These works will be printed on a greatly improved quality of paper, and while nearly all American Periodicals are either advanced in price or reduced in size—and very generally both, we shall continue to give faithful copies of all the matter contained in the original editions. Hence, our present prices will be found as cheap, for the amount of matter furnished, as those of any of the competing periodicals in the country.

Compared with the cost of the original editions, which at the present premium on gold would be about \$100 a year, our prices (\$15) are exceedingly low. Add to this the fact that we make our annual payments to the British Publishers for early sheets and copyright in Gold—\$leosting us at this time nearly \$2.50 in currency—and we trust that in the scale we have adopted we shall be entirely justified by our subscribers and the reasing public.

The interest of these Periodicals to American readers is rather increased than diminished by the articles they contain on ourgreat Civil War, and though sometimes tinged with prejudice they may still, considering their great ability and the different stand-points from which they are written, be read and studied with advantage by the people of this country of every creed and party.

Horse and Cattle Powders. These Powders have proved, after a trial of sev-These Powders have proved, after a trial of several years, to be superior to any preparation of the kind in use. The chief superiority of these powders arises from the fact that they are composed of medicines that have Laxative, Tonic and Purifying properties. The laxative ejects crudities from the stomach and intestines, the tonic gives strength to the system of the Horse, and the purifying medicines contained in them cleanse the blood, and lay the foundation for a vigorous and healthy circulation. The use of them improves the wind, strengthens the appetite and gives the horseafine, smooth and glossy skin—thus improving the appearance, vigor and spirit of this noble animal.

These powders are not intended, as most powders are to bloat the animal, so as to give him the appearance of being fat when not really so—but
