Professor Edward N. Kent, of the New York Assay Office, says: "As to the extent of the gold mines of Colora-do, I am not prepared to give an estimate, as I found enough to fully employ my time within a radius of five miles of Central City, [the location of the above Ledges,] but as to the richness of THEM, I have no hesitation in saying, that I be-lieve them to be the richest ever discovered. With decience, capital and the Pacific Railroad, Colora-so is destined in my oplnion, to rival or supersede California and Australia, and become the El Do-rado of the World." The opinion entertained by those abroad of claims in this district, is shown by the following extract :

extract : English capitalists have purchased ±600,000 of the Colorado mining lands, and their agents and employees are now en route to develop the same. The claims are principally fin Russell and Trail districts, and a recent burchase has been the Sea-ton Lode of 1000 feet for which they paid ±100,-000.

1000. An idea of the value of some claims (100 feet each) may be formed when the fact is considered that offen occurs that they yield millions of dol-lars, and have in several instances been sold for \$25,600 per foot. Mr. Fields, from 33½ feet of the Boltail Lode has taken out already over \$200,000 in gold, and \$266,000 has been offered and refused for 34½ feet of this same lode, equal to \$800,000 for a claim of one hundred feet. As the purchase of either of the above lodes would require more money than the majority of persons have at command, it has been determined to consolidate them, and to divide them into Twelve Hundred and Fifty.
