

Farm, Garden & Household.

AGRICULTURAL CAPITAL. From the Germantown Telegraph. What in the hands of the farmer constitutes capital? With the merchant, cash is capital; with the land speculator, land is capital; with the farmer, cash, land and stock are capital.

There is a more rapid vegetation, the temperature increased, and large crops follow each returning season. Instead of a cold, sour, ungenerous and unfruitful soil, you have the best land on the farm, reclaimed, improved and made profitable by drainage.

Humorous. Somebody says the ladies' pet animals are West Pointers. A "great brute of a husband" advertises in the morning papers for a stout, able-bodied man to hold his wife's tongue.

Why are radishes like telegraphic dispatches? The most natural reply is, because they are ret(a)d. The real answer, however, is because both must to take cum grano salis.

Let no one undertake to have or hold more land than he has capital to manage well. We hear a certain class of farmers (so called) say they are "too poor to buy time," "too poor to buy cattle," to make manure, there are the kind who have too much land.

What is the use of capital if it is not to expend it so that it may increase? If a farmer has surplus capital, the best manner in which he can invest it is in lime or manure for his farm.

Draining makes a good, permanent and safe investment for surplus capital. Such investments not only pay an interest as they go along, but also increase the capital by increasing the value of the farm.

A western writer has said that "large farms are the curse of the West;" nor does this apply to the West alone, but also to the East. By increasing the depth of his soil, the farmer increases his crops, without increasing his number of acres, and with little or no extra expense in labor.

In this way a farm of fifty acres may produce more than many of one hundred nor yield; such at least is the opinion and experience of

At a council of Generals, early in the war, one remarked that Major Jones was wounded, and would not be able to perform a duty that was assigned him. "Wounded!" said Stone-wall Jackson; "if it is really so, I think it would have been by the accidental discharge of his duty."
