MAKING HAY.

Mr. KIRBY.—Clover hay cut at the period of inflorescence, and thoroughly made, has been found by repeated experiments, to lose about four-fifths of its weight in "making."

To meet the popular demand for lower prices, we are now selling many of the daily wants of the people at a hundred per cent lower.

Now, clover is cut as soon as the dew is off, allowed to remain in the sward undisturbed by the fork or rake till toward night, when if the weather is clear or not, it is carefully turned, in order that a new surface may be exposed to the night dews, and the next afternoon pitched into "grass cocks,"

Each weighing about eighty pounds, in which condition it is suffered to remain until sufficiently dry to go into mow. Hay made in this way, possesses the deep, rich green of the natural plant before being cut, and that sweet aromatic odor so grateful to every person capable of "appreciating sweet smells."

All kinds of grass made in this way, is unquestionably much improved in quality; it also loses less by many pounds in a hundred, while the expense is diminished nearly or quite one-fifth. As hay made in "grass cock" is necessarily required to remain more days in the field than where the old plan of sun-drying is practiced, the provision of a number of "cocks" should be attended to, before commencing. These are cheap, and are made of the size of ordinary bed-sheets, say two yards square, commonly of cheapest muslin. They are provided with loops at the corners through which, when the cocks are placed in position, long pins are inserted, extending upward into the hay to prevent their displacement by the wind. They are cheap, and with care will last an age. Here in New England and in many parts of New York they are used extensively and much liked.

TRAINING SQUASHES.

Squashes do best on new land. All the summer varieties have a hard shell when matured. The crook-necks, and the white and yellow summer scalloped, are the usual varieties grown. Different varieties should be planted far apart, as they mix very easily. Two or three plants are enough for a hill. The best protection from the bug is the box, covered with gauze or glass. Squashes occupy a great deal of ground when suffered to run and have their own way. When a small bushy variety is desired, it is more economical, a trellis for them to run upon is recommended, and is said to operate very successfully. Stakes or small posts are set up two feet apart each way and the seed planted in the center. When the vines begin to run they are trained upon sails nailed to the posts, and by throwing boards across the sails the fruit is supported, and will ripen much earlier than when allowed to lie on the ground half covered with leaves. Squashes trained in this way can be made to occupy but little space, and are said to bear as profusely as when the vines run over the ground. To those who have but little room the plan is well worth trying. For late varieties, the best are the Hubbard, Boston Marrow, Acorn, and vegetable Marrow. The Valparaiso is a tolerably fair variety when the season is just right. Immense squashes, sometimes grown, are rather for the sight than the table. They are coarse-meat, and watery, compared with the little curly Hubbard, which is meaty and as delicately flavored as the sweet potato. As squashes are great runners, they do better with their ends clipped off.—Utica Herald.

GREAT SUCCESS OF BEDFORD COUNTY MUTUAL OIL COMPANY.

Over 50,000 Shares Already Sold. Capital Stock \$150,000. Par Value of Shares \$100,000.

No Favoritism. Every Subscriber on the Ground Floor.

The property of the above named company, which is about being organized under the mining laws of Pennsylvania, consists of the following valuable territory:

1. A lease of one-half acre, known as "No. 3," on the Tenney and Storow purchase, on Cherry Run, Venango county, Pa., just above the celebrated "Reed" well and within a stone's throw of a well just struck, flowing at present 100 barrels per day. A new derrick erected upon the lot. One half the oil to the company.

2. A lease of one-half acre, in close proximity to the above, known as "No. 6," on the Tenney and Storow purchase on Cherry Run. New derrick erected upon the lot. One half the oil to the company.

3. The refusal for sixty days, of a lease on Sugar Run, of two acres of ground, five-eighths of the oil to the company.

4. Seven acres in fee simple on the waters of Ritchey Run, one mile from its junction with the Allegheny, about the same distance from the Fox and Widell well, owned by the "Stamp Island Oil Company." All flat, boreable territory, at present under cultivation, with a good frame house upon it.

5. Three acres in fee simple on the Allegheny river, just below the mouth of the Clarion river. There is room on this tract for a half dozen wells. The Allegheny and Clarion River Oil Company, of Philadelphia, are now sinking several wells immediately opposite this property, with excellent prospects of success.

In presenting the above basis to the public, it is confidently believed that it cannot be exceeded by any other company yet organized. The two leases on Cherry Run are themselves worth more than the territories of many companies which profess to be based upon a million capital. The Cherry Run region has proved to be the richest oil-producing territory yet discovered. Nineteen of the wells bored on this stream have been successful. The great "Reed" well, flowing 370 barrels per day, the "Mountain" well, flowing 270 barrels per day, and in fact nearly all of the large wells yet struck, are located on Cherry Run.

It is proposed to sell a sufficient number of shares to pay for the territory and to raise working capital for its development, at the low price of twenty-five cents per share, thus placing every subscriber to the fund on the ground-floor, and giving each subscriber a pro rata interest in the territory, engines, and other property of the company, as well as the share of stock remaining unsold after the purchase money and working capital are raised. From the nature of the lease being offered, no time must be commenced within sixty days of the date of the purchase of the shares, and a sufficient guaranty that the company will proceed without delay to the development of its territory.

The following named persons have been elected officers of the company. President—J. B. FARQUHAR. Secretary and Treasurer—JACOB REED.

DIRECTORS: Wm. Masters, B. F. Meyers, J. T. Smith, F. D. Shoemaker, J. H. Schell, H. M. Beagle.

Persons desiring to secure Stock in this Company will please call immediately on any one of the above officers.
