**DURBORROW & LUTZ, Editors and Proprietors.** **BEDFORD, Pa., FRIDAY, AUGUST 30, 1867.** **VOLUME 10; NO. 34.**

**Poetry.**

**IMPERFECT.**  
Broken sunlight! shadows in its train!  
Golden bow that cometh with the rain!  
Beams of brightness, parted into flakes!  
Where the cloud upon the beauty breaks!  
Broken songs we never may complete!  
Tender strains no voice can e'er repeat!  
Tuneless harmonies our lips bring,  
Silenced where a sudden "hush" breaks in!  
Broken hopes, built up so fair, so high,  
Sudden, in ruins, round us lie!  
Dreams of beauty ever unfulfilled!  
Longings never met, yet never stilled!  
Broken love! oh, sweetest incomplete!  
Souls that touch, but never wholly meet!  
Pensive treasure scattered round about—  
Hungry hearts that never find it out!  
Broken paths, where hands may clasp no more;  
Footsteps lost upon the river's shore!  
Half told stories, with an end so sweet,  
Said nor heard—forever incomplete!  
Broken smiles, on which the tear drops fall!  
Laughter, with an anguish through it all!  
Faces lighted up, all glad and bright,  
To meet the bitterness and blight!  
Broken prayers! oh, Father, dost thou hear?  
Stammering words that utter nothing clear!  
Lips that breathe out "God!" with stammering sound,  
While the thoughts of earth break in around!  
Broken life! poor, vain, imperfect thing!  
Echoes from the infinite that ring!  
Fragments washed up by the waves that roll  
From the great Beyond,—the perfect whole!

**MY JEWELS.**  
A ringlet tiny, bright and fair,  
A simple spray of golden hair;  
A half-worn shoe with the form impress'd  
Of the little foot that is now at rest;  
A tiny mitten of white and red,  
With here and there a broken thread;  
A broken toy, a withered flower,  
That passed like her in a single hour;  
The darkened room and silent hall,  
The hush unbroken by baby's call;  
The mound beneath the yew tree shade,  
Low and narrow and newly made;  
Such are the jewels left to me  
Of a little life that was swift to flee.

**MISCELLANEOUS.**  
**REPUTATIONS—WHO ARE THEY.**  
The New York Times says fit to rebuke the reputation of the second and third States of our Union as follows:  
"We think the Republicans in Pennsylvania, Ohio, and other States where political campaigns are in progress, are making a mistake in attempting to fasten upon their opponents the purposes of repudiation. In the first place, it does not, thus far, seem to be precisely true; in the second place, it is strongly denied by the opposition themselves; in the third place, it is a bad thing to circulate the name of repudiation throughout this country and Europe that a party so strong numerically as the Democrats in Pennsylvania, Ohio, and other States, are in favor of repudiation. If they are constantly charged with it they will very likely come to believe, in course of time, that the charge must really be true, and they will unconsciously assume the very ground upon which they have been pushed by their opponents. It should be the policy of the Democrats, and there should be no attempt to familiarize the public mind with so disgraceful a name."  
We fully admit that any charge which is untrue should not be made, and, if made, should be retracted; but what are the facts in the case? Will the Times reproduce the relevant language of Mr. Vallandigham, recently cited in our columns, and maintain that what he proposes is not repudiation? And was not the language employed at a Democratic meeting expressly to win votes for the Democratic ticket? Are not the Republicans who hear such harangues as competent to interpret them as an editor who writes for the public? Will the Times will it be urged that Mr. Vallandigham is an extremist? Then let us consider the more cautious and moderate imputations of the Hon. George H. Pendleton, last Democratic candidate for Vice President, and widely known as an amiable and scholarly gentleman, of excellent birth and breeding, and the inheritor of a liberal fortune. See his remarks on this subject, as published in full on Monday, but especially this portion of them:  
"The five twenty bonds are all payable, at the option of the Government, after five years. Their very name shows it. They are payable by the law under which they were issued, and according to their face, in greenbacks. They are not payable in gold. The interest is, according to the provision of the law and the language of the coupon, to be paid in gold. Not so with the principal. The ten forty bonds authorized by the act of the March 3, 1863, are, by the terms of the law, made payable in gold. This is the only class of bonds of that character; and as I read the last official statement of Secretary McCulloch, very few, if any of them, have been issued. The Government may then, according to the terms of the law and of its contracts, pay the five twenties in greenbacks at any time after five years from their issue, and there is no repudiation in doing so. Of this class there were outstanding on the 1st of August, \$1,000,000, and they mature probably in nearly equal proportion in each of the next five years. This will not supersede the necessity for high taxes, for close economy, and for curbing industry. They are inevitable. With them, and whatever other plans wisdom may suggest, the burden will press heavily on you and your children. I have heard that the redemption of the bonds will soon be gradual, the interest of the currency so slow that values will adjust themselves and business interest become regulated without that shock which usually attends great changes of financial policy. But, if it were

not so, still the bonds should be converted into greenbacks. They were sold for greenbacks; it is fitting they should be redeemed in the same currency. This policy would save the interest, pay the debt, and bring upon the duplicate for taxation that immense amount of capital which is now employed for the evils which are predicted. The debt amounts to one fifth of the property, real and personal, of the whole country. One fifth of all the capital of the country is exempt from taxation. Interest cuts up the substance of the people. Exemption from taxation aggravates the evil. This state of things cannot last. It oppresses labor; it excites deep discontent. It ought to be relieved by a fair and voluntary adjustment. It will be relieved all events. The bondholder should be prompt and wise. The people already believe this course is the blight of death; and we know by experience what they will do to 'save the life of the nation.'  
—We do not care to dwell on the gross misstatements of facts here made—as, for instance:  
1. That the Five-twenties are payable not in gold but in greenbacks.  
2. That the national debt "amounts to one fifth of the property, real and personal, of the whole country."  
The property of our people is worth more than twenty thousand millions of dollars, though it is officially returned as only sixteen thousand millions. The debt is not eight per cent. of the value of that property.  
Mr. Pendleton proposes an issue of two thousand millions of additional greenbacks—for our interest-bearing debt exceeds that sum. What would they be worth if our currency were thus swelled by two billions of fresh paper, redeemable in nothing and never? We suggest and suggest again, that what would all these greenbacks pay for? The property of our people is worth more than twenty thousand millions of dollars, though it is officially returned as only sixteen thousand millions. The debt is not eight per cent. of the value of that property.

Mr. Pendleton proposes an issue of two thousand millions of additional greenbacks—for our interest-bearing debt exceeds that sum. What would they be worth if our currency were thus swelled by two billions of fresh paper, redeemable in nothing and never? We suggest and suggest again, that what would all these greenbacks pay for? The property of our people is worth more than twenty thousand millions of dollars, though it is officially returned as only sixteen thousand millions. The debt is not eight per cent. of the value of that property.  
Mr. Pendleton proposes an issue of two thousand millions of additional greenbacks—for our interest-bearing debt exceeds that sum.
