HINTS ABOUT WORK.

At this time of year, when the stock is chiefly in pasture, and the barns and granaaries are comparatively empty, time should be taken for

A General Clearing Out .- All the buildings should be swept out thoroughly, the hay, feed, etc., cleared out, and also all the scattered grain, with the insects it may contain, and the whole of the premises put in order for the reception of the new crops.

Old Hay ought not to be left to form the bottom of the mow, but put somewhere, where it can be got at conveniently at any time. At this time, also, do any necessary repairs of those parts which were covered up when much hay and grain were in store; and in

Repair the jooring to cattle stalls, etc. making sure that all liquid and solid manure shall be saved.

The Cattle in the pasture should be looked to daily, that they do not lack water, and good feed, and to see that none are ailing.

Pastures not in real good heart, may be greatly benefitted at this season, by shutting stock out of them for a few days, and giving them a light dressing of ashes, bonedust and plaster, or of good superphosphate

Butter .- The secret of making good butter is cleanliness and thoroughness, and the time for the most profitable exercise of the art of buttermaking is June. The grass is abundant, the cows in full milk, the weather favor able. The milk should not be kept too cool, though this is rarely a fault in dairies. It is enough if it be kept as cool as 60° Fahrenheit, though 55° is not too cool. Cream will rise at about this temperature better than at any any other, and the same is best at which to chorn. Milk should stand where the air is sweet and fresh, odors from the kitchen or from the stable, or odors of any kind, indeed, except that of fresh air, should be carefully excluded. Stone floors are desirable, for these can be kept constantly moist and so cooler than others, and the air ought to circulate freely over and under the pans. Shallow pans are better than deep ones. Work out the buttermilk without touching the hands to the butter, using as little water as possible or none at all. If the buttermitk is all out, and with it all the milk, sugar and cheesy portions of the milk, butter will keep with very little salt. The more imperfect the working, the more salt is required. In keeping cream several days, put it where the tem perature will be uniform and cool, and stir well if more is added.

Beans.-The white field bean may be sown with profit any time during the month. Plant in drills 2 feet apart, the hills being a foot apart. The Blue Pod and White Marrow are the best, the latter ought not be planted later than the 25th.

Corn .- In its cultivation horse power should take the place of the hand-hoe, as far as possible, and on many soils it will be found hardly necessary to hoe at all, if the horse cultivation be thorough, and the rows run

Corn Fodder .- Dry weather may suddenly cut short the pasturage, and without a good supply of corn fodder many a farmer would find his milk running very low. Corn should be sowed on ground in good heart, in drills 3 feet apart, manured in the drill with compost if need be. About 3 or 4 bushels is the usual seeding for an acre. The ground should be cultivated between the rows with a horse-hoe or cultivator once or twice.

Root Crops .- We hope none of our readers will neglect to plant roots. Mangel wurtzels should have been planted in May, but will make a crop in good soil now. The soil for Rutabagas should be rich and mellow, and 200 or 300 pounds of a good Superphosphate or an equal quantity of bonedust will do the erop nothing but good. Sow with a good drill 24 inches apart, and thin to a foot apart in the drills, or 15 inches in very rich land.

PRUNING TREES.

He who has planted trees has done well, but he who has watched them and cared for their early growth, has done better. There would be very little to be said about pruning, were the young trees properly looked after. The rubbing off of a superfluous bud here, pinching a rampant shoot there, and the juous use of a pocket knife as occasion required, would soon put a young orchard in the way it should go. But as people will let trees have their own way until they need

Pruning, we are obliged to accept pruning, the cutting off of large limbs, as one of the operations that must be done. This and the next are the months in which to do it, as now in the growing season the wounds heal over "kindly." Never cut a limb from a tree un less something is to be gained by it. Indiscriminate hacking merely because it is the pruning season, is not to be commended. If the head is too crowded and there is not room for the light and air, thin it; if one branch grows so near another as to chafe it, take i out; if the tree is disposed to grow one-sided balance it. Use a saw with a wide "set," never an axe, though sometimes a heavy chisel driven up from below, will prove efficient. Leave a smooth cut, by paring carefully with knife or chisel if need be. The wound will heal over all the better if covered from the air. The old solution of shellac in alco hol is an excellent application, but the price of materials is too high to allow of their gen-

eral use, and Grafting Wax, applied warm with a brush, is a very useful substitute. One part tallow, two of wax, four of rosin, melted together and applied while warm, will answer the purpose. The composition may be made harder or softer by altering the proportion of tallow. -American Agriculturist.

