

From the American Agriculturist. House Plants not Uuwholesome.

The notion is widely prevalent that houseplants are injurious to health. And the opinion has some show of science to rest upon. It is known that plants in a growing state absorb oxygen and give off carbonic acid gas; and that oxygen is necessary to the support of human life, while carbonic acid is injurious .--Hence the conclusion is jumped at, that all vegetation in a living room must be hurtful to the health. But, in taking this leap, these persons jump over another scientific fact, viz that plants also absorb carbonic acid from the atmosphere, and throw out exygen into it .-From the humblest mosses up to the oak and Jor which the highest price will be given.

May 6, 1859.

A. B. CRAMER & CO. palm tree, the world over, uncounted myriads of leaves are busy at work purifying the air, and fitting it for the use of animal life. The carbonic acid is decomposed in the leaves, the carbon going to build up the structure of the plants, and the oxygen being set free and diffused through the atmosphere.

This great process, it is true, is somewhat cheeked at night, and a small portion of carbonic acid passes off from the leaves into the air. For this reason, therefore, and for others, it is not well to sleep in rooms containing many plants; nor is it necessary to do so. The fragrance of flowers, like all strong odors, freely inhaled, is not wholesome. But many flowers have no fragrance, and others have only a little, so that it is not necessary to exclude all plants from a chamber for this reason. In the case of plants without strong odors at least, if the pots and shelves are kept clean, and the foliage is vigorous and healthy, no harm will come from their presence in rooms. Nay, more, the daily care of such pleasing objects, the sight of their growth and blossom ing, and their varied forms and colors, will rend very much to promote not only cheerful? ness but health.

EARLY FATTENING OF ANIMALS .- The philosophy of increase of fat in animals is, that the digested food not needed to supply waste in the system, is laid up in the form of fat around the muscles, ready to be absorbed again into the circulation if needed. Waste is induced by exercise, or use of the muscles, and also by combustion in the lungs, of the digested food, to supply animal heat. Hence the same amount of food given in warm weather will, if digested, afford a greater surplus of fat than when fed in cold weather. Hogs or other animals intended for fattening should be shut up this month. Many advocate making the size of the fattening pen so small that the animal will have but just room to stand or lie. While confinement favors rest and a disposition ber of subscribers can be raised to warrant the undertaking.

The map will show the location of all the citizens and also their places of business such as stores, Post Offices, Hotels, Manufacturing establishments, Grist Mills, Saw Mills, Shops,&c., also the location of all the public roads, boundary lines, streams, mountains, &c.

Manufacturing establishments, Grist Mills, Saw Mills, Shops,&c., also the location of all the public roads, boundary lines, streams, mountains, &c. The appetite may be kept up by change of food, a frequent supply of green vegetables, such as corn, cabbage leaves, pea-vines, and the refuse ot the garden. Cooked food digests much more easily than raw, and is in a condition to yield more nourishment, and is also better relished by most kinds of stock. Cleanliness in the fattening pens should not be overlooked .-Although pigs preverbially are filthy, they are not really so; they do not delight in the effluvia of their own droppings, as any one can see by noticing that they generally appropriate one portion of the pen to filth. An occasional washing and scrubbing with soap suds will conduce much to their thrift-all animals keep in condition more easily when the skin is kept clean and healthy .- Ib.

WHEAT SOWING-REMEDY FOR THE MIDGE -Daniel Steck, Lycoming Co., Pa. writes The only remedy I know of for the midge, is that of sowing early, in a soil supplied with such constituents, as shall push it forward and cause the crop to mature early. Wheat sowed at the proper time on new land, always matures before the midge can cause it any material injury. The proper time to sew wheat here -Lycoming Co., Pa., Lat. 411 deg .- is from the first to about the middle of September .-If sown earlier than the first, it will not mature any sooner than if sown later than the tenth, from the fact that the top becomes too large in the Fall, the main stalk perishes during the Winter, and new shoots must start from the roots in the Spring. I have harvested wheat from seed sown on the 7th of September, one week earlier than that sown on the 28th of August; both being the same variety, and sown on the same kind of soil.

Carriage and Wagon-Making, WILLIAM WEISEL.

HAS commenced the business of Carriage and Wagon-Making, in the village of

Charlesville, Bedford Co. Pa.

Attention will be given to Repairing. Painting and Trimming. Work will be put up in the best and neatest styles, and at moderate prices. He respectfully solicits the patronage of his friends and the Charlesville, June 10, 1859.-z

DR. M'LANE'S CELEBRATED

VERMIFUGE LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to Dr. Chas. M'Lanc's Celebrated

Vermifuge and Liver Pills. We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE. For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS, For the cure of LIVER COMPLAINTS, all BILIOUS DERANGEMENTS, SICK HEAD-ACHE, &c. In-cases of

FEVER AND AGUE, preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

FLEMING BROTHERS,

PITTSBURGH, PA. to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS. Pittsburgh, Pa. P.S. Dealers and Physicians ordering from others than Fleming Bros., will do well to write their orders distinctly, and take none but Dr. M.Lames, prepared by Plening Bros. Pittavargh. Pu. To these wishing to cive them a trial, we will forward per mail, post paid, to any part of the United States, one box of Fills for twelve three-cent postage stamps, or one vial of Vermifuge for fourteen three-cent stamps. All orders from Canada must be accompanied by twenty cents extra.

For sale by Dr. B. F. Harry, and Reamer & Way edford, and by dealers generally throughout the

M WE WIND 955 IMPROVED CAST-IRON ARRIAGE BUIL

HE undersigned believes that he has invented a cast iron carriage hub which far excels at others now in use, for strength, neatness and dura-bility, and that it only needs to be examined, and its merits tested, to secure its universal approva-and adoption. Indeed it is no longer an experi-ment, it having been effectually tried by the best udges in our country, and pronounced Greatest Improvements of the Age: Several vehicles have been in use over two year with the Improved Hub attached, and the wheels are stikes perfect as when they left the shop, the unavoidable wear excepted.

This is the only Cast Iron Hub over invented sutable for light wheels.

This improvement is of such a nature that one or more spokes may be taken out changed or replaced without distributed the orthogonal transfer.

more spokes may be taken out changed or replaced without disturbing the other portion of the wheel Where a wood hub is used, if a spoke happens to become broken, it is necessary to cut the tire and separate the felloes, to get at the damaged part.—The wheel must be then imporece the sed, the rewelded and reset. All this involves a considerable pense and loss of time.

In the present Improvement the liner ends of the spokes are secured in an Iron Hub, which consists mainly of two shells fasteneted together with

sists mainly of two shells fasteneted together with serews. By simply unscrewing the nots and takin off the back shell, any one of the spokes may b emoved or changed, and the hub again put together r, leaving the wheel as solid and firm as ever, all WITHIN THE SPACE OF A FEW

MINUTES.
This method of constructing Iron Hub Wheels ives them unusual strength,
LIGHTNESS AND NEATNESS.

esides obviating several other objections that have neretofore attended their use. The cost of manu-The subscriber Agent for Bedford County, will dispose of Township and shop rights, on reasonable terms. WILLIAM O'NEAL Agent.
