We hope, now that the impeachment question is disposed of, that will give their serious attention to the finances of the nation. If we are to have continued contraction and half the gold in the country hoarded in the United States Treasury, without an effort to resume specie payments, business may as well be suspend-ed, until our Legislators gain sense enough to understand that the business of the country cannot be carried on without some kind of a circulating medium. With a lesa amount of currency than there was in circu-lation before the war, the present premium on gold cannot be the result of expansion, therefore the remedy will never be found in contraction. With the confidence at present existing in our government securities and currency, and over \$100,000,000 of gold in the Committee on States, and papers, to examine witnesses, or to sons and papers, to examine witnesses, or to resume specie payments on the first of March next, he could do so without being called next, he could do so without being cancu upon to pay out half the gold now lying idle in the Treasury. We are satisfied with our present currency and believe that time itself, without legislative aid, will gradually bring down the present aigh prices and bring us safely to specie payments. But as many of the people, and those whe have charge of the national finances are anxious for a speedy resumption, we would like to see some practical evidence of common sense in their action and sincerity in their profes-sions. Since the currency has been reduced to a less volume than before the war, they should accept the fact and declare them selves ready to resume or frankly acknowl-edge either, their lack of courage to carry out their doctrine, or the fallacy of their upon to pay out half the gold now lying idle John
