sistently advocated a year ago. We glad to see the Tribune at last cry "hold, enough" on the subject of contraction. Contraction, in the eyes of many, has long been deemed the only road to specie payments, and to specie payments, the salvation of the country in their estimation de-mand that we should come straightway. Λ year ago the privilege of contracting four in circulation according to the report of the controller of the currency Legal Tenders..... National Bank Notes..... State Bank Notes about... Fractional Currency...... .\$157,000,000 $293,000,000 \\ 4,000,000 \\ 27,000,000$ Total \$481,000,000 Here we find only about \$4,000,000 more of a circulation than in 1861. Without allowing for any increase in the business of the country in the past six years, the fact that the price of everything has doubled while that of many things has trebled and quadrupled, would vindicate that at least double the amount of circulating medium would be required to transact the same amount of business, when in fact we have only an increase of about a hundredth part of the circulation then existing. In 1861 there was no premium on gold. With only half as large a circulation in proportion to prices and business in 1867 gold commands a premium of 40 per cent. Such facts ought to make it evident to the dullest comprehension that our trouble is not with an inflated currency, and that contraction cannot bring us to specie payments. Let Congress then at once repeal the 4,000,000 act and stop contraction, and save us from the financial ruin to which McCulloch's policy is carry-ing us at a headlong pace. Nothing can be clearer than that contraction is not our remedy for the financial ills that beset us. In a retrenchment of our expenditures, a better adjustment of our Internal Revenue system, and the abolition of the cumulative taxes that now oppress business and enhance prices, will be found the true path to specie

payments and general business prosperity. No more important business can be brought before the Congress about to assemble than the regulation of the currency, the adjustment of taxes and the simplification of our Internal Revenue system. If our representatives would benefit the Re-publican party and the country, let them give more of their time to these vitally important subjects and less to President making during the coming winter. The people expect it of them and have a right to de-

mand it. Let our representatives remember that their work is National, not partisan, and that the people will pronounce upon their faithful performance of it, at the ballot box in 1868.

BEDFORD, PA., FRIDAY, NOV. 29, 1867 OUR TREASURY POLICX. Under the above caption the New York *Tribune* of the 15th inst, turns its back up on the policy of contraction which it so per-sistently advocated a year ago. We are
