Farm, Garden & Household.

FLAVOR OF FRUIT IMPROVED BY PRUNING.

An article in the *Journal of Horticulture*, has the following very judicious remarks on the propriety of thinning fruit:

The flavor of fruit, barring extreme sunless seasons, is entirely under the control of the gardener. A clever man can command flavor; a dull man, when he finds his fruit flavorless, makes idle excuses, which should never be listened to. If a tree trained to a wall be allowed to ripen, say ten dozen of fruit, when five or six dozen only should have been left, they, although they may be of a fair size and color, suffer in flavor to an extent scarcely credible.

How often has the gardener had occasion to complain of his pears not being good, although produced on fine trees trained against walls. He complains of the season; but it is in most cases owing to the trees being allowed to bear just double the number they ought to have done.

The following ought to be inscribed on every wall, and in every fruit and orchard house.

By thinning you make indifferent fruit good. By crowding you make good fruit bad. If very fine and high-flavored fruit be wished for a tree capable of bearing three dozen of medium sized peaches should be allowed to bear only twelve or fifteen. This thinning is terrible work for the amateur. It is like drawing a tooth, and every fruit that falls to the ground creates a pang; but it must be done. A small, sharp pen-knife is the best instrument to employ, and is much better than tearing off the fruit with the finger and thumb. A well formed peach or nectarine tree, be it bush or pyramid, with its fruit properly thinned and nearly ripe, is one of the most beautiful articles the skill of the cultivator can produce.

Let any one who is raising fruit try the experiment this season, by thinning the fruit on a single tree of apple, peaches, pears, plums, &c., where the fruit is too abundant, and he will next year treat all his trees in the same way.

A FEW HINTS.

Tomatoes, unless already done, can now be set out with tolerable safety. Should cool nights, likely to bring frost, come, the plants should be covered with old paper, boxes or flower pots. Little is gained by early transplanting. A single night may retard the grown for two weeks, and put them behind those set out a week or ten days later.

Egg plants do generally better by not being set out before the first of June. If the season is very favorable the last week in May can be ventured on. There is no plant so sensitive of cool nights as this. As soon as the weather becomes hot, both the Egg and the Tomato plants should be mulched.

The Yellow Radish for summer use can now be planted. This variety seems to do better than any other for the very warm weather.

Now is the time to destroy the steel-colored bug on the young grape buds. The surest way is to go over the vines every morning for a week or ten days and pinch them to death. They can now be easily seen. One must be expert in catching them, as sometimes they fly, but generally leap away if the branch is shaken. They eat, in their present form, the fruit buds, destroying them sometimes entirely; while their progeny, in the shape of a small dark worm, feed upon the leaves, and if let alone will in some seasons seriously damage the crop. They select the older vines. We have never seen any upon vines under five years old.

Radishes sown around cantelope hills will protect the young plant from the depredations of the striped bug. The insect prefers the radish leaf to the cantelope.

A good dose of salt helps the product of the Asparagus bed, and at the some time destroys all grass and weeds, otherwise so very troublesome.

Violets should be transplanted in shady places as soon as summer weather sets in.

Flower seeds should now be in the ground. The spring has been so cool up to within a few days that seed was better out of than in the ground.

Evergreen trees, hedges and young fruit trees should be carefully forked around and all grass removed. Trees set out this spring should be well mulched.

Curled Lettuce heads and stands summer weather much better than the Cabbage Lettuce, which is the best for hotbeds and early out door planting.

Okra may be planted from now to the end of the month. Plant in drills, and thin out to about a foot apart. Drills about two and a half feet.

NO FENCES IN GERMANY.—The Secretary of the Ohio Agricultural Society has been travelling in Germany. Speaking of the country near Dresden, he says: "Every foot of the land not in forest is cultivated. There are no fences; the field is plowed up to the roadside, and fruits and flowers are grown by every roadside that I have traveled; no one disturbs them. The cattle, sheep and swine are kept in the stables, or, if taken out, are under the charge of a shepherd or herdsman. Here and there dotted over the landscape, we saw sheep in pasture, but have seen no cattle or swine running about loose. The genus 'loafer' is unknown here."

THE FIRST GRAPE GROWER.—The earliest account of the cultivation of the vine is found in Genesis ix, 20: "And Noah began to be a husbandman and planted a vineyard." We are not informed as to the kind or quality of the grapes he planted, but we have abundant testimony that they make good wine in which the alcoholic element was amply developed, as Noah's own testing of the qualities showed. The country in which Noah resided is supposed to be Armenia, a land still famed for its grapes and wine.

BARLEY.—The *Canadian Farmer* says: "Our last year's crop of barley brought us about five millions of dollars, four-fifths of which found a market in the United States." Now that the reciprocity treaty is termined, a duty of 15 cents per bushel must be paid on all imported. The brewers of Philadelphia, New York, &c., are petitioning Congress to reduce this duty to 5 cents per bushel.

