SUBSCRIPTION TERMS, &C.

DURBORROW & LUTZ, BEDFORD, PA.

NEWSPAPER LAWS.—We would call the special attention of Post Masters and subscribers to the INQUIRER to the following synopsis of the News-

paper laws:

1. A Postmaster is required to give notice by letter, (returning a paper does not answer the law) when a subscriber does not take his paper out of the office, and state the reasons for its not being taken; and a neglect to do so makes the Postmaster repressible to the publishers for the payment 2, Any person who takes a paper from the Postmaster representation of the payment of the payment and the publishers for the payment of the payment of the payment and the payment of the payment

a. If a person orders his paper discontinued, he

3. If a person orders his paper discontinued, he must pay all arrearages, or the publisher may continue to send it until payment is made, and collect the whole amount, whether it be taken from the office or not. There can be no legal discontinuence until the payment is made.
4. If the subscriber orders his paper to be stopped at a certain time, and the publisher continues to send, the subscriber is beaund to pay for it, if he takes it out of the Post Office. The law received when the ground that a man must hay.

or what he uses.

6. The courts have decided that refusing to take companers and periodicals from the Post office, r removing and having them uncalled for, is reima facia evidence of intentional fraud.

# tion was made conveyed an implied promise that there was no intention to delay the progress of the trial, and that the time occupied gress of the trial, and that the time occupied of the Canadian Parliament. He was shot dead upon his own door step, in gress of the trial, and that the time occupied Professional & Business Cards.

once a curiosity and a memorial that the Mahometan has ceased to defile these courts. It is a recess in the wall of the temple, in which the Koran was kept, and where the Kalif came to say his prayers, looking out of a little window toward Mecca. It is a small six-sided room, about twelve feet across, the floor one piece of marble, and the roof in the shape of a shell is also, we were assured, of a single block, and up the six sides rise marble pilasters, the whole adorned with strange Arabic art and mysterious inscriptions. When Hakem was Caliph of Cordova, he sent messengers into the East to ask for skillful artificers in painting glass and giving this strange effects transery in metals and stone; for there is in mosaic work, when well done, something superior to the softest painting, and quite incomprehensible. The workers in mosaic came, and their skill now shines in this miracle of oriental art, which has been here since 965, and is as fresh and beautiful as when it shoue at the feast of the Rhamadhan, in the light of a thousand lamps. In the marble floor is worn a deep groove, by the knees of devout Mussulmans who have thus gone around it while at their devotions.

On the sides of the Cathedral are many chapels, each with its altar, its pictures, its relies and its history. By one of them, once a Moorish sanctuary paved with silver, is a rude painting of a crucifixion, and an inscription in Spanish which tells us that—

"While the Mahometans celebrated their orgies in this temple, a Christian captive uttered the name of Christ, whom he held in his heart, and he engraved this image with his nais on the hard stone of this pil-

in his heart, and he engraved this image with his nails on the hard stone of this pil-lar, for which his death has purchased this

aureole."
I cite it from memory, and have not the exact words. But on the stone column is sketched a crucilixion which tradition says the prisoner scratched in with his finger nails. The stone is very hard, and the story

hadls. The stone is very hard, and the story harder.

Come again and again, and this strange pile, with its thousand columns and its thousand years of history, grows on you with every visit. We come from a land where all is fresh and new, and these old temples fill us with awe. But if we are impressed with a ruin as in Rome, where Paganism built its temples to become the sites of Christian churches, which themselves have been buried and again dug up to be the wonder of the present age, how much more impressive is a building still fresh and unbroken by the march of centuries, where the pompand ceremony of a religion, corrupt indeed, yet recognizing God the Father as the only true God, are perpetuated year after year still their number becomes a thousand years.—IRENÆUS in New York Observer.

### THE TRUE WOMAN.

Who shall limn for us the picture of a true good woman—the pride and the paragon of her own sex, and the admiration of the other; of the woman young, beautiful, healthful—well informed, but not pedantic; who can talk well, listen well, sing well, play well, and dress well; who is neither fur nor pride; who knows neither foo little. whose pride; who knows neither foo little. pride; who knows neither too little; whose lips are innocent of slang, and whose heart in manners, and affectionate in disposition, beloved of the old, the darling of the young:

Jox says that if a man feels much like getting married, yet himesis. La and have to the best remedy he knows is to help one of his heighbors to move a house full of furniture—borrow about nine of his children and hear them cry. If that fails, build up a fire of damp wood and when the smoke in the room is thickest, hire a woman to sold him about four hours. If he can stand all these, he had better get married the next day—give his wife the pants and be the "silent partner" in the great firm of matrileut partner" in the great firm of matri-mony. The remedy is severe, but as every man is liable to these things after he yokes himself, it would do no harm to try it before.

