The capital stock of the company is ten million of dollars; and as one subscription was for 102,000 shares, \$5,100,000, being 2,000 shares \$100,000, ma jority of the whole number of shares and the whole amount of capital stock prescribed in the act of incorporation. it is clear to discern to what interest the new road is to be made auxiliary and tributary. And in this fact is the corner-stone of the new enterprise. which is to open an iron-way from the southwestern counties to the markets at the seaboard; for the new road has only to be built and opened to existing roads now in use to tidewater. to assure cheap and direct communication from those of the southern tier of counties that are now without railroad facili ties, over connecting links welded in one interest, and harmonized in one grand undertaking to move tonnage and carry passengers.

A railroad that shall cross the mountains and close the gaps in Southern Pennsylvania, by mainstem and branches, is more than a want, it is a necessity. And to supply this desideratum is the transit mission and chartered prerogative of the Connellsville and Southern Pennsylvania Railroad Company.

For more than a score of years "the frosty sons of thunder," the name by which the male issue of Somerset and Fayette counties are known at Harrisburg, have been trying to drive a locomotive across the Allegheny and down into the vale of Wills' Creek: but having always hitherto sought allies in the direction of the Potomac and the Patapsco, they have in consequence suffered that "hope-deferred which maketh the heart sick." But having at last realized that their interests are identical with a potential organization within the State-a Pennsylvania institution for the succor of communities that are kept apart by interposing mountains and water-sheds-they now look longingly and hopefully more towards the east, to the Susquehanna and the Delaware.

To the new Railroad corporation, too, the southern counties west of the Susquehanna river open an ample area for the sweep and scope of a comprehene policy and a broad working plan.

And that the Legislature anticipated important diversified results from the co-operation of the local interests in the southwest counties with the great carrier, which is also a great power in the control of capital and the command of influence, is manifest from the extraordinary privileges granted to the Connellsville and Southern Pennsylvania Railroad Company, which, among other concessions, is en-

EDITOR INQUIRER:-

The election is over and this morning decides whether Lincoln is elected, and the Rebellion crushed, or McClellan elected and the rebels triumphant. At an early hour yesterday morning, the men of the different companies collected together and elected their Judges, Inspectors, and clerks and after taking the necessary oath, the polls were opened and the voting began. Cook houses were mostly the Head Quarters of Boards. I snppose because they afforded good accommodation and also because of the delicacies they afforded, (Uncle Sam's beans) then came the the incidents of an election in the ar my. The advocates of both parties were on the ground, with tickets in their hands, watching every man who came up to the polls, and sometimes enter ing into a warm argument, on the merits of either of the candidates, but as there were so few with the disunion party, argument was of no consequence, as the persons who voted for M'Clellan, did so 'merely because of the name-that name which his party supposed would cover up all the defects of that pa triotic platform erected by a party that disfranchised the soldier who had gone forth in defence of his home and the free institutions of the North. The officers of the regiment took no part in the formation of the boards, leaving it all to the men. After the boards were formed, the offcers, with a few isnignificant exceptions, cast their votes in favor of Lincoln and the
