"Equal taxation of every species of prop erty according to its real value, including government bonds, and other public securities."

The importance of the Pacific Railroad to

The importance of the Pacific Railroad to the commerce of the world and the spread of American power is beginning to penetrate the English mind, and is exciting something like a feeling of rivalry. The subject was brought under discussion a few days ago in the Geographical Section of the Brittish Scientific Association by the reading of a paper on an "Overland Route through British territory from the Atlantic to the Pacific." The anthor of the paper urged that, if England did not stir in the matter, the Pacific Railroad, now on the point of being completed, would throw the carrying trade between the East and Europe entirely into the hands of the United States. He therefore proposed the building of a railway wholly through British territory, and esti-mated the gold cost of it at \$135,000,000. Upon the point of cost he said: "We shall be told that such an autlay is far too great to be thought of. But what

WHEN a good old Democrat like Reverdy Johnson gets into the presence of a British audience, it is refreshing to see what a patri-otic Republican he becomes. Thus, he is re-ported as saying to a number of Englishmen at a dinner in Sheffield: "The war had this compensation: it ended Slavery. None now but freemen tread the soil of America, and history will say that blot, transmit-ted from a common ancestry, tarnishing our fame and belying the Declaration on I dependence." All of which we highly approve. We don't think that Reverdy could pronounce seati-ments more in harmony with the Republican party if he tried. The State Gueral parts the present participant.