WORTH KNOWING.

One pound of green copperas, costing seven cents, dissolved in one quart of water, and poured down a privy, will effectually concentrate and destroy the foulest smells. For water closets on board ships and steamboats, about hotels, and other places, there is nothing so nice to cleanse and purify as simple green copperas dissolved in water; and for sick rooms, it may be placed under the bed in anything that will hold water; and thus render a hospital or other place where there are sick persons, free from unpleasant smells. For butcher's stalls, fish markets, slaughter houses, sinks, and wherever there are putrid and offensive gases, dissolve copperas and sprinkle it about, and in a very few days the 'bad smell'' will pass away. If a cat, rat or mouse dies about the house, and sends forth an offensive gas, place some dissolved copperas in a cup or jar, anywhere within "smell-

known a stock of dry goods which were nearly spoiled by a skunk under the building, to cleaned and restored simply by sprinkling Mammoth Lode, Mammoth Lode, dissolved copperas on the floor. - Salem Gazette.

SOLICITORS.

Theodore Cuyler, Esq., Robert D. Coxe, Esq.
Americans are proverbial for the avidity and commendable zeal with which they participate in enterprises having for their object the development of our national resources. At one time "Railroads"—at another "Coal"—then "Copper" or "Iron" and more recently "Oil" have been the all-absorbing topics.

"Railroads"—at another "Coal"—then "Copper or "from" and more recently "Oil" have been the all-absorbing topics.

In all these several enterprises, as will be recollected, those who russy took hold of them made money; some larger amounts than ethers, according to their investments.

Mining operations in the fields of Colorado and elsewhere now mainly engross the public attention. Considering that several such companies have been already organized—they are now at work—that the reports from their mines are highly favorable—that it is known that at the present time there are on the way from the fedges of Novyada and Colorado numerous "bars of silver" and "bricks of gold," it is boileved that the entry in the companies will spring up, whose stock, being based at the then greatly infrased on the recent and exhibit of these "returna," that innumerable companies will spring up, whose stock, being based at the then greatly infrased on the recent and exhibit of these "returna," that innumerable companies will spring up, whose stock, being based at the then greatly infrased on the recent and exhibit of these "returna," that innumerable companies will spring up, whose stock, being based at the then greatly infrased for the companies will spring up, whose stock, being based at the then greatly infrased for the companies will spring up, whose stock, being based at the then greatly infrased on the recent and exhibit of these "returna," that innumerable companies will spring up, whose stock, being based at the then greatly infrased on the recent and exhibit of these "returna," that innumerable companies will spring up, whose stock, being based at the then greatly increased on the recent and exhibit of these "returna," that innumerable companies will spring up, whose stock, being based at the then greatly increased on the recent and exhibit of these "returna," that innumerable companies will spring up, whose stock, being the property of the least in the district; there is a shaft on the least in the district; there is a shaft

rado.

His opinion is as follows:

This is to certify that I have carefully examined the titles to the foregoing lodes or ledges, and am satisfied that they are perfect.

THOMAS MASON, Atty at Law, Central City, Colorado.

The space of a circular is too limited to giv

the opinions of numerou: distinguished citizens and men of science who have examined, this district; the following extracts relate therety, and that of Professor Edward N. Kent in particular of the New York U. S. Assay Office is directly in 15 point: Our late lamented President—Mr. Lincoln—du-

ring an interview with Speaker Colfax, relative to the hidden wealth of Colorado, Nevada, &c., "I have very large ideas of the mineral wealth of our nation; I believe it practically inexhausti

The Hon. J. P. Upsher, Secretary of the Interior, in the Official Report presented to Congress, dated December 5th, 1864, referring to the then present condition of our Western Territories, says: resent condition of our western territories, says:
"The wealth embedded in the rocks of that extrasive region is actually inexhaustible, and it will
furnish in future years, indirectly a principal
part of our means of liquidating the debt contracted by the Government for the overthrow of

The Hon. H. P. Bennett, delegate in Congress The Hon. H. P. Bennett, delegate in Congress from Colorado, in a speech before the House of Representatives said: "Judging from what I know of the undeveloped resources of this country; from what I am told by practical miners who are well informed upon this subject, I do say here to-day before this House and before this Country, to be placed upon the records and read of all men—that within five year's time, and by the year 1869, the gold fields of Colorado Territory will produce \$50,000,000 annually; and even then its full resources of mineral wealth in gold alone remain not wholly developed. I speak from the united testimony of many practical miners who have spent many years in the mines of California, when I say:—that the gold-bearing region of Colorado is far more extensive, quite as inexhaust-

Colorado is far more extensive, quite as inexhaustible, and the gold-bearing quartz of a much richer quality than in California."

