THE SUEZ CANAL. This second world's wonder of 1869, was duly opened on Thursday the 18th inst., with imposing ceremonies. In the true spirit of the age the news of the opening and its success, was flashed throughout the civilized world the same day. A grand banquet was given at Ismaila a point mid way between the Mediterranean and the Red Sea, on the 20th inst., at which the Empress Eugenie and many other distin guished persons were present. An immense fleet of first class ships has passed from Sea to sea and demonstrated the success of the enterprise. The success of this magnificent undertaking will be to the commerce of Europe and the world, what the Pacific Railroad is to America and the world on this continent. They both mark engineer ing triumphs upon which the world, nuti very recently, looked as impossible. They are both grand successes achieved in behalf of civilization and commerce. And they both precede and usher in great changes in the modes and courses of international ex-ehanges. While the Pacific Railroad binds the great model of Republic of all time in closer bonds of brotherhood, and brings into direct contact the newest and most active civilization of the world and the oldest, opening, awaking, changing and reforming the hitherto sealed and changeless flowery king dom, the Suez Canal similarly brings to gether diverse civilizations and promise to wake to life and vigor again the lon, silent cities of the East. Who can tell but that the magic wand of modern science shall again make noted among the great marts of commerce, Cairo and Alexandria, Jerusalem and Damascus? Those lands for a thousand years given over to wild beasts and wandering Arabs, may again teem with busy life and flourish among the nations of the earth. Truly the year 1869 seems desthe earth. Truly the year 1869 seems destined to mark such revolutions in the world as no previous year has ever known. America knocks at the gates of China and the great wall that has for two thousand years been disfigured by a bloody outbreak of the screened the flowery kingdom from the frontier tribes. The Commission, impereyes of the world crumbles to dust, and her imprisoned people pour fourth to the new has been, has proved a decisive success, has been, has proved a decisive success, and Congress will sustain and enlarge its and its results with the system of confucius and his disciples. Europe breaks the barriers of the east and the waters of the Red Sea commingle with the Mediterranean, and Sea commingle with the Mediterraneau, and the spicy breezes of Ceylon and Araby the blest are wafted to the classic shores of Greece, and instead of Horn and Good tions—The Election in Paris—No Dis Hope, Smai and the Pyramids become landmarks on the highway of the world's com merce. Such are the doings of this year, not yet closed. What shall be the future results it is scarcely possible to conjecture

is now renewed with greater earnestness. This fact takes the question out of its merely commercial relations, and makes it one of grave political importance.

Fifth. That the present British Ministry will only be too glad to see either independence or annexation, or both, made accomplished facts. In saying this, I speak from minutes made of an interview recently had with the Hon. John Bright, by one of the leading English merchants of Lower Canada, who is also an advanced Liberal and an advecate of independence. He visited England to ascertain, if possible, the opinion of the Ministry on these questions, and his interview with the President of the Board of Trade was by special appointment.

No trouble or interruption from snow is anticipated on the Pacific Railreads during the winter months, precautions having been taken to provide against a season of thrice the severity of last winter. The real snow season in that region does not commence until about the 50th of March or the first of April.

A DETROIT constable discovered a partial by intoxicated colored man who was carrying a naked yellow male baby three or four dava old, rolled up in the skirt of his coat. Being arrested, the man declared he had found the infant thrown out into the street, and he was taking it home to his wife, who was eatirely out of that household convenience, and "wanted one the best she knew how." An investigation showed that the story was true.

It is duly paragraphed that "Henry Ward Beecher's salary will be reduced to \$21,000 this year." Whether or not it will be considered proper to take up a subscription for him is not stated. Estimating his further income, from lecturing and writing, at some \$12,000 per annum—and it is all that—the reverend gentleman will have only a paltry \$33,000 a year to live upon. It is rather more, indeed, than any of the Apostles received, and even a larger income than most of the Eoglish bishops get, and only the property little; but considering that the Archbishop of Canterbury has \$75,000, and the Bishop of London \$50,000 a year, Mr. Beecher may fancy that he has a cause to complain. Harper's Bazar contains, besides pictures, patterns, etc., a variety of matter of especial use and interest to the family; articles on health, dress, and housekeeping in all its branches; its editofial matter is specially adapted to the circle it is intended to interest and instruct; and it has besides, good stories and literary matter of merit It is not surprising that the journal, with such features, has achieved in a short time an immense success; for something of its kind was desired in thousands of families, and its publishers have filled the demand.
