

Farm, Garden & Household.

For the Inquirer.

WHY OUR YOUNG MEN LEAVE US. The farmer, the mechanic, the tradesman, men in whatever employment or profession...

Humorous.

Without the dear ladies, we should be but a stag-nation. The latest improvement on the Grecian bend, is the Roman wriggle.

"The name of this coach must be 'Regulator,' said a traveler, 'as I notice all the other coaches go by it.'"

TEMPERANCE has promising children; but among the sons of Drunkenness are Debt, Dishonor, Disease, and Death.

In these seminars for teaching spinology, teleology, teleology, conology, conology, &c., we should have more W. F. W. W., or Women Fit for Wives.

A RICHLY dressed lady stopped a boy trodging along with a basket, and asked, "My little boy, have you got religion?" "No, ma'am," said the innocent, "I've got potatoes."

"Excuse this bit of sarcasm," said Smith, to Jones, "but I must say you are an infamous liar and scoundrel."

"Pardon this bit of irony," said Jones to Smith, as he knocked him over with a poker.

"What's that?" said a teacher, pointing to the letter X to a little ragged urchin. "Daddy's name."

"No, no, my boy," "Yes it is, I've seen him write it a good many times."

As a reverend doctor once passed through a region of very poor land, he said to a farmer: "Sir, I see your land is not very productive."

"No, sir," said the honest farmer, "our land is just like self-righteousness."

"Ah, how is that?" "Why the more a man has of it the poorer he is."

A NOTED POLITICIAN was once asserting his entire indifference to the opinions of his opponents, and to their personal abuse.

"Why," said he, "a man likened me the other day to Judas Iscariot, but I don't care."

"Yes," said a bystander, "but how does Judas feel about it?"

MAY a young lady who objects to be kissed under the station has no objection to be kissed under the rose. A careless compositor made an error in the above, rendering it, "has no objection to be kissed under the nose."

A YOUNG LADY from the country who had never seen a steam engine before, while gazing at the operation of one in the street, the other night, asked, "Why do they boil the water before squirting it on the fire?"

"What's that?" asked a schoolmaster, pointing to the letter X. "It's daddy's name."

"No, you blockhead, it's X." "Taint X, taint X, it's daddy's name, for I see him write it many a time."

A BROAD-SHEET HIST.—In the parlor of a public house in Fleet street, there used to be written on the chimney-piece the following notice:—"Gentlemen learning to spell are requested to use yesterday's paper."

A STAPLE PRODUCTION.—A tall grown buckeye, in rather an oblivious and halmy state, tumbled into a stage-coach, one bright morning, beside a traveler who was in pursuit of knowledge, certainly at that time, "under difficulties."

Hon. A. K. MCCLURE, Philadelphia, Solicitor.

The Chinese Government having through the Hon. Anson Burlingame consented to this Company the privilege of connecting the great systems of the Empire by submarine electric telegraph cables, we propose commencing operations in China, and laying down a line of wire hundred miles at once, between the following ports, viz:

Population, Canton, 1,800,000; Hong-Kong, 250,000; Swatow, 200,000; Amoy, 200,000; Foo-Chow, 1,250,000; Ning-Po, 300,000; Hang-Chen, 1,200,000; Shanghai, 1,800,000; Total, 8,910,000.

These ports have a foreign commerce of \$900,000,000, and an enormous domestic trade, beside which we have the immense internal commerce of the Empire, radiating from these points, through its canals and navigable rivers.

The cable being laid, this Company proposes erecting land lines, and establishing a speedy and trustworthy means of communication, which must command there, as everywhere else, the communications of the Government, of business, and of social life, especially in China. She has no postal system, and her only means now of communicating information is by couriers on land, and by steamers on water.

The Western World knows that China as very large country, in the main densely peopled; and a few yet realize that she contains more than a third of the human race. The latest returns made by her central authorities for taxing purposes by the local magistrates make her population Four Hundred and Fourteen Millions, and this is more likely to be under than over the actual aggregate. Nearly all of these, who are over ten years old, not only can but do read and write.

Her civilization is peculiar, but her literature is as extensive as that of Europe. China is a land of teachers and traders; and the latter are exceedingly quick to avail themselves of every proffered facility for procuring early information.

It is observed in California that the Chinese make great use of the telegraph, though it there transmits messages in English alone. To day great numbers of feet steers are owned by Chinese merchants, and used by them exclusively for the transmission of early intelligence. If the telegraph we propose, connecting all their great seaports, were now in existence, it is believed that its business would pay the cost within the first two years of its successful operation, and would steadily increase thereafter.

No enterprise commends itself as a greater degree remunerative to capitalists, and to our whole people. It is of a vast national importance commercially, politically, and evangelically.

The stock of this Company has been unqualifiedly recommended to capitalists and business men, as a desirable investment by editorial articles in the New York Herald, Tribune, World, Times, Post, Express, Independent, and in the Philadelphia North American, Press, Ledger, Inquirer, Age, Bulletin and Telegraph.

Shares of this Company, to a limited number, may be obtained at \$50 each, \$10 payable in \$15 on the 1st of November, and \$25 payable in monthly installments of \$2.50 each, commencing December 1, 1868, on application to

LEXEL & CO., 24 South Third Street, Philadelphia.

Shares can be obtained in Bedford by application to Reed & Schell Bankers, who are authorized to receive subscriptions, and can give all necessary information on the subject.
