness; and sometimes kick for the same reason. Any invariable and prompt infliction of a short, quick punishment, will soon cure them. They dislike to have their tests jerked, and if whenever they kick or step, this infliction always instantly follows, they will soon cease. It is of the utmost importance that it be always uniformly severe, not irregular, and never but once performed for each repetition of the fault.

ing the death of his two sons:

BEDFORD

THE subscriber would most respectfully announce to the farming community, and public in general, that he still continues to manufacture at his shop, in Bedford, Pa., the following farming utensils, of the very beet material, and in the most workman-like manner, viv.

like manner, viz:

THE GREAT PURIFIER!—
THE WORLD CHALLENGED!—
THE BLOOD SEARCHER
FILE BLOOD SEARCHER
FOLORIOUS TRIUMPHANT!
Sw orn statement of David McCreary, of Napier
Township, Bedford county:
In April, 1856, as near as I can remember, a
small pimple made its appearance on my upper lip,
which soon became enlarged and sore. I used
policies of sorrel, and a wash of blue, vitriol, without effect. Finding the sore extending, I called on politices of sorrel, and a wash of blue vitriol, with-out effect. Finding the sore extending, I called on Dr. Ely, of Schellsburg, who pronunceed it CAN-CER, and proscribed a wash of sugar of lead and bread poultices. Finding these remedies of no avail, I catled upon Dr. Shaffer, of Davidsrille, Somerset county, who also pronounced the disease Cancer, and gave me internal and external remedies

-the latter consisting principally of caustie; but all to no purpose, as the disease continued spread all to no purpose, as the disease continued spread ing toward the nose. I next used a preparation of arsenic, in the form of salve. This for a time checked the disease, but the influnation soon increased. I next called upon Dr. Statler of St. Clairsville, Bedford county, who also pronounced the disease Cancer, and applied a salve said to be a never failing remedy, but it had no effect whatever n checking the spread of the sore. In December, of the same year, the disease had eaten away a greater part of my upper lip, and had attacked the nose, when I went to Cincinnati, where I consulted Prof. R. S. Newton, of the Electic Medical College. He pronounced the disease "a cutaneous Cancer, superinduced by an inordinate use of mercury.—He applied mild zinc ointment, and gave internal remedies. My face healed up, but the inflamation was not thoroughly removed. In Febuary, 185, he pronounced me curred, and I lett for home. In April the disease again returned and so violent was he pronounced me cured, and I lett for home. In April the disease again returned and so violent was the pain that I could not rest at night. Late in May I returned to Cincianati, and again placed myself under the charge of Dr. Newton, with whom I remained until September, during which time he used every known remedy, and partly succeeded in checking the disease, but when I returned home there were still three discharging alcers upon my face. I continued using Newton's preparations, and also medicine that I got from Dr. Ely, but the Concer continued growing until it had est off the and also medicine that I got from Dr. Ely, but the Cancer continued growing until it had eat off the left side of my nose, the greater portion of my left cheek, and had attacked my left eye. I had given up all hope of ever boing cured; since Dr. Ely said he could only give relief; but that a cure was impossible. In March, 1858, I bought a bottle of 'Blood Scearcher,' but I must confess that I had no faith in it. I was very weak when I commenced taking it; but I found that I gained strength day by day, and also that the ulcers commenced drying up. I continued, and when the third bottle was taken my face was healed as if by a miracle. I used a forth

continued, and when the third bottle was taken my face was healed as if by a miracle. I used a forth bottle, and I have been healthier since than I have been for the last seven years. Although my face is sadly disfigured, I am still grateful to a benign Providence who has spared my life, and which last been done through the instrumentality of Lindsey's Lyphover Blood Saraguers. D. McGreary. IMPROVED BLOOD SEARCHER. D. McCREARY.

NEW EVIDENCE.

NEW EVIDENCE.

Being afflicted with a grievous Tetter on the arms and face—after trying many remedies which utterly failed to cure—I was persuaded by W. M. Barris & Co. to try Lindsay's Improved Bloed Scarcher; and now, six weeks after finishing the second bottle, pronounced myself cured.

The tetter broke out, something over a year ago, on the inside of my arms, extending from the latest production of the product of the second bottle.

on the inside of my arms, extending from the cl-bows down to the wrists; also, on my face, im-mediately round the mouth and ciin, and continued to be a perfect torment to me until cared by the Blood Searcher. My arms, were almost useless, owing to the cracks and sores on them, liable to bleed at any time on the least exertion to lift or work, and sometimes so itchy that I could scarcely prevent tearing off my flesh. I have now been cured six weeks and feel it due to Mr. Lindsey, and to the public gen-rally, to make this statement, in hope that others like myself may be benefitted by using his valuable medicine.
