

Farm, Garden & Household.

THE SUCCESSFUL FARMER.

The truly successful farmer always places himself in the position of a learner. His mind is always open to the reception of new truths, whenever and wherever they present themselves.

Go into a farmer's kitchen. The quick eye of a successful man at once detects any improvement that might easily be copied into his own home for the comfort of his family.

Much of the farmer's knowledge must be acquired by observation. He cannot be expected to sit down to the study of books like a professional man.

To be a successful farmer one must learn the trade of the farmer. It is no small part of a farmer's life to do whatever he does in a way that shall be permanent.

The successful farmer soon learns that a year quickly rolls around, bringing with it an income from his land as sure as the seasons themselves.

THE LARGEST FARM IN THE WORLD.

I observe a note in your issue of an 8,000 acre farm in Bureau county, Ill. and of Mr. J. S. Alexander's farm in Morgan county, Ill.

I will venture the opinion that there cannot be found 5 acres of unserviceable land on Mr. S.'s entire 70,000 acres.

I had the pleasure of being present when he harvested a thousand acres of his wheat; this was done with "Header's" and about eight or ten men and twenty horses cut and safely stacked away about 200 acres a day.

Those who desire to sell or buy land or lands find this agency an excellent medium through which to accomplish their object.

Not having the exact data before me, I will not venture to give the enormous returns in bushels or tons of the products of this great farm.

GROVER & BAKER'S Sewing Machines.

WERE AWARDED THE HIGHEST PREMIUMS

at the State fairs of New York, New Jersey, Vermont, Pennsylvania, Ohio, Indiana, Illinois, Michigan, Wisconsin, Iowa, Kentucky, Missouri, Virginia, North Carolina, Tennessee, Alabama, Oregon, California, at the fairs of the American Institute, Franklin Institute, Maryland Institute, Massachusetts Mechanics' Association, Penn. Mechanics' Institute, St. Louis Agricultural and Mechanical Association, and at numerous Institutes and County fairs, including all the fairs at which they were exhibited the past three years.

First prizes have also been awarded these Machines at the exhibitions of London, Paris, Dublin, Liverpool, Philadelphia, St. Peter, Chicago, and they have been furnished by special command to the

Empress of France, Empress of Brazil, Queen of Spain and Queen of Bavaria.

The Grover and Baker Elastic-Stitch Sewing Machines are superior to all others for the following reasons: 1. They sew direct from the spools, and require no rewinding of thread.

2. They are more easily understood and used, and less liable to derangement than other machines. 3. They are capable of executing perfectly, without change of adjustment, a much greater variety of work than any other operation.

4. The stitch made by these machines is much more firm, elastic, and durable, especially upon articles which require to be washed and ironed, than any other stitch. 5. This stitch, owing to the manner in which the under thread is wrought, is much the most durable and beautiful in appearance, and retains this plumpness and beauty even upon articles frequently washed and ironed until they are worn out.

6. The structure of the seam is such that, though it be very tight, it is not liable to give, and it will neither open, run, or ravel, but remains firm and durable. 7. Unlike other machines, these run fast both ends of the seam by one operation.

8. With these machines, while silk is used upon the right or face side of the seam, cotton may be used upon the other side, without lessening the strength of the seam. This can be done on other machines, and is a great saving upon all articles (silk) made up with silk.

9. These machines, in addition to their superior adjustment, are easily learned and practiced, and are the most beautiful and permanent embroidery and ornamental work.
