But there are several other items beside appearance to be taken into consideration.

From the report of an agricultural committee in South-Carolina, in the year 1824, I quote the following: "The annual expense of keeping a horse is equal to his value. A horse at four years old will not bring much more than his cost. Two mules can be raised ped in and said he would take a wife and tw at a less expense than one horse.(?) The mule is fit for labor earlier, and if of sufficient size will perform as much labor as a horse; nded to when first put to work, his gait and his habits may be formed to suit his gaged" on Sunday, and married on Monday

I am convinced that a pair of mules may be kept in good condition, and do all the work for habitual drunkenness; what have you to usually required of a pair of horses on a farm, on three-fourths the hay and one-half the your honor, but habitual thirst." grain that would usually be fed to a pair of horses doing the same work.

and so slow of growth, that the shoes require and so slow of growth, the out; and the no removal, but hold till worn out; and the who, against his will, was made to rock the much less.

They are always found to be true pullers and quicker travelers with a load than horses; they are more steady in their draught than work before oxen. In hoe-harrowing, his feet being smaller and following each other more nearly in a line, he is not so likely to A WEST POINT correspondent says: "A tread on the corn.

After so much said about mules, it will be deemed folly, by some, to ask the question, what is a mule? The answer will, nine times the halls, we saw a splendid-looking fellow out of ten, be, "a hybrid between the horse and the ass." Yet this is not exactly correct, female ass, is the hinny, (from the Latin stopped that fun by tying knots in their tails. to neigh.) This animal is characteristic of the horse, which he closely resembles in many qualities; but he also inherits the hardy constitution and activity of his mother, the ass. One distinguishing feature of the hinny is that he neighs like a horse, and his ears are smaller and his feet larger than the mule proper. In every respect he partakes more of the character of the horse than the ass. jack, and the female horse or mare, is the mule, (from the Latin hemionus, or half-ass.)

plied, that "it was to prevent the fire from going out."

They are the Greatest and Best BLOOD PURIFIERS EVER KNOWN.

mon farm work, and quite as good for road as many mules? Or if too proud to ride beof the eight for as many mules? Why cannot our farmers raise mules more than they do?

But if we are to take the opinion of De Denyon the celebrated French physiologist, as a guide, we must be careful what wares we use for one thing. No amount of blood on the part of the dam will improve the mule; for whether the mare be common dunghill breed, or as thorough-bred as Spiletta, the mother of Eclipse, the offspring is still a mule of the same ass type. De Denyon tells aint we brave?" us that a mare which has once borne a hybrid ROUGH ON THE DOCTOR.—A village doctor becomes herseif a hybrid, and can never bear Gray Eagle, Wagner, Lilly Dale or Sallie them to a Revenue, a Lexington, a Monarch, or a Sweeper, and find the progeny on its appearance to be a longeared mule with a stripe Have any of the readers of the Telegraph, of him?" or can the Editor give us any reliable data on this point? De Denyon's comes from too far off. After all, the greatest part of our valuable knowledge comes from the experience of others. This is at least the case think your patient will recover?" "Recove AMOS W. BIGGS.

Lancaster County, Pa., July 8, 1869. LATE SOWING.

Wheat that is sown late generally results in total or partial failure. It may be safely said amused a little." that four out of five crops sown in October in this section, fail to produce paying results. The chances are heavily against such crops. The attempt to force them forward with fertilizers and manures has resulted only in pro ing a luxuriant growth but failed to hasten the ripening process. The best effect of manure on late crops was obtained when the manure had been applied the year before the wheat was sown. This, with well drained land, a rolling surface and a Southern exposure, will ripen wheat six or eight days earlier than when sown on a level soil without

drainage and favorable exposure. Our experience is general that when wheat Our experience is general that when wheat is sown in good season, even when the soil is not rich and the cultivation indifferent that the soil is not rich and the cultivation indifferent that the soil is solved to ask of the control of the contro weevil. Wheat should be sown in Septem ber, and never later than the 10 of October.

As they began to doze, a lightening bug, which had strayed into the room, caught the eye of the travelers. He roused his companion with a punch, "Jamie, Jamie, it's no early, and the chances for a good crop are greatly increased.—Farm Journal.

Bloody Run, Pa.

WALTHAM WATCHES. For a few months past we have advertised the above Watches at extremely low prices, and the result has been most satisfactory. Our plan has been to sell the genuine WALTHAM WATCH, in Solid Gold or Silver Casse only and at

es only, and at a very small profit; giving the purchaser every opportunity of examina-tion and comparison, and with the under-standing that if the Watch does not prove atisfactory, it can be exchanged or the ey refunded. ney refunded.

These Watches are, without exception, the most perfect specimens of fine mechanism ever produced in any country. Each and every part is made by machinery of the most delicate and elaborate construction.

Compared with foreign watches, they possess many advantages, excelling not only in

ess many advantages, excelling not only i reliability as time-keepers. As an indica-tion of the prices we submit the following: CLOTHING, BROOMS, BUCKETS BASKETS WALL and We often receive orders direct from our
