Pumpkins .- As soon as the vines are done growing, and before hard frosts gather them beneath open sheds, or in heaps, where they may be covered with boards. Feed the green and halfr ipe ones first. Store the best one in a dry, cool place for winter. Never break off the stems, or they soon begin to decay. Save the seed of none but the best.

Swine. - Look up a good brood sow for rais ing pigs next year. Better pay \$50 for a good breeder than \$20 for a sow that will not bear over 3 or 5 pigs. Prolificness is one of the excellencies of a breeding sow. Better fatten every hog now on hand, if the breed is not first-rate, and begin anew with a breed that will fatten more readily.

Timber .- There is no better month in all the year than October to cut timber, to insure durability, especially for fences of all kinds, Rails and stakes, out and split this month, will last longer than if cut and split in winter, spring, or summer. The wood is well matured, and the timber becomes thoroughly seasoned before hot weather, which often cracks the surface, allowing rain to enter.

Weeds.-Mowing, pulling, plowing and hoeing weeds will be in order every leisure hour till'winter. Gather them all in large heaps when they are wet, so that the seed will not shell out. Better devote one day this fall to pulling rag weed, wild mustard, and other weeds in corn-fields than to spend a week next season exterminating those that spring from the seed now growing. It is very common for weeds to bring forth ten thsusand fold, If thrown in a large pile before the seed becomes hard, all will decay and make good manure.

Rue. - In many places it is not too late to sow this grain, where the ground is wet. If the soil is apt to heave in winter, better not put in winter rye, but prepare for spring rye.

Sheep .- In some parts of the country; bucks and ewes may be turned together in October. Where the spring is always backward, and there are cold storms of rain and snow, better keep them separate a month longer. The period of gestation with ewes is about five nonths. It is not good policy to have lambs dropped until there is some grass and warm, settled weather. Make necessary preparation for improvements in sheep next season.-American Agriculturist.

## WORK IN THE ORCHARD.

Insects. - After the leaves have fallen, clusters of eggs and cocoons may be discovered and removed. Examine t.ees received from the nurseries, near the root and if any borer holes are found, crush in the insects with a wire, and if the bark has the scale insect upon it, wash it with strong soft soap water, or be ter, discard the tree altogether.

Labels .- Do not trust to labels alone, bu have a map or record of the position of every tree; still labels are a great convenience, es pecially upon young trees, before one gets sufficiently acquainted with them to tell the variety at sight. See that all are plain, and be sure that the wires by which they are suspended are sufficiently loose.

Manure. - It is unreasonable to expect to be able to carry off a crop year after year without returning something to the land. Manuring bearing trees pays, not only in larger crops of fruit, but in the finer development of the individual specimens. The best method of applying manure is given in the article "Is Pear Culture Profitable?"

Trees. - These, except evergreens, may be planted, as soon as the leaves drop. The more carefully it is done, the better will be the future growth. - American Agriculturist.

# FACTS ABOUT MILK.

Cream cannot rise through a great depth of milk. If, therefore, milk is desired to retain its cream for a time, it should be put into a deep, narrow dish; and if it be desired to free it most completely of cream, it should be put into a broad shallow dish, not much exceeding one inch in depth. The evolving of crean is facilitated by a rise and retarded by a fall of temperature. At the usual temperature of the dairy-50° Fahrenheit-all the cream will probably rise in 36 hours; but at 79° it will probably rise in half that time, and when the milk is kept near the freezing point, the cream will rise very slowly, because it becomes sol idified. In wet and cold weather milk is less rich than in dry and warm. The season has its effects. The milk in the Spring is supposed to be the best for drinking, and hence it would be best for calves: in summer, it is best suited for cheese; and in autumn, the butter keeping better than that of summer, the cows less frequently more butter. The morning's milk is much richer than that of the evening. The last drawn milk, the "strip pings" at each milking, and at all times and ons, is richer than that first "milked," which is ever the poorest .- N. H. Journal of

#### THE ROAD TO POOR FARMING. 1. Invest all your capital in land, and run

in debt for more.

2. Hire money to stock your farm. 3. Have no faith in your own business; and be always ready to sell out.

4. Buy mean cows, spavined horses, poor oxen and cheap tools.

6. Feed poor hay and mouldy cornstalks

exclusively, in order to keep your stock tame; fiery cattle are terribly hard on old, rickety wagons and plows.

6. Use the old hickory freely whenever your oxen need strength; it is cheaper than hay or meal, and keeps the hair lively, and pounds out all the grub.

7. Select such calves for stock as the butchers shun—beauties of runts, thin in the

butchers shun—beauties of runts, thin in the hams, and pot-bellied; but be sure and keep their blood thin by scanty herbage; animals are safest to breed from that haven't strength 8. Be cautious about munufacturing man-re; it makes the fields look black and mourn

ful about planting time; besides it is a deal of work to haul it. 9. Never waste time by setting out fruit and shade trees; fruit and leaves rotting a-round a place makes it unhealthy.

REMEDY FOR SORREL.

A correspondent of the New York Farmers' Club, writing from Wisconsin asks: What is the best method of ridding the soil of sour grass, vinegar plant, or sorrel, as it is called by those names—there are many farmers troubled with it, and agreat many ways and plans, have been tried.

To which Solomon Robinson replies: Have you tried dressing the land with caustic lime, at the rate of thirty bushels of the powdered lime, freshly slackened, to the acre, spread upon the surface with wheat seed, and harrowed in the same time? Have you tried wood ashes, a pint upon each hill of corn or potatoes? Have you tried deep fall plowing, so asto turn up some of the strong clay of the subsoil, and letting that pulverize in winter, and then seeding it to timothy and clover in the spring? Afterward, top-dress the grass every autumn with manure free from sorrel seed or dress it with lime, ashes, or finely powdered clay—the debris of an old brick yard is good—and if some of these remedies won't cure your land, you may as well emigrate.

For Blackwood and three of the Reviews 13.00 "
For Blackwood and the four Reviews.... 15.00 "
These works will be printed on a greatly improved quality of paper, and while nearly all American Periodicals are either advanced in price or reduced in size—and very generally both, we shall coatinue to give faithful copies of all the matter contained in the original editions. Hence, our present prices will be found as cheap, for the amount of matter furnished, as those of any of the competing periodicals in the country.

Compared with the cost of the original editions, which at the present premium on gold would be about \$100 a year, our prices (\$15) are exceedingly low. Add to this the fact that we make our annual payments to the British Publishers for early

nual payments to the British Publishers for early sheets and copyright in Gold—Sloosting us at this time nearly \$2.50 in currency—and we trus that in the scale we have adopted we shall be enti-rely justified by our subscribers and the reading public.

public.

The interest of these Periodicals to American readers is rather increased than diminished by the articles they contain on ourgreat Civil War, and though sometimes tinged with prejudice they may still, considering their great ability and the different stand-points from which they arewritten, be read and studied with advantage by the people of this country of every creed and party.
