ME E E INE 9 SE INPROVED CIST-RON CARRIAGE HUB.

THE undersigned believes that he has invented a L cast iron carriage hub which far excels all others now in use, for strength, neatness and dura-bility, and that it only needs to be examined, and its merits tested, to secure its universal approval and adoption. Indeed it is no longer an experi-ment, it having been effectually tried by the best judges in our country, and pronounced one of the

Greatest Improvements of the age!

Several vehicles have been in use over two years with the improved Hub attached, and the wheels are still as perfect as when they left the shop, the unavoidable we we excepted.

This is the only Cast Iron Hub ever invented sutable for light wheels.

This improvement is of such a nature that one or more spokes may be taken out changed or replaced without disturbing the other portion of the whe I Where a wood bub is used, if a spoke happens to decome broken, it is necessary to cut the tire and separate the fellocs, to get at the damaged part.—The wheel must be then recomposed, the tire rewelded and reset. All this involves a considerable expense and loss of time. expense and loss of time.

in the present Improvement the inner eads of the spokes are secured in an Iron Hub, which con-sists mainly of two shells fastened together with screws. By simply the rewing the nuts and taking off the back shell, any one of the spokes may be removed or changed, and the hub again put together, leaving the wheel as solid and firm as ever, all WITHIN THE SPACE OF A FEW MINUTES.

This method of constructing Iron Hub Wheels gives them unusud strength,

LIGHTNESS AND ARATNESS. heretofore attended their use. The cost of manu-

facture is also greatly reduced.

The subscriber Agent for Bedford County, will dispose of Township and shop rights, on reasonable terms.

WILLIAM O'NEAL Agent.
