Every intelligent farmer who is located or a heavy soil, that is apt to plow up lumpy, understands the importance of plowing i when it is just moist enough to turn up mellow. Buckwheat can not be expected to vegetate in time, and flourish luxuriantly, and yield a renumerating crop, when the soil is a mass of dry lumps. - American Ag

But if the soil be plowed in the spring, it

is to be plowed the second time, but will be

moist and mellow; and the grain will vege-

will not become dry and hard by the time it

MANURING CORN AFTER IT IS UP. Circumstances sometimes render it impossible to thoroughly prepare corn ground be fore planting, and it is often advantageous to manure after it is up. This must be done at the time of the first hoeing. Along the seaboard where the Moss-bunkers or Men haden are taken in such great numbers, they are much used. A shallow furrow is made with a small plow, on each side of every row, a few inches from the hills, turning the earth away frem the row; then one fish is placed in the furrow on each side of every hill. Should the furrows be too shallow in some places, the earth is worked out a little with the foot or hand-hoe, so that the fish may be placed below the surface of the soil. Then the earth is turned toward the hills, and the corn hoed. If the fish should b displaced, the workmen bury them again close to the hill. By the time of the second hoeing, they will be pretty thoroughly decomposed, Where there is not an excess of water in the soil, this kind of manure produces a very luxuriant and rapid growth, as well as good yield. A similar method is sometimes practiced with barn-vard manure. the earth being turned from the rows as previously directed, a small shovelful of ma- "LIVE AND LET LIVE," nure is placed on each side of every hill and covered. The manner of distributing this Sell as Cheap as any other Man. kind of manure is, to drive a loaded wagon astride of one row, so that two hands can each apply the manure to two or three rows on each side. When turning a wagon around over the young corn, if a wheel is liable to run directly on a hill place short pieces of run directly on a hill place short pieces of plank or rails on each side of it, which will lift the wagon over without injuring the lift the wagon over without injuring the corn, Lime, gypsum, ashes, guano, hen manure, or any other similar materials may often be very profitably applied, at the first hoeing. They should always be sprinkled over an area of several inches in diameter, all around the hill, and covered and mingled with the earth in hoeing. Guano, or strong hen manure, if applied in this manner, will never work injury to the young plants, unless they come in direct contact with them, or an inordinate quantity be used. - American Agriculturist.

THINNING CORN IN THE HILLS.

Thinning should always be done as soon as practicable after the corn has come up. This is usually done at the first boeing, but should be delayed till danger from the grub, or cut-worm, is over. Unless careful laborers are employed, many hills will be neglec ted. Superfluous stalks may be removed at any convenient time, even in lowery weather, when the soil is too wet to be worked with cultivators or hoes. The best manner of doing this is to cut them off close to the ground, with a sharp knife, and drop them near the stand corn. The stalks should be removed from the middle of the hill, that the remaining plants may stand as far from each other as possible; the farther they stand apart the larger the ears will grow.—When the stalks are pulled up, they will often loosen and break the roots of those that are left, but, if cut off as directed, the roots soon die. If care be not exercised in dropping only a proper number of kernels in a hill, much labor will be required to thin out a large field. Still it is better to do so than to allow five or six stalks to grow where there should be only three, or at most four. There will be more and better grain on four stalks than on a large number.—American Agriculturist.

May 19, 1865-4t.

NOTICE IN PARTITION.—By virtue of a twit of partition or valuation issued out of the Orphans' Court of Bedford county, and directed to me as Sheriff of said county, I will proceed to value and apprais the real estate of Samuel Carper, late of Middle Woodberry township, Bedford county, Jesush S. Elder, and others, alo, one other tract of land in glands of Christian Hoffman, Abraham Keagy, Josiah S. Elder, and others, alo, one other tract of land encetaining lands of Jacob Hipple, Jacob Zigler and others, on TUESDAY, the lith day of July A. D. 1885, at 1 o'clock p. m., when and where all parties may attend if they think proper. The heirs of said Samuel Carper are: I. John Carper, of Bureau county, Illinois; 6. Christopher Carper, 3. Jacob Carper, 4. Polly, wife of John Berkstresser; 10. Catharine, wife of Daniel Frederick, the last two of Bureau county, Illinois; 9. Elizabeth, wife of John Berkstresser; 10. Catharine, wife of Middle Woodberry township, Bedford county, Penn'as, John Aldostanie, and, 11. Margaret, wife of Jacob Smith, of Middle Woo ted. Superfluous stalks may be removed at ground, with a sharp knife, and drop them stalks than on a large number.—American

The above real estate will be sold at such prices as to insure safe and profitable investments.

Notes or obligations of any kind that are good will be taken in exchange—particularly good

DOUTZ'S CELEBRATED

Horse and Cattle Powders.

These Powders have proved, after a trial of sev renal years, to be superior to any preparation of the kind in use. The chief superiority of these powders arises from the fact that they are compos-ed of medicines that have Laxative, Tonic and Purifying properties. The laxative ejects crudi-ties from the stomach and intestines, the tonic gives strength to the system of the Horse, and the puri-fying medicines contained in them cleanse the ring medicines contained in them cleanse ying medicines contained in them cleanse the lood, and lay the foundation for a vigorous and ealthy circulation. The use of them improves the rind, strengthens the appetite and gives the horse a ne, smooth and glossy skin—thus improving the ppearance, vigor and spirit of this noble animal. These powders are not intended, as most powers are to bloat the animal, so as to give him the preservance of heing far when not really so, but pearance of being fat when not really so—but remove the disease and promote his general

ing them to a healthy state. They are a surepre bring them to a healthy state. They are a sureprevention of Lung Fever, and a certain remedy all diseases incident to the Horse, as Glanders, Yellow Water, Distempers, Founder, Heaves, Slavering, Conghs, Fevers Loss of Appetite and Vital Energy, &c.—These powders, if used two or three times a week, through the winter and spring, your horses will never get the Lung Fever Corie or Botts. A few doses of these powders will remove the worst cough, on any horse. Were owners of horses to feed a few of these powders every year, they might save the lives of many valuable horses.

