HARPIES. - There has been great complain made by all parties engaged in building the past season. Blocks, boards, lath, lumber of every description is carried off in broad day light and at all hours of the day and night. There is no safety nor security for anything in the shape of wood unless it is too heavy to carry. Young men and old, women and children all engage in the work of plunder, seemingly regarding every one who is unfor tunate enough to be engaged in building as a fair subject for rephire. It is high if a single day in seventeeu years, and has made the comtortable sum of \$100,000 by his occupation.

THE MORMONS.—Late Salt Lake papers contain the proceedings of the General Mormon Conference. All the Mormon church dignitaries were fully represented. It was unsnimously agreed that commercial intercourse with the Gentiles should be restricted to necessities. Mormons generally purchasing from the Gentiles will do so at the peril of expulsion from the Church. This measure is urged as necessary in selfdelence against the rapidly approaching danger from outsiders coming in with the Union Pacific Rail ond. They are avowed enemies of the Mormon Institutions, and compercial non-intercourse only can restrain the Mormons and encourage home manufactures.

Probably never before in the whole history of medicine, has anything won so wilely and so deeply upon the confidence of mankind, as this excellent remedy for pulmonary complaints. Through a long scries of years, and asnow more of the races of men it has risen higher and higher in their estimation, as it has become better known. Its aniform character and power to cure the various affections of the lungs and throat, have made it known as a reliable protector against them. While adapted to milder forms of disease and to young children, it is at the same time the mest effectual remedy that can be given for incipient consumption, and the dangerous affections of the threat and lungs. As a provision against sudden attacks of Croup, it should be kept on hand in every family, and indeed as all are sometimes subject to colds and coughs, all should be provided with this antidote for them.

Although settled consumption is thought incurable, still great numbers of cases where the disease reemed settled, have been completely cured and the patient restored to sound health by the Cherry Pectoral. So complete is its mastery over the disorders of the Lungs and Throat, that the most obstinate of them yield to it. When nothing else could reach them, under the Cherry Pectoral they subside and disappear.

Singers and public speakers find great protection from it.

Asthma is always relieved and often wholly ed by it.

As its name implies, it does CURE, and does
not fail. Containing neither Arsenic, Quinine,
Bismuth, Zinc, nor any other mineral or poisonous substance whatever, it in nowise injures any
patient. The number and importance of its cures
to the ague districts, are literally beyond account
and we believe without a parallel in the history
of Ague medicine. Our pride is gratified by the
