NEWS TO US .- The Bedford Gazette of last Trees! Trees! Trees!

An attempt was made one night last week, o mob the office of the Semerset Democrat .f the law-abiding people of Somerset, the joters were quelled without any damage having been done.

There was no attempt made to mob the Democrat office, such a thing was unthought of here, and the announcement will be news indeed to STRAWBERRIES, CURRANTS and GOOSEour people. Such unfounded and untruthful BERRIES, in great variety. reports as these are not only a libel on our community, but calculated to alarm and stir up ill feeling among the people of the loyal fine tock of States. Scrofula, or King's Evil; is a constitutional disease, a corruption of the blood by which this final becomes vitiated, teach and peer. Being in the circulation, it pervals the whole body, and may burst out in the case on my part of it. No organ is free from its a tack, nor is there one which it may not destroy. The scrotholous taint is variously entended or unhealthy food, impure air, filth and filthly habits, the depressing vices, and, acree all, by the veneral infection. Whatever he its origin, it is hereditary in the constitution, descending "from prients to children unto the third and fourth generation;" indeed, it seems to be the rode of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the large, liver, and internal organs, is termed to beacles; in the glands, swellings; and on tobeccles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of hig, so that serofulous constitutions not only suffer from scrofulous complaints; but they have far less power to withstand the attacks of other diseases; consequently, wast numbers perish by disorders which, although not scrofulous in their nature, are still rendured fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this larking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigance it by healthy food and exercise. Such a medicine we supply in

the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is combined from the most active remedials that have been decovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Exuprive and Skin Diseases, St. Anthony's Fire, Rose, or Envirentals, Branch and Boils, Tumors, Tetter and Salt Rheem, Scald Hrad, Ringworm, Rheematism, Syphilation and Mercuptal Diseases, Dropay, Dyspersia, Debility, and, indeed, all Complaints anising from Vittated on Industry of the blood. The popular belief in "impurity of the blood" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions. Compound Extract of Sarsaparilla,

So wide is the field of its usefulness and so numerous are the cases of its cures, that almost every section of country abounds in persons publicly known, who have been restored from alarming licly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten. be forgotten.