MILCH COWS. The properties this powder possesses in increas-ing the quantity of milk in cows, gives it an im-ortance and value which should place it in the ands of every person keeping a cow. In fatten-

ing cattle, it gives them an appetite, loosens their ide, and makes them thrive much faster, HOGS. In all diseases of swine, as coughs, ulcers in the lungs and liver, &c., by putting from half a paper to a paper of these powders in a barrel of swill, the above diseases can be cured or entirely prevented. By using these powders the hog cholera can be prevented.

These works will be printed on a greatly improved quality of paper, and while nearly all American Periodicals are either advanced in price or reduced in size—and very generally both, we shall coatinue to give faithful copies of all the matter-contained in the original editions. Hence, our present prices will be found as cheap, for the amount of matter furnished, as those of any of the competing periodicals in the country.

Compared with the cost of the original editions, which at the present premium on gold would be Compared with the cost of the original editions, which at the present premium on gold would be about \$100 a year, our prices (\$15) areexceedingly low. Add to this the fact that we make our annual payments to the British Publishers for early sheets and copyright iff Gold—\$lcosting us at this time nearly \$2.50 in currency—and we trust that in the scale we have adopted we shall be entirely justified by our subscribers and the reading public.

ublic.

The interest of these Periodicals to American enders is rather increased than diminished by the rticles they contain on ourgreat Civil War, and hough sometimes tinged with prejudice they may be a contained the containe hough sometimes targed with prejudice they may till, considering their great ability and the different stand-points from which they arewritten, be read and studied with advantage by the people of this country of every creed and party.

LEONARD SCOTT & CO., Publishers, No. 38 Walker Street, New York.

THE BARGAIN STORE

Have just received a very large and beautiful stock of New and Cheap Goods,

STILL AHEAD!

The property of the above named company, which is about being organized under the mining laws of Pennsylvania, consists of the following valuable territory, to wit:

1. A lease of one-half acre, known as "No. 3," on the Tenney and Storrow purchase, on Cherry Run, Venango county, Pa., just above the celebrated "Reed" well and within a stone's throw of a well just struck, flowing at present 100 barrels per day. A new derrick erected upon the lot. One half the oil to the company.

2. A lease of one-half acre, in close proximity to the above, known as "No. 6," on the Tenney and Storrow purchase on Cherry Run. New derrick erected upon the lot. One half the oil to the company. To meet the popular demand for lower prices, we are now selling many of the daily wants of the ells lower than we do will soon learn the road to the Poor House; but we have made up our mind, that if we have to bust up! to get all the money we can, and to owe a million of dollars, is better

DRESS GOODS.

arcted upon the lot. One than the one to the company.

3. The refusal for sixty days, of a lease on Sugar Creek, of two acres of ground; five-sighths of the oil to the company.

4. Seven acres in fee simple on the waters of Ritchey Run, one mile from its junction with the Allegheny, about the same distance from the Fox and Widel well, owned by the "Stump Island Oil Company." Allflat, boreable territory, at present under cultivation, with a good frame house upon it. Black Silks, Alpaoas, Bombazines, Mohairs, Reps. Poplins, Sheperd Plaids, Delaines, Challies, Brilliants, Lawns, Prints, Cambrics, Jacourts. Shirt lins, in all widths, from 121 cts. up. White, Sear. let, Solfirena, Grey and Check Shirting Flannels, 5. Three acres in fee simple on the Allegheny river, just below the mouth of the Clarion river. There is room on this tract for a half dozen wells. The "Allegheny and Clarion River Oil Company," of Philadelphia, are now sinking several wells. Ginghams from 25 cts up. Denims Bed Tickings, Shirting Stripes and Cottonades from 20 cts up Table Diapes, Linen Ducks, Drillings and Checks The "Allegheny and Clarion River Oil Company," of Philadelphia, are now sinking several wells immediately opposite this property, with excellent prospects of success.

In presenting the above basis to the public, it is confidently believed that it cannot be excelled by that of any other company yet organized. The two leases on Cherry Run are themselves worth more than the territories of many companies which profess to be based upon a million capital. The Cherry Run region has proved to be the surest oil-producing territory yet discovered. Nine-tenths of the wells bored on this stream have been successful. The great "Reed" well, flowing 375 barcels per day, the "Mountain" well flowing 490, and in fact nearly all of the large wells yet struck, are located on Cherry Run.

It is proposed to sell a sufficient number of shares to pay for the territory and to raise working capital for its development, at the low price of the tenty-flee cents per share, thus placing every subscriber to this jund on the ground-flour, and giving each subscriber a pro rata interest in the territory, engines, and other property of the company, as well as the shares of stock remaining unsold after the purchase money and working capital are raised. From the nature of the leases boring upon them must be commenced within sixty days from the 20th of April, 1865, which is a sufficient guaranty that the company will proceed without delay to the development of its territory. Cloths, Cassimeres, Satinets, Tweeds and Jeans. Superior Wool Ingrain Carpets and Floor Gil