Professor Edward N. Kent, of the New York Assay Office, says:

"As to the extent of the gold mines of Colorado, I am not prepared to give an estimate, as I found enough to fully employ my time within a radius of five miles of Central City, [the location of the above Ledges,] but as to the richness of Them, I have no hesitation in saying, that I believe them to be the richest ever discovered. With deience, capital and the Pacific Railroad, Coloraso is destined in my opinion, to rival or supersede California and Australia, and become the El Dorado of the World."

rado of the World."

The opinion entertained by those abroad of claims in this district, is shown by the following

Hagisal capitaless have parthased 2000,000 to the Colorado mining lands, and their agents and imployees are now en route to develop the same. The claims are principally in Russell and Trail listricts, and a recent purchase has been the Sognitive Colorador and the Colorador and the Colorador and the Colorador and the Colorador and Colora on Lode of 1000 feet for which they paid £100,-

An idea of the value of some claims (100 feet each) may be formed when the fact is considered that often occurs that they yield millions of dollars, and have in several instances been sold for \$25,000 per foot. Mr. Fields, from 35\(^2\) feet of the Bobtail Lode has taken out already over \$200,000 in gold, and \$266,000 has been offered and refused for 34\(^2\) feet of this same lode, equal to \$800,000 for a claim of one hundred feet.

As the nurchase of either of the above lodes

As the purchase of either of the above lode would require more money than the majority of persons have at command, it has been determined to consolidate them, and to divide them into Twelve Hundred and Fifty

MENRY R. COSTAR. 482 Broadway, N. Y.
Sold in Bedford, Pa.
Dr. B. F. HARRY,

And all Druggists and Retailers. 1866.
INCREASE OF RATS.—The Farmer's Ga. TNUMEASE OF RAIS.—The Former's paretic (English) asserts and proves by figures that one pair of RATS will have a progeny and descendents not less than 651,050 in three years. Now, unless this immense family can be kept down, they would consume more food than would sustain 65,000 human beings.

**See "Costar's" advertisement above.

1866. RATS versus BIRDS.—Whoever engages in mooting small birds is a cruel man; whoever aids in exterminating rate is a benefactor. We should like some one to give us the benefit of their experience in driving out these pests. We need something besides dogs, cats, and traps for this business.—Scientific American, N. Y.

CONTAILS" RAT EXTERMINATOR is simple, safe, and sure—the most perfect RAT-iffication meeting we have ever attended. Every Rist that can get it, properly prepared, will eat it, and every one that eats it will die, generally at some place as distant as possible from where it was taken.—Lake Shore, Mich. Mirror.

See "Costar's" advertisement above.

HOUSEKEEPERS troubled with vermin need be so no longer, if they use "Costar's" Exterminator, We have used it to our satisfaction; and if a box cost \$5, we would have it. We have tried poisons, but they effected nothing; but "Costar's article knocks the breath out of Rats, Mice, Reaches, Ants, and Bed-Bugs, quicker than we can write it. It is in great demand all over the country.—Medina, Ohio, Gazette.

33. See "Costar's" advertisement above.

Fxterminator—"more grain and provisions are de-stroyed annually in Grant County by versain that would pay for tons of this Rat and Insect Kill-er."—Lancaster, Wis. Herald. FARMERS AND HOUSEKEEPERS—should resollect that hundreds of dollars' worth of Grain, Provisions, &c., are annually destroyed by Rats, Mice, Ants, and other insects and vermin—all of which can be prevented by a few dollars' worth of "Costan's" Rat, Roach, Ant, &c., Exterminator, bought and used freely.

30. See "Costan's" advertisement above.

20 Sold in Bedford, by Dr. B. F. Harry, and all Druggists and Dealers.

Ap. 13, 4mo.
