In the midst of the planting season, the farmer will do well to remember that his profits, on this most important crop, depend nore upon thorough cultivation, than upon the extent of surface planted. It is a great mistake, made by very many, to go on planting and adding acre to acre, until the close of the planting season, without a thought as to future cultivation. There is no other crop, the profits, of which, depend so much upon thorough tillage. The field, that will carcely produce forty bushel to the acre Gold-Bearing Bonds. with slovenly culture, may be made to produce from sixty to one hundred bushels with the little additional labor required to cultivate and keep it clean after planting. Drouth will sometimes almost destroy a corn crop carelessly tilled, when deep ploughing and clean and thorough culture are all that are necessary to make the farmer almost independent of the weather and secure for him a fair profit. See to it, then, farmers to any ban k or banker. that you plant not an acre more of corn than you will be able to keep perfectly clean and mellow from the time it is above ground until it is too large to cultivate. Thorough work always pays, work half done never

GOOD STOCK. - Why is it that on so ma ny of the farms throughout the country, farms of which no person need be ashamed, and which in almost every particular except this one, show the unquestionable signs of this one, show the unquestionable signs of good farming, the stock exhibit the unmistakable evidence of neglect and inattention in

good farming, the stock exhibit the unmistakable evidence of neglect and inattention in in breeding? There is no donbt that it is generally the result either of carelessness or that it arises from the mistaken idea often entertained by farmers, that "it will not pay" to devote more attention and expense to this branch of their business.

How very much mistaken are those who indulge in this idea, for that it will cost no more to keep a well-bred animal than one of an inferior quality is an undisputed fact, and very often it is the case that that breed of animals which is particularly distinguished for some excellent quality, consume less than those which are their decided inferiors. Hence it follows from this, that it is possible to keep more well-bred animals upon a certain quantity of food than those of an inferior quality.

Having thus proved that it is poor econd my, in relation to the quantity of food consumed, to keep aninferior animal, Ishall now speak of some of the other advantages which well-bred animals have over the inferior. Take, for example, two oxen, one of which is well-bred and well cared for; the other an ill-bred, ill cared for, inferior ani-mal and notice the vastly greater case and celerity with which the former will do his celerity with which the former will do his work in comparison to the latter. In like manner take two cows and notice the difference in the quantity and quality of their milk. Also, in relation to fattening qualities, observe how much quicker, and with what great ter facility the well-bred animals may be fatt ened, and to what greater weights they may be brought than those which are inferior to them. But some may say that it is necessary, in order to obtain these well-bred animals to invest more money than they care about doing. It is true that in some cases it is a recessary to expend a certain amount, but this when properly invested, will soon be repaid. But it often haped, will soon be re, "ald. But it often hap-pens that it is not 1 lecessary to expend any-thing, for there are doubtless some of your neighbors who posse so better bred males than yourself, and often by thus interchang

than yourself, and ofte a sy thus interchanging great benefits may ensue.

Such a method as this would benefit only those who raise their or yn breeding stock but those who buy their stands and sell the young, generally run a risk of obtaining some interior animals.—Ger. nantown Tele-

Sowing SEEDS .- Few of us a re aware of the amount of labor we entail apon our-selves by sowing foul seed, or seed that contains a large quantity of weed seed upon our fields. We are sowing it every year, and what is worse, we cannot always help

ourselves.

Prof. Buckman, late of the Royal Ag ricultural College, after the most careful investigation, found that in a pint of ordinary clover seed, there were no less than 7000 seeds of weeds. In a pint of common grass seed, such as is generally bought at the stores, there were 12,600 weed seeds. In a pint of broad-leaved clover, there were 39, gave 25,560, and another that protects, clover gave 25,560, and another the enormous lover tity of 70,400 foul weed seeds.

tity of 70,400 foul weed seeds.

The number of these vile seeds to be found in our grass seeds like timothy, redtop, etc., is no doubt incredibly great. Is there any subject more important, therefore, than how to procure pure seed? We have weeds enough without sowing them.—Massachusetts Ploughman.

CLEAN MILKING. -It is sometimes for twelve to one. Hence a person who care-lessly leaves but a half pint of milk undrawn loses in reality about as much cream as would be afforded by six or eight pints at the beginning; and loses too that part of the cream which gives the richness and flavor to the butter.

KILL THE CATERPILLARS.—We have KILL THE CATERPILLARS.—We have several communications urging upon those who own trees to devote a little time now to the destruction of caterpillar nests, which unusually numerous this season. One gentleman, who has no trees of his own, went into his neighbor's garden, and estimates that he killed 10,000 of these mischievous insects, in an hour's time, and in so doing probably saved his friend his fruit crop next fall. An hour spent now in destroying these pests is of more value than ten hours will be a few weeks hence, and we hope a war of extermination will everywhere be waged extermination will everywhere be waged against them.—Boston Journal.

As DULL AS A HOE .- Why should the hoe be made the whipping post for so many bluntledged soythes, axes, knives, and other tools? As dull as a hoe! Many a farmer works the year through with a hoe whose edge is thicker than an old-fashioned copper, when a few minutes turning of the grindstone would put it in good working or der. A sharp hoe saves time and strength, and does one's work better than a dull one. and does one swork better than a dust one.

