OIL INTELLIGENCE. -INTERESTING DEVELOP MENTS UPON THE BORDER FARM. -OIL IN GREAT QUANTITIES FOUND .- Hererofore, everything that the copy was correct, but we have since in this region has been going on in anything but a business manner, but within the past few published was a copy of the original bill read | days several engines have been but upon the in place instead of the one passed by the ground and already two have been set at Legislature. We have made the correction work. These are upon the famous Border and present it now in a corrected form to farm. This farm contains two hundred and forty acres and has been purchased by a com-

There are now five successful wells upon this property one of which is doing wonders. The well in question is the Ohio Salt Creek Co, well. Their engine was set to work last Friday. It may sound rather like a "fish story," but the yieldhas been sixty barrels of heavy petroleum in every four hours. At well is three hundred and sixty barrels every barrel. Therefore the institution is worth seven thousand two hundred dollars per day, two hundred and sixteen thousand dollars ninety two thousand dollars per year.

Now who does not like the look of such igures and who would object to a personal nd practical demonstration of something like this? Certaiuly it must be a solid comfort, for the share holders to watch the movements of this magnificent well, and I am sure it is enough to give a spectator either the blues, or the "fever."

All the rest of the wells in this region may be as good as the one belonging to the Ohio Salt Creek Co., if an engine could only be set at work upon them. The O.S. C. Co., have made another strike, in a well across the creek from the one now in operation. It will be pumped immediately, and thoroughly such licenses with two or more horses and tested. The show is good, and they are exwagons the sum of one hundred dollars. Pro- pecting a rich yield from it. The company owning this Border Farm are stocking it at cense shall be entitled to the sum of three one hundred and twenty thousand dollars, which are as reasonable terms as one could shall be paid by the applicant at the time of ask for on such property. Already half the shares (one hundred dollars each) are taken That nothing herein contained shall prevent up, and this, before the company is organized merchants or store-keepers from disposing and incorporated. Books will be opened in Zanesville, giving any person in this section of country a choice chance for a sure invest nent .- Zanesville Courier.

The above is a very wild statement and hits wide of the mark, but we have the assurance of the most reliable parties that those wells are yielding spiendidly. The income to the owners will be very handsome. There appears to be great excitenent now among the Ohioans on the subject who have hereto fore hooted at the idea that oil was there in paying quantities. Our Woodberry friends will all become millionaires we are afraid. If they have any spare shares we hope they will send them up this way.

SOLICITORS.

Theodore Cuyler, Esq., Robert D. Coxe, Esq. Americans are proverbial for the avidity and commendable zeal with which they participate in enterprises having for their object the development of our national resources. At one time "Railroads"—at another "Coal"—then "Copper" or "Iron" and more recently "Oil" have been the all-absorbing topics.

In all these several enterprises, as will be recollected, those who first took hold of them made money; some larger amounts than ethers, according to their investments.

Mining operations in the fields of Colorado and elsewhere now mainly engross the public attention. Considering that several such companies have been already organized—they are now at work—that the reports from their mines are highly favorable—that it is known that at the present time there are on the way from the ledges of Nevada and Colorado numerous "bars of silver" and "bricks of gold," it is believed that the enthusiasm already manifested on the subject will, in a little time, be so greatly increased on the recent and exhibit of these "returns," that innumerable companies will spring up, whose stock, being based at the then greatly inflated prices of ledges, will necessarily be less desirable than that now to be had—thereby giving to those who avail them selves of the occasion now presented, of securing "original interests;" an opportunity of then disposing of the large amount of stock each holder receives, at a handsome advance.

With these preliminary remarks the following

posing of the large amount of stock each holder receives, at a handsome advance.

I speak from the united testimony of many practical miners who have spent many years in the mines of California, when I say:—that the gold-bearing region of Colorado is far more extensive, quite as inexhaustible, and the gold-bearing quartz of a much richer quality than in California."

Professor Edward N. Kent, of the New York Assay Office, says:

"As to the extent of the gold mines of Colorado."

As to the extent of the gold mines of Coorado, I am not prepared to give an estimate, as I found enough to fully employ my time within a radius of five miles of Central City, [the location of the above Ledges,] but as to the richness of THEM, I have no hesitation in saying, that I believe them to be the richest ever discovered. With deience, capital and the Pacific Railroad, Coloraso is destined in my opinion, to rival or supersede so is destined in my opinion, to rival or supersede California and Australia, and become the El Do-

rado of the World." do of the World."

The opinion entertained by those abroad of aims in this district, is shown by the following

An idea of the value of some claims (100 feet each) may be formed when the fact is considered that often occurs that they yield millions of dollars, and have in several inetances been sold for \$25,000 per foot. Mr. Fields, from 33\frac{2}{7} feet of the Bobtail Lode has taken out already over \$200,000 in gold, and \$266,000 has been offered and refused for 34\frac{1}{7} feet of this same lode, equal to \$800,000 for a claim of one hundred feet.

As the purchase of either of the above lodes would require more money than the majority of persons have at command, it has been determined to consolidate them, and to divide them into

The space of a circular is too limited to give the opinions of numerous distinguished citizens and men of science who have examined this district; the following extracts relate thereto, and that of Professor Edward N. Kent in particular,

terest in this region of "practically inexhaustible" wealth.

As all are aware, the usual plan adopted for the development of such a property is to form a company and issue certificates of stock. The plan here proposed may be considered preliminary to the formation of two or more Companies on these properties which are subject to no royalty, lease or mortgages.

The SUSSCREERS can then upon this solid and substantial basis, elect officers from among themselves, each subscriber being eligible to the position of an officer of the Company.

In order that handsome returns may be speedily realized, these subscriptions are based upon the proposition that the subscribers immediately en receipt of the Deeds (now ready for delivery, and which may be examined at the office of the undersigned before subscribing,) may lease their lands on heavy royalties, or at once organize Companies in the usual way for which there is an ample basis.

To accommodate those of moderate means these "interests" are put at \$100 each, in order to get the list filled at once, and to prevent any delay in the organization of the Company.

Considering the numerous valuable "Ledges" which constitute the basis of this enterprise—the fair and equitable features—the low prices at which "interests" in it are oldered, and that each

The older one has a white spot on the forehead. The owner will come forward and comply with the law of stock in all the Companies that may be organized upon them—also recollecting that in all, there are only 1000 interests to be sold, and it would only require one hundred gentlemen each to take ten (\$1000) to absorb the whoic, it is presumed that it is hardly necessary to suggest to those desting to secure one or more of these original interests, to at once send in their subscriptions.