THE REASON. -At a certain college, the THE REASON.—At a certain college, the senior class was under examination for degrees. The professor of natural philosophy was badgering in optics. The point under illustration was that, strietly and scientifically speaking, we see no objects but their images depicted on the retina.—The worthy professor, in order to make the matter plainer, said to the wag of the class. Mr. Jackson, did you ever actually see your Jackson, did you ever actually see your father?" Bill replied promptly, "No, sir." "Please explain to the committee why you never saw your father." "Because," re-plied Mr. Jackson, very gravely, "he died before I was born, sir."

### WANTED; YOUNG MEN.

VOLUME 41; NO. 16.

It is said that the market is overste

It is said that the market is overstocked with men seeking employment, and yet there is always a demand for intelligent, reliable, and energetic men to fill places of trust and position. But they must be members not only of the genus "homo," but of the species "vir," for such there are always open places waiting to be filled. Henry Ward Beecher thus describes the sort which are wanted:

Who are the men that are needed in this world? Young men that shall bear burdens. We have enough mullen stalks, we want oak trees! We have enough mushrooms, we want timber! We have enough men that are willing to do anything for the sake of getting along, but what are they worth? They are bridges for men to walk over. They are tools. Men use them like sand-paper, to scour with, and then throw them down and trample them under foot. A young man that does not know how to say. "No." a young man that has not power to resist the cup when it is presented to him—what is he but a poor miserable washcloth, but a raz, dishonored, and put to they vilest uses? Who cares for him, or mourns over him, but some Christian mother or Christian minister? But a young man that to pessit him—what is he but a poor miserable washcloth, but a rag, dishonored, and put to the
vilest uses? Who cares for him, or mourns
over him, but some Christian mother or
Christian minister? But a young man that
knows how to say "No:" that knows how
to resist evil; that knows how to give buffet
for temptation—is not he hardening himself? Is not he making his bones tough—
particularly his backbones? He is becoming columnar. And it is such as he that
are sought after in business. A man says,
"Here is a difficult department in my eatablishment, and I would pay almost any
price if I could find a man that I could
trust." Says the man whom he addresses.
"I know an impracticable sort of a fellow I
think might suit you. He will stick to what
he thinks is right at all hazards. You cannot turn him from it by any power on
earth." Says the other man, "I want a
lignumvitæ man; send him to me." Let it
once be known that a man cannot be cajoled; that he will not lie even for himself; that
he will not steal, and has a prejudice against
stealing; let it be known that he has been
tried and that there is inward principle in
him, and let us put him up at auction, and
I will get a million bid on him! Men are
the things that are most needed in New
York. Why, there is no timber in the
market that is gathered up so greedily as
they are. There is nothings on much needed
in business, in all departments of it, as
moral principle. And yet merchants will
teach young men to lie; and, for the sake of
monetary profit cajole customers. And
when, by-and-by, these young men grow up,
they become on their own account, filchers,
stealers, and liars. You think that the
young men of this generation are corrupt
and worthless. They are; but the blame
rests on your shoulders. You were their
sehoolmasters. You taught them to lie and
cheat in your interest; and now they do it
in their own. Now your own chickens
come home to roost. Merchants North and
South have been raising by the wholesale,
damnable young men without principle.
And a you

Mr. Whittier was, we believe, never married, but till within a year, he has been blessed with the most devoted of sisters, who has been his constant companion, ministering to his domestic needs, and sharing his studies. She was a woman of fine literary taste, and herself wrote some poems that were quite equal to any of her brother's productions. She died about a year ago, greatly lamented by Mr. Whittier, who has since lived a secluded life in his quiet home in Amesbury. n Amesbury.

FRESH SHAD.—Shad are being caught in tolerable abundance by the gill net fishermen. About five thousand were brought to Washington during the few warm days of last week. They were sold to first hands at from \$25 to \$30 Ler hundred. Our markets have been well supplied with these superb fish from rivers farther south. In a few days, if the warm weather prevails, we may welcome our ownDelaware shad, which, as every housekeeper knows, are vastly su-

### MUSIC OF SOLOMON'S TEMPLE.

The disentombing of Assyrian and Egyptian inscriptions have opened new fields of investigation in almost every department of knowledge. Among the branches of science which have shared in these discoveries, that of music has been benefitted largely. The accounts of ancient musical instruments were vauge, and our ideas, especially of Hebrew music, were confused, till recently sculptures and paintings have been brought to light which delineate the musical instruments of the early oriential nations, and in a number of cases veritable specimens have been disentembed. Such, for example, is an Egyptian harp found in Thebes, with its strings yet perfect enough to vibrate again, after a silence of three thousand years.