No farmer will mow ordinarily longer than a day, without grinding his scythe, why not always keep an edge also upon the hoe?—

American Agriculturist. On Tuesday, the 18th day of April, 1865

TERMS-PER SESSION OF ELEVEN WEEKS:

Bedford, Pa., April 7th.:3t

NEW GOODS

JUST RECEIVED AT MRS. STEWART'S PO CALL AND SEE THEM.

OF THE Bedford County Mutual Oil Company.

Capital Stock...... Par Value of Shares... No Favoritism, Every Subscriber on the Ground Floor.

2. A lease of one hair act, in close proximity to e above, known as "No. 6," on the Tenney and orrow purchase on Cherry Run. New derrick ected upon the lot. One half the oil to the com-

ar Creek, of two acres of ground; five-eighths o at Seven acres in lee simple on the waters of titchey Run, one mile from its junction with the tillegheny, about the same distance from the Fox and Widel well, owned by the "Stump Island Oil Jompany." All flat, boreable territory, at present inder cultivation, with a good frame house upon

5. Three acres in fee simple on the Alleghen river, just below the mouth of the Clarion river There is room on this tract for a half dozen wells The "Allegheny and Clarion River Oil Compa-ny," of Philadelphia, are now sinking several wells

The "Allegheny and Clarion River Oil Company," of Philadelphia, are now sinking several wells immediately opposite this property, with excellent prospects of success.

In presenting the above basis to the public, it is confidently believed that it cannot be excelled by that of any other company yet organized. The two leases on Cherry Run are themselves worth more than the territories of many companies which profess to be based upon a million capital. The Cherry Run region has proved to be the surest oil-producing territory yet discovered. Ninetenths of the wells bored on this stream have been successful. The great "Reed" well, flowing 375 barrels per day, the "Mountain" well flowing 400, and in fact nearly all of the large wells yet struck, are located on Cherry Run.

It is proposed to sell a sufficient number of shares to pay for the territory and to raise working capital for its development, at the low price of tecenty-five cents per share, thus placing every subscriber to this fund on the ground-flour, and giving each subscriber a pro rata interest in the territory, engines, and other property of the company, as well as the shares of stock remaining unsold after the purchase money and working capital are vasied "From the neutre of the leases horing unsold after the purchase money and working capital are vasied."

after the purchase money and working capital are raised. From the nature of the leases boring up-on them must be commenced within sixty days from the 20th of April, 1865, which is a sufficient uaranty that the company will proceed withou lelay to the development of its territory. The following named persons are authorized to eceive subscriptions to this valuable stock.

J. W. BARNDOLLAR.

LAOUTZ'S CELEBRATED

Horse and Cattle Powders. These Powders have proved, after a trial of several years, to be superior to any preparation of the kind in use. The chief superiority of these powders arises from the fact that they erecomposed of medicines that have Luxative, Tonic and Purifying properties. The laxative ejects crudities from the stomach and intestines, the tonic gives strength to the system of the Horse, and the purifying medicines contained in them cleanse the blood, and lay the foundation for a vigorous land healthy circulation. The use of them improves the wind, strengthens the appetite and gives the horsea, fine, smooth and glossy skin—thus improving the appearance, vigor and spirit of this noble animal. These powders are not intended, as most powders are to bloat the animal, so as to give him the appearance of being fat when not really so—but to remove the disease and promote his general health.

oring them to a healthy state. They are a sureprevention of Lung Fever, and a certain remedy all diseases incident to the Horse, as Ghinders, Yellow Water, Distempers, Founder, Heaves, Slavering, Coughs, Fevers Loss of Appetite and Vital Energy, &c.—These powders, if used two or three times a week, through the winter and spring, your horses will never get the Lung Fever Corie or Botts. A few doses of these powders will remove the worst cough, on any horse. Were owners of horses to feed a few of these powders every year, they might save the lives of many valuable

### MILCH COWS.

The properties this powder possesses in increasing the quantity of milk in cows, gives it an importance and value which should place it in the hands of every person keeping a cow. In fatten-ing cattle, it gives them an appetite, loosens their hide, and makes them thrive much faster,

In all diseases of swine, as coughs, where in the lungs and liver, &c., by putting from half a paper to a paper of these flowders in a barrel of swill, the above diseases can be cured or entirely prevented.

By using these powders the hog cholera can be prevented.

CLEAN MILKING.—It is sometimes forgotten that the last gill of milk drawn from the cow's udder is the best part of every milking. Careful experiments made in England show, (according to a report lately published) that the quality of cream obtained from the last cup taken from most cows exceeds that of the first in proportion of twelve to one. Hence a person who care-

The property of the above named company, which is about being organized under the mining laws of Pennsylvania, consists of the following valuable territory, to wit:

1. A lease of one-haif acre, known as "No. 3," on the Tenney and Storrow purchase, on Cherry Run, Venango county, Pa., just above the celebrated "Reed" well and within a stone's throw of a well just struck, flowing at present 100 barrels per day. A new derrick erected upon the lot. One half the oil to the company.

3. The refusal for sixty days, of a lease on Su

Valuable Real Estate. There will be sold, on SATURDAY, May 6th

TWO STORY LOG HOUSE, well finished, New Bank Barn, with wagon shed attached, Stone Spring House, with a Spring of never failing water near the house, good Tenant House and Stable, Dry House, and other outbuildings. It is conceded that there is the best selection of Fruit on this property of any in the county, consisting f Apples, Pears, Peaches, Cherries and Plums. There is also a fine Mill Site on this property, which makes it still more valuable.

There is about 200 acres cleared and under good.
