(From the Boston Advertiser.) Good mutton, well fatted and neatly butchered is the most wholesome, nutritious and cheapest of meats. It grows quick and costs little to produce it, compared with beef and pork. Every farmer should have a few wooled Cosset sheep at least-Cotswolds or Lei They are little trouble and will keep fat on the orts of the cattle. But there is another side to the qu It is the indisposition of landlords to lease for both parties are agreed. This plan, however, gives poor encouragement to a tenant who nds to devote all his energies to the business and to do the best for himself and the landlord. The latter may see proper to sell, or he may come across some one whom he thinks he would prefer for a tenant. At least his tenure is uncertain and of course discouraging. A tenant who desires to do well wants to be assured of a fair chance to do so by occupying the place for a series of years.

And it is on this erroneous system of leasing that we have so few good tenants on the one hand and so few capitalists on the other who invest in land with a view to income. The sooner the system is reformed, the