The more recent investigations prove that the parent of all musical science was Assyria. From the Assyrians, the Hebrews and the Egyptians, and, indeed, all Eastern nations, derived their knowledge of music. The unveiled monuments show that in the time of Senacherip music was a highly cultured art, and must have existed through generations. This polished nation used a harp of twenty-one strings, the frame of which was four feet high, which accompanied minstrels songs or was borne in dance. The lyre of tortoise-shell, the double pipe, the trumpet, drum, and bell were common. Even of the bag-pipe representations have been discovered, though none of the stringed instruments, like the violin, played with the bow. The disentombing of Assyrian sculptures

ed instruments, like the violin, played with the bow.

In all delineations of social or worshipping assemblies, musical instruments very like our modern ones have a prominent place. The Hebrew music, at the time of the Exodus, was purely Egyptian; but it was much modified subsequently by association with Asiatic nations. In the temple of Jerusalem, according to the Talmud, stood a powerful organ, consisting of a wood-chest with ten holes, containing ten pipes, and each pipe capable of emitting ten different sounds by means of finger-holes, so that a hundred sounds could be produced by it. It was provided with two pairs of bellows and ten keys, so that it could be played with the fingere. According to the rabbis, it could be heard a great distance from the temple.

Why we Shake Hands and Kiss.—A learned Theban gives us the solution of this frequently conjectured problem. In the first place it is a very old-fashioned way of indicating friendship. Jehu said to Jehonadad: "Is thine heart right as my heart is with thine heart? If it be, give me thine hand." It is not merely an old-fashioned custom; it is a strictly natural one, and as usual in such cases, we may find a physiological reason if we only take pains to search for it. The animals cultivate friendship by the sense of touch as well as by the sense of hearing and sight; and for this purpose they employ the most sensitive parts of their bodies. They rub their noses together or lick one another with their tongues. Now, the hand is a part of the human body in which the sense of touch is highly developed; and after the manner of animals, we not only like to see and hear our friend, we also like to touch him, and promote the kindly feelings by the centers and von procel processor of the WHY WE SHAKE HANDS AND KISS.-A touch him, and promote the kindly feelings by the contract and veniprocal processes of the sensitive hands. Observe, too, how this principle is illustrated by another of our modes of greeting. When we wish to determine whether a substance be perfectly smooth, and are not quite satisfied with the information conveyed by the fingers, we apply it to the mouth.

Newspaper Laws.—Postmasters are required to give notice by letter, when a subscriber does not take his paper from the office and give the reasons for its not being taken. Neglecting to do so makes the postmaster responsible to the publisher for the carment.

Any person who takes a paper regularly from the post office, whether he has sub-scribed or not, is responsible for the sub-A person ordering his paper to be discon

tinued must pay all arrearages, or the publisher may continue to send it until payment is made, and collect the whole amount whether it is taken out of the office or not.

The courts have decided that refusing to take newspapers and periodicals from the uncalled for, is prima facie evidence of in-tentional fraud.

DR. SAMUEL JOHNSON was much attach-DR. SANUEL JOHNSON was much attach-ed to a young man—an intelligent Italian. As the Doctor lay upon the couch from which he never rose up, he called his young friend to him and tenderly and solemnly said; "There is no one who has shown me more attention than you have done; and it is now right you should claim attention from me. You are a young man, and are to struggle through life; you are in a profession that I dare say you will exercise with great fidelity and innocence; but let me ex-hort you always to think of my situation which must one day be yours—always re-member that life is short, and that etermity never ends.

OUR EXAMPLE. - One thing impressed my own mind most peculiarly, when the Lord was first opening my eyes—I never found Christ doing a single thing for himself there is an immense principle. There was not one act in all Christ's life, done to serve or to please himself. An unbroken stream of blessed, perfect, unfailing love flowed from him, no matter what the connowed from him, no matter what the con-tradiction of sinners, one amazing and un-wavering testimony of love, and sympathy, and help; but it was ever others, and not himself, that were comforted, and nothing could weary it, nothing turn it aside. Now the world's whole principle is self—doing well for itself.—Witness.

AN EDITOR TIGHT.—We believe it is rare that editors indulge in a drop, but when they do, their readers are sure to find them out. A cotemporary was called upon to record a "melancholy event" at a time when his head was rather heavy, and did it up after the following manner.

his head was rather heavy, and did it up after the following manner:

"Yesterday morning, at 4 o'clock, P. M., a man with a heel on the hole of his stocking, committed arsenic by swallowing a dose of suicide. The inquest of the verdict, returned a jury that the deceased came to the facts in accordance with his death. He leaves a child and six small wives to lament the end of his untimely loss. In death we are in the midst of life."