DIARRHEA IN CATTLE.—A correspondent of the *Prairie Farmer*, cures it in this way:—Take half a pail of bran and pour boiling water on it and cover with thick cloth until nearly cool, then strain and give the tea to the afflicted animal. Two or three doses is very sure to cure and can do no hurt.

AN OLD SONG SET TO A NEW TUNE

INCREASE OF RATS.—The *Farmer's Gazette* (English) asserts and proves by figures that one pair of RATS will have a progeny and descendents not less than 651,050 in three years. Now, unless this immense family can be kept down, they would consume more food than would sustain 65,000 human beings.

See "COSTAR'S" advertisement above.

1866.

RATS versus BIRDS.—Whoever engages in shooting small birds is a cruel man; whoever aids in exterminating *rats* is a benefactor. We should like some one to give us the benefit of their experience in driving out these pests. We need something besides dogs, cats, and traps for this business.—*Scientific American, N. Y.*

See "COSTAR'S" advertisement above.

1866.

"COSTARS" RAT EXTERMINATOR is simple, safe, and sure—the most perfect RAT-ification meeting we have ever attended. Every Rat that can get it, properly prepared, will eat it, and every one that eats it will die, generally at some place as distant as possible from where it was taken.—*Lake Shore, Mich. Mirror.*

See "COSTAR'S" advertisement above.

1866.

HOUSEKEEPERS troubled with vermin need be so no longer, if they use "Costar's" Exterminator. We have used it to our satisfaction; and if a box cost $5, we would have it. We have tried poisons, but they effected nothing; but "Costar's article knocks the breath out of Rats, Mice, Roaches, Ants, and Bed-Bugs, quicker than we can write it. It is in great demand all over the country.—*Medina, Ohio, Gazette.*

See "COSTAR'S" advertisement above.

1866.

A VOICE FROM THE FAR WEST.—Speaking of "COSTAR'S" Rat, Roach, Ant, &c., Exterminator—"more grain and provisions are destroyed annually in Grant County by vermin that would pay for tons of this Rat and Insect Killer."—*Lancaster, Wis. Herald.*

1866.

FARMERS AND HOUSEKEEPERS—should recollect that hundreds of dollars' worth of Grain, Provisions, &c., are annually destroyed by Rats, Mice, Ants, and other insects and vermin—all of which can be prevented by a few dollars' worth of "COSTAR'S" Rat, Roach, Ant, &c., Exterminator, bought and used freely.

BEDFORD NURSERIES
BEDFORD, PENN'A.

T. M. LYNCH,

Offers to the public and dealers, a large stock of well grown fruit trees consisting of APPLE TREES 6 to 10 feet high, PEAR, standard and dwarf, PLUM, CHERRY, APRICOT, NECTARINES, QUINCES, GRAPES of all the desirable kinds, CHERRY CURRANT and other fine varieties, GOOSEBERRIES, STRAWBERRIES, RASPBERRIES, BLACKBERRIES, SPANISH CHESTNUT, ENGLISH WALNUT, SHADE AND ORNAMENTAL FLOWERING TREES, Evergreen Trees, Shrubs and Vines in variety, Honeysuckles of all kinds, Hardy perpetual blooming Roses, Flowering Shrubs, Dahlias, Fancy Varieties, Fuchsias, Chrysanthemums, &c.

Upwards of 150,000 trees are now on the grounds thrifty and healthy. Not 1100 acres of trees, as some tree agents would have you believe they have, which is a Humbug. Those intending to plant would better buy trees raised in like soil and climate, and run no risks of distant shipment. I have the same kinds of fruits and as fine trees as can be had at any Nursery.

Catalogues sent free to those applying.

GIRARD
Life Insurance Company,
OF PHILADELPHIA.
Capital and Assets Jan 1, 1865, $2,113,174,20

Mutual Insurance Combined with the Security of a Capital.

The Girard Life Insurance Company was chartered in 1826, and is therefore one of the oldest, as well as most substantial companies in the United States. It effects insurance for the whole of Life; upon the nonforfeitable or ten year plan, or for any term of years. It also issues Endowment Policies.

Premiums may be paid Yearly, Semi-annually or Quarterly.

All the insured for whole of life, (including those on the ten year plan,) *participate in the profits of the company.*

Those insuring never need fear the loss of what they have paid in case they cannot keep up their payments. The company will always commute in to a smaller amount, or purchase the policy at an equitable value.

Bonusses or additions to policies are made every five years, without any increase in the premium.

Its profits are absolute. Its premiums moderate. Its privileges liberal. It has paid many losses, and has never contested a claim.

For books and circulars, free of charge, send to the Home office, No. 408 CHESTNUT St., Phil'a. Or to any of its agents.
